September 2013

Global Mitigation of Non-CO₂ Greenhouse Gases: 2010-2030

How to obtain copies

You can electronically download this document from the U.S. EPA's Web site at <<http://www.epa.gov/climatechange/EPAactivities/economics/nonco2mitigation.html>>.

For further information

The results presented in this report can be downloaded in spreadsheet format from the U.S. EPA's Web site at <<http://www.epa.gov/climatechange/EPAactivities/economics/nonco2mitigation.html>>. For additional information, contact Shaun Ragnauth, (202) 343-9142, ragnauth.shaun@epa.gov, U.S. Environmental Protection Agency.

Peer-reviewed document

This report has undergone an external peer review consistent with the guidelines of the U.S. EPA Peer Review Policy. Comments were received from experts in the private sector, academia, nongovernmental organizations, and other government agencies. See the Acknowledgements section for a list of reviewers. A copy of the EPA Peer Review guidelines can be downloaded from the following web page at <<http://www.epa.gov/osa/spc/2peerrev.htm>>.

Acknowledgements

This report was prepared under a contract between the U.S. Environmental Protection Agency (USEPA) and RTI International. Shaun Ragnauth edited and directed completion of the report. Lead authors include Jeffry Petrusa of RTI, Shaun Ragnauth of USEPA, Jameel Alsalam of USEPA, David Godwin of USEPA, Jared Creason of USEPA, Jia Li of USEPA, and Robert Beach of RTI. We thank USEPA reviewers Reid Harvey, Allison Costa, Kurt Roos, Tom Wirth, Jefferson Cole, Carey Bylin, Suzanne Waltzer, Tom Frankiewicz, Chris Godlove, Sally Rand, Kirsten Cappel, Jayne Somers, Melissa Weitz, and Elisa Rim.

Other significant contributors and co-authors include Sara Ohrel of USEPA, William Salas of Applied GeoSolutions, Changsheng Li of University of New Hampshire, Pete Ingraham of Applied GeoSolutions, Stephen Ogle of Colorado State University, and Benjamin Henderson of International Food Policy Research Institute.

The staff at RTI assisted in compiling and finalizing the report. The staff at RTI and ICF Consulting prepared many of the individual analyses. Special recognition goes to Jeffrey Petrusa at RTI and Marian Van Pelt at ICF Consulting for their significant contributions on this project.

We also thank the following external reviewers: Stuart Day (CSIRO Energy Technology), Clark Talkington (Advanced Resources International), Jon Kelefant (Advanced Resources International), Mike Godec (Advanced Resources International), Ronald Collings (Ruby Canyon Engineering), Pam Lacey (American Gas Association), Erica Bowman (America's Natural Gas Alliance), Richard Meyer (American Gas Association), Karin Ritter (American Petroleum Institute), Lisa Beal (Interstate Natural Gas Association of America), Alex MacPherson (USEPA), David McCabe (Clean Air Task Force), Maureen Hardwick (International Pharmaceutical Aerosol Consortium), Paul Ashford (Caleb Group), Debra Reinhart (National Science Foundation), Morton Barlaz (North Carolina State University), Chris Bayless (World Aluminum), Jerry Marks, Kenneth Martchek (Alcoa), Lee Bray (U.S. Geological Survey), Silvio Stangherlin (ABB), Archie McCulloch, Deborah Kramer (U.S. Geological Survey), Roger Desaulniers (Polycontrols), Kurt Werner (3M), Cynthia Murphy (University of Texas), Lambert Kuijpers (Technical University ECfS), Robert Wilkins (Danfoss), Bill Neuffer (USEPA), David Hind (Orica), Lorraine Gershman (American Chemistry Council), Mausami Desai (USEPA), Nathan Frank (USEPA), Himanshu Pathak (Indian Agricultural Research Institute), Kristen Johnson (Washington State University), Ron Sass (Rice University), Phil Robertson (Michigan State University), Arvin Mosier (USDA/ARS), Keith Smith (University of Edinburgh) Steven Smith (Pacific Northwest National Laboratory), Steven Rose (Electric Power Research Institute), Francesco Tubiello (UN Food and Agriculture Organization).

Although these individuals participated in the review of this analysis, their efforts do not constitute an endorsement of the report's results or of any USEPA policies and programs.

Executive Summary		ES-1
I. Technical Summary I-1		
I.1	Overview	I-1
I.2	Non-CO ₂ Greenhouse Gases.....	I-1
I.2.1	Methane (CH ₄).....	I-2
I.2.2	Nitrous Oxide (N ₂ O).....	I-3
I.2.3	F-Gases Gases	I-3
I.2.4	Use of GWPs in this Report	I-4
I.3	Methodology.....	I-4
I.3.1	Baseline Emissions for Non-CO ₂ Greenhouse Gases	I-5
I.3.2	Mitigation Option Analysis Methodology	I-7
I.3.3	Marginal Abatement Cost Curves	I-13
I.3.4	Methodological Enhancements from Analysis	I-15
I.4	Aggregate Results	I-15
I.4.1	Baselines	I-16
I.4.2	Global MACs	I-19
I.5	Limitations and Uncertainties	I-20
I.5.1	Exclusion of Transaction Costs	I-21
I.5.2	Static Approach to Abatement Assessment	I-21
I.5.3	Limited Use of Regional Data	I-21
I.5.4	Exclusion of Indirect Emissions Reductions	I-21
	References	I-22
II. Energy		
II.1	Coal Mining II-1	
II.1.1	Sector Summary	II-1
II.1.2	Methane Emissions from Coal Mining	II-3
II.1.2.1	Activity Data and Related Assumptions	II-4
II.1.2.2	Emissions Estimates and Related Assumptions	II-5
II.1.3	Abatement Measures and Engineering Cost Analysis	II-6
II.1.3.1	Methane Recovery System from Degasification/Drainage Systems	II-8

II.1.3.2	Degassification for Utilization in Energy Production	II-9
II.1.3.3	Degassification for On-site Utilization—Process Heat.....	II-11
II.1.3.4	Combustion through Flaring.....	II-12
II.1.3.5	VAM Oxidation.....	II-12
II.1.3.6	Evaluation of Future Mitigation Option and Trends.....	II-13
II.1.4	Marginal Abatement Costs Analysis	II-13
II.1.4.1	Methodological Approach.....	II-13
II.1.4.2	Assessment of Sectoral Trends.....	II-14
II.1.4.3	Definition of Model Facilities for the Analysis	II-15
II.1.4.4	Estimating Abatement Project Costs and Benefits	II-15
II.1.4.5	MAC Analysis Results	II-16
II.1.4.6	Uncertainties and Limitations.....	II-17
	References	II-19
II.2.	Oil and Natural Gas Systems	II-21
II.2.1	Sector Summary	II-21
II.2.2	Methane Emissions: Oil and Natural Gas Systems	II-22
II.2.2.1	Activity Data or Important Sectoral or Regional Trends and Related Assumptions.....	II-24
II.2.2.2	Emissions Estimates and Related Assumptions	II-25
II.2.3	Abatement Measures and Engineering Cost Analysis	II-26
II.2.3.1	Oil and Natural Gas Production.....	II-26
II.2.3.2	Gas Processing and Transmission Segments	II-29
II.2.3.3	Gas Distribution Segment.....	II-34
II.2.4	Marginal Abatement Costs Analysis	II-35
II.2.4.1	Methodological Approach.....	II-35
II.2.4.2	MAC Analysis Results	II-40
II.2.4.3	Uncertainties and Limitations.....	II-42
	References	II-43
III.	Waste	
III.1.	Landfill Sector	III-1
III.1.1	Sector Summary	III-1
III.1.2	Methane Emissions from Landfills.....	III-3
III.1.2.1	Activity Data or Important Sectoral or Regional Trends and Related Assumptions.....	III-4
III.1.2.2	Emissions Estimates and Related Assumptions	III-5
III.1.3	Abatement Measures and Engineering Cost Analysis	III-6

III.1.3.1	Landfill CH ₄ Mitigation Technologies	III-7
III.1.3.2	Diversion Alternatives	III-10
III.1.4	Marginal Abatement Costs Analysis	III-15
III.1.4.1	Methodological Approach.....	III-16
III.1.4.2	MAC Analysis Results	III-22
III.1.4.3	Uncertainties and Limitations.....	III-23
	References	III-24
III.2.	Wastewater	III-27
III.2.1	Sector Summary	III-27
III.2.2	GHG Emissions from Wastewater	III-29
III.2.2.1	CH ₄ Emissions from Domestic and Industrial Wastewater	III-29
III.2.2.2	N ₂ O Emissions from Domestic Wastewater—Human Sewage	III-30
III.2.2.3	Emissions Estimates and Related Assumptions.....	III-30
III.2.3	Abatement Measures and Engineering Cost Analysis	III-32
III.2.3.1	Overview of Abatement Measures.....	III-34
III.2.3.2	CH ₄ Mitigation Technology for Existing Decentralized Treatment.....	III-35
III.2.3.3	CH ₄ Mitigation Technology for Existing Collection System without Treatment.....	III-37
III.2.3.4	CH ₄ Mitigation Technology for Existing Centralized Aerobic WWTPs.....	III-38
III.2.4	Marginal Abatement Costs Analysis	III-40
III.2.4.1	Methodological Approach.....	III-40
III.2.4.2	MAC Analysis Results	III-42
III.2.4.3	Uncertainties and Limitations.....	III-44
	References	III-45
IV.	Industrial Processes	
IV.1.	Nitric and Adipic Acid Production.....	IV-1
IV.1.1	Sector Summary	IV-1
IV.1.2	N ₂ O Emissions from Nitric and Adipic Acid Production	IV-2
IV.1.2.1	Nitric Acid Production and Emission Factors	IV-2
IV.1.2.2	Adipic Acid Production and Emission Factors.....	IV-4
IV.1.2.3	Emissions Estimates and Related Assumptions	IV-5
IV.1.3	Abatement Measures and Engineering Cost Analysis	IV-6
IV.1.3.1	Adipic Acid—N ₂ O Abatement Methods	IV-7
IV.1.3.2	Nitric Acid—Primary Abatement Measures.....	IV-7
IV.1.3.3	Nitric Acid—Secondary Abatement Measures.....	IV-7

IV.1.3.4	Nitric Acid—Tertiary Abatement Measure: Direct Catalytic Decomposition	IV-8
IV.1.3.5	Nitric Acid—Tertiary Abatement Measure: Non-selective Catalytic Reduction (NSCR).....	IV-9
IV.1.4	Marginal Abatement Costs Analysis	IV-9
IV.1.4.1	Methodological Approach.....	IV-9
IV.1.4.2	MAC Analysis Results	IV-13
IV.1.4.3	Uncertainties and Limitations.....	IV-15
	References	IV-16
IV.2.	HFC Emissions from Refrigeration and Air Conditioning	IV-19
IV.2.1	Sector Summary	IV-19
IV.2.2	Emissions from Refrigeration and Air Conditioning.....	IV-20
IV.2.2.1	Activity Data or Important Sectoral or Regional Trends.....	IV-22
IV.2.2.2	Emission Estimates and Related Assumptions.....	IV-23
IV.2.3	Abatement Measures and Engineering Cost Analysis	IV-23
IV.2.3.1	Enhanced HFC-134a in New MVACs.....	IV-25
IV.2.3.2	HFO-1234yf in New MVACs.....	IV-25
IV.2.3.3	Enhanced HFO-1234yf in New MVACs	IV-25
IV.2.3.4	Distributed Systems in New Large Retail Food	IV-26
IV.2.3.5	HFC Secondary Loop and/or Cascade Systems in New Large Retail Food....	IV-26
IV.2.3.6	NH ₃ or HCs Secondary Loop and/or Cascade Systems in New Large Retail Food	IV-27
IV.2.3.7	CO ₂ Transcritical Systems in New Large Retail Food	IV-27
IV.2.3.8	Retrofits of R-404A in Large Retail Food	IV-28
IV.2.3.9	HCs in New Small Retail Food Refrigeration Systems.....	IV-28
IV.2.3.10	HCs in New Window AC and Dehumidifiers.....	IV-29
IV.2.3.11	R-32 in New Unitary AC Equipment and PTAC/PTHP	IV-29
IV.2.3.12	MCHX in New Unitary AC Equipment.....	IV-30
IV.2.3.13	R-32 with MCHX in New Unitary AC Equipment.....	IV-30
IV.2.3.14	MCHX in New Positive Displacement Chillers.....	IV-30
IV.2.3.15	NH ₃ or CO ₂ in New IPR and Cold Storage Systems	IV-31
IV.2.3.16	Refrigerant Recovery at Disposal for All Existing Equipment Types	IV-31
IV.2.3.17	Refrigerant Recovery at Servicing for Existing Small Equipment	IV-32
IV.2.3.18	Leak Repair for Existing Large Equipment	IV-32
IV.2.3.19	HCs in New Domestic Refrigeration Systems	IV-33
IV.2.3.20	CO ₂ in Transport Refrigeration	IV-33
IV.2.3.21	Low-GWP Refrigerants and Blends	IV-33

IV.2.4	Engineering Cost Data Summary	IV-33
IV.2.5	Marginal Abatement Costs Analysis	IV-35
IV.2.5.1	Methodological Approach.....	IV-36
IV.2.5.2	Assessment of Technical Effectiveness	IV-36
IV.2.5.3	Estimating Abatement Project Costs and Benefits	IV-39
IV.2.5.4	MAC Analysis Results	IV-41

List of Figures

<u>Number</u>		<u>Page</u>
Section I		
I-1	Contribution of Anthropogenic Emissions of Greenhouse Gases to the Enhanced Greenhouse Effect from Preindustrial to Present (measured in watts/meter ²)	I-2
I-2	Illustrative Non-CO ₂ Marginal Abatement Curve	I-13
I-3	Percentage Share of Global Non-CO ₂ Emissions ^a by Type of Gas in 2010.....	I-16
I-4	Non-CO ₂ Global Emissions Forecast to 2030 by Greenhouse Gas	I-17
I-5	Global Emissions by Major Sector for all Non-CO ₂ Greenhouse Gases	I-18
I-6	Projected World Emissions Baseline for Non-CO ₂ Greenhouse Gases, Including Top Emitting Regions.....	I-18
I-7	Global 2030 MACs by Non-CO ₂ Greenhouse Gas.....	I-19
I-8	Global 2030 MACs for Non-CO ₂ Greenhouse Gases by Major Emitting Regions	I-20
I-9	Global 2030 MACs for Non-CO ₂ Greenhouse Gases by Major Emitting Regions	I-20
Section II		
1-1	CH ₄ Emissions from Coal Mining: 2000–2030.....	II-1
1-2	Global Abatement Potential in Coal Mining: 2010, 2020, and 2030	II-2
1-3	Flow Chart of the Coal Mining Sector MAC Modeling Approach.....	II-14
1-4	Marginal Abatement Cost Curve for Top 5 Emitters and Rest of World in 2030	II-17
2-1	Emissions Projections for the Oil and Natural Gas Systems Sector: 2000–2030.....	II-21
2-2	Global Abatement Potential in Oil and Natural Gas Systems: 2010, 2020, and 2030	II-22
2-3	Segments of Oil and Natural Gas Systems.....	II-23
2-4	Global Natural Gas Production: 2015–2035	II-24
2-5	Diagram of BAU Emissions for the United States Oil and Natural Gas System.....	II-37
2-6	Marginal Abatement Cost Curves for Top 5 Emitters in 2030.....	II-41
Section III		
1-1	Emissions Projections for the Landfill Sector: 2000–2030	III-1
1-2	Global Abatement Potential in Landfill Sector: 2010, 2020, and 2030.....	III-2
1-3	Conceptual Model for Estimating Mitigation Potential in the MSW Landfill Sector	III-17
1-4	Marginal Abatement Cost Curve for Top 5 Emitters in 2030	III-23
2-1	CH ₄ Emissions from Wastewater: 2000–2030.....	III-27
2-2	N ₂ O Emissions from Domestic Wastewater: 2000–2030.....	III-28
2-3	Global MAC for Wastewater: 2010, 2020, and 2030	III-29
2-4	Sanitation Ladder for Improvements to Wastewater Treatment	III-33
2-5	Five Existing Scenarios Evaluated for Given Wastewater Discharge Pathways Based on Technology Level, Treatment Alternative, and Collection Method	III-33
2-6	Mitigation Technology Approach for Developing Countries with Decentralized Treatment.....	III-35
2-7	Mitigation Technology Approach for Developing Countries with Decentralized Treatment.....	III-38
2-8	Mitigation Technology Approach for Countries with Existing Centralized WWTPs.....	III-39
2-9	Domestic Wastewater MAC Analysis Flow Chart	III-40

2-10	Share of Wastewater CH ₄ Emissions to Domestic and Industrial Sources (Avg. 2002–2007)	III-41
2-11	Marginal Abatement Cost Curve for Top 5 Emitters in 2020	III-43

Section IV

1-1	N ₂ O Emissions from Nitric and Adipic Acid: 2000–2030	IV-1
1-2	Global MAC for Nitric and Adipic Acid: 2010, 2020, and 2030	IV-2
1-3	Adipic Acid Production Capacity by Country: 2010	IV-4
1-4	Operational Adipic Acid Production Facilities in 2010 by Share of Global Capacity	IV-11
1-5	Marginal Abatement Cost Curve for Top 5 Emitters in 2030	IV-14
2-1	HFC Emissions from Refrigeration and AC: 2000–2030 (MtCO ₂ e)	IV-19
2-2	Global Abatement Potential in Refrigeration and AC: 2010, 2020, and 2030	IV-20
2-3	Global HFC Emissions in 2020 by Application Type (% of GWP-Weighted Emissions)	IV-21
2-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-42
3-1	HFC and PFC Emissions from Solvent Use: 2000–2030 (MtCO ₂ e)	IV-49
3-2	Global Abatement Potential in Solvent Use: 2010, 2020, and 2030	IV-50
3-3	Global HFC Emissions in 2020 by Degreaser Type (% of GWP-Weighted Emissions)	IV-51
3-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-58
4-1	HFC Emissions from Foams Manufacturing: 2000–2030 (MtCO ₂ e)	IV-61
4-2	Global Abatement Potential in Foams Manufacturing: 2010, 2020, and 2030	IV-62
4-3	Global HFC Emissions in 2020 by Application Type (% of GWP-Weighted Emissions)	IV-63
4-4	Marginal Abatement Cost Curves for Top Five Foam Emitters in 2030	IV-75
5-1	HFC Emissions from Aerosol Product Use: 2000–2030 (MtCO ₂ e)	IV-79
5-2	Global Abatement Potential in Aerosol Product Use: 2010, 2020, and 2030	IV-80
5-3	Global HFC Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)	IV-81
5-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-88
6-1	HFC and PFC Emissions from Fire Protection: 2000–2030 (MtCO ₂ e)	IV-91
6-2	Global Abatement Potential in Fire Protection: 2010, 2020, and 2030	IV-92
6-3	Global HFC and PFC Emissions in 2020 (% of GWP-Weighted Emissions)	IV-93
6-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-100
7-1	PFC Emissions from Primary Aluminum Production: 2000–2030 (MtCO ₂ e)	IV-104
7-2	Global Abatement Potential in Primary Aluminum Production: 2010, 2020, and 2030	IV-105
7-3	Global PFC Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)	IV-106
7-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-114
8-1	HCF-23 Emissions from HCFC-22 Production: 2000–2030 (MtCO ₂ e)	IV-117
8-2	Global Abatement Potential in HCFC-22 Production: 2010, 2020, and 2030	IV-118
8-3	Global HFC-23 Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)	IV-120
8-4	Marginal Abatement Cost Curves for Countries with Abatement Potential in 2030	IV-126
9-1	Projected Baseline Emissions from Semiconductor Manufacturing: 2000–2030 (MtCO ₂ e)	IV-129
9-2	Global Abatement Potential in Semiconductor Manufacturing: 2010, 2020, and 2030	IV-130
9-3	Global F-GHG Emissions in 2020 by Fab Type and Process (% of GWP-Weighted Emissions)	IV-132

9-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-143
10-1	SF ₆ Emissions from Electric Power Systems: 2000–2030 (MtCO ₂ e).....	IV-147
10-2	Global Abatement Potential in Electric Power Systems: 2010, 2020, and 2030.....	IV-148
10-3	Percentage of Global SF ₆ Emissions in 2020 by Emission Stream (% of GWP-Weighted Emissions).....	IV-149
10-4	Global SF ₆ Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)	IV-151
10-5	Distribution of 2010 Emission Rates Reported through USEPA's Voluntary Partnership	IV-158
10-6	Marginal Abatement Cost Curves for Top Five and Rest of World Emitters in 2030	IV-161
11-1	SF ₆ Emissions from Magnesium Production: 2000–2030 (MtCO ₂ e)	IV-165
11-2	Global Abatement Potential in Magnesium Manufacturing: 2010, 2020, and 2030	IV-166
11-3	Global SF ₆ Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)	IV-167
11-4	Marginal Abatement Cost Curves for Top Five Emitters in 2030	IV-174
12-1	F-GHG Emissions from PV Cell Manufacturing: 2000–2030 (MtCO ₂ e).....	IV-177
12-2	Global Abatement Potential in PV Cell Manufacturing: 2010, 2020, and 2030.....	IV-178
12-3	Global F-GHG Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)..	IV-179
12-4	Marginal Abatement Cost Curves for Top Five Emitters and Rest of World in 2030	IV-187
13-1	F-GHG Emissions from FPD Manufacturing: 2000–2030 (MtCO ₂ e)	IV-191
13-2	Global Abatement Potential in FPD Manufacturing: 2010, 2020, and 2030	IV-192
13-3	Global F-GHG Emissions in 2020 by Facility Type (% of GWP-Weighted Emissions)..	IV-193
13-4	Marginal Abatement Cost Curves by Emitting County in 2030.....	IV-199

Section V

1-1	Global Baseline Emissions from Non-Rice Croplands by GHG: 2010-2030	V-2
1-2	Baseline Net GHG Emissions from Non-Rice Croplands, Top Five Emitting Countries.....	V-3
1-3	Global MAC Curve for Net GHG Reductions from Non-Rice Cropland Soils	V-4
1-4	Marginal Abatement Cost Curve for Top-Five Emitting Countries in 2010 and 2030	V-12
1-5	Global Abatement Potential in Non-rice Croplands Management: 2010, 2020, and 2030 (Includes “Optimal N Fertilization” Strategy).....	V-14
1-6	Marginal Abatement Cost Curve for Top 5 Emitters in 2010, 2030 (Includes “Optimal N Fertilization” Strategy).....	V-15
2-1	Net GHG Emissions Projections for Rice Cultivation: 2000–2030.....	V-19
2-2	Global Abatement Potential in Rice Cultivation with Production Equal to Baseline Levels: 2010, 2020, and 2030	V-21
2-3	DNDC Rice Cropland Area Sown, Top 5 countries, by Type and Water Management.....	V-23
2-4	Marginal Abatement Cost Curve for Top 5 Emitters in 2030, Baseline Production Case.....	V-39
2-5	Marginal Abatement Cost Curve, Baseline Area Case	V-40
2-6	Marginal Abatement Cost Curve for Top 5 Emitters in 2030, Baseline Area Case	V-40
3-1	Total Net GHG Emissions and Projections for the Livestock Sector: 2000-2030	V-43
3-2	CH ₄ Emissions Projections for the Livestock Sector: 2010–2030.....	V-44
3-3	N ₂ O Emissions Projections from the Livestock Sector: 2010–2030	V-44
3-4	Global Abatement Potential in Livestock Management: 2010, 2020, and 2030	V-45
3-5	Marginal Abatement Cost Curve for Top 5 Emitters in 2030 (Baseline Production Case)	V-64

CONTENTS

3-6	Global Net GHG Livestock Emissions Reduction Potential by Mitigation Option (Baseline Production Case).....	V-65
3-7	Global Abatement Potential in Livestock Management, Baseline Number of Animals : 2010, 2020, and 2030.....	V-66
3-8	Global Abatement Potential in Livestock Management, Baseline Production with No Antimethanogen: 2010, 2020, and 2030	V-67
3-9	Global Abatement Potential in Livestock Management, Baseline Number of Animals with No Antimethanogen: 2010, 2020, and 2030	V-69
3-10	Global Beef Production under Baseline and Mitigation Options, Assuming Full Adoption of Individual Options and Holding the Number of Animals Constant.....	V-70
3-11	Global Production of Milk from Dairy Cattle Under Baseline and Mitigation Options, Assuming Full Adoption of Individual Options and Holding the Number of Animals Constant.....	V-71

List of Tables

<u>Number</u>		<u>Page</u>
Section I		
I-1	Global Non-CO ₂ Greenhouse Gas (GHG) Emissions for 2010 (MtCO ₂ e) by Source and Gas Type.....	I-2
I-2	Global Warming Potentials	I-4
I-3	Calculation of Potential Emission Reduction for an Abatement Option	I-9
I-4	Financial Assumptions in Breakeven Price Calculations for Abatement Options	I-11
I-5	International Economic Adjustment Factors for Selected Countries.....	I-12
Section II		
1-1	IPCC Suggested Underground Emissions Factors for Selected Countries in m ³ /tonne Coal Produced.....	II-5
1-2	Projected Emissions from Coal Mine CH ₄ by Country and Region: 2010 to 2030 (MtCO ₂ e)	II-6
1-3	Summary of Abatement Measures for Coal Mines.....	II-7
1-4	Factors Used to Estimate Abatement Potential in Coal Mines	II-7
1-5	Example Break-Even Price Calculation for Coal Mine Abatement Measures.....	II-15
1-6	Abatement Potential by Region at Selected Break-Even Prices (\$/tCO ₂ e) in 2030	II-16
2-1	Emissions Source from Oil and Natural Gas Systems	II-23
2-2	Projected Baseline CH ₄ Emissions for Oil and Natural Gas Systems by Country/Region: 2010–2030 (MtCO ₂ e)	II-25
2-3	Abatement Measures Applied in Oil and Gas Production Segments	II-27
2-4	Abatement Measures for the Natural Gas Processing Segment.....	II-30
2-5	Abatement Measures for the Natural Gas Transmission Segment.....	II-31
2-6	Abatement Measures for the Distribution Segment	II-34
2-7	International Statistics on Key Activity Drivers: 2010	II-36
2-8	Example Break-Even Price Calculation based on 2010 MAC for the United States	II-39
2-9	Abatement Potential by Region at Selected Break-Even Prices in 2030	II-41
Section III		
1-1	Projected Baseline Emissions for MSW Landfills by Country: 2010–2030 (MtCO ₂ e)	III-5
1-2	Summary of the Engineering and Cost Assumptions for Abatement Measures at Landfills	III-6
1-3	Electricity Generation Technology Costs	III-8
1-4	Model Facilities Share of BAU Emissions: 2010–2030.....	III-18
1-5	Model Facility Assumptions for International LFG Mitigation Options	III-19
1-6	CH ₄ Generation Factors by Country	III-20
1-7	Example Break-Even Prices for MSW Landfill Technology Options	III-21
1-8	Break-Even Prices of Waste Diversion Options.....	III-21
1-9	Abatement Potential by Region at Selected Break-Even Prices in 2030 (MtCO ₂ e).....	III-22
2-1	Projected CH ₄ Baseline Emissions from Wastewater: 2010–2030 (MtCO ₂ e)	III-31
2-2	Projected N ₂ O Baseline Emissions from Human: 2010–2030 (MtCO ₂ e)	III-31
2-3	Abatement Measures for the Wastewater Sector	III-34

2-4	Example Break-Even Prices for Wastewater Abatement Measures in 2030 for the United States.....	III-42
2-5	Abatement Potential by Region at Selected Break-Even Prices in 2030	III-43

Section IV

1-1	IPCC Emissions Factors for Nitric Acid Production.....	IV-3
1-2	Projected N ₂ O Baseline Emissions from Nitric and Adipic Acid Production: 2010–2030.....	IV-5
1-3	Abatement Measures for Nitric and Adipic Acid Production.....	IV-6
1-4	Adipic Acid-Producing Countries' Share of Baseline Emissions	IV-12
1-5	Model Nitric Acid Facilities Assumptions	IV-13
1-6	Example Break-Even Prices for N ₂ O Abatement Measures.....	IV-13
1-7	Abatement Potential by Region at Selected Break-Even Prices in 2030	IV-14
2-1	Projected Baseline Emissions from Refrigeration and AC: 2010 to 2030 (MtCO ₂ e)	IV-23
2-2	Refrigeration and AC Abatement Options.....	IV-24
2-3	Engineering Cost Data on a Facility Basis	IV-34
2-4	Technical Effectiveness Summary	IV-36
2-5	Example Break-Even Prices for Abatement Measures in Refrigeration and AC	IV-39
2-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-41
3-1	Projected Baseline Emissions from Solvent Use: 2010–2030 (MtCO ₂ e)	IV-52
3-2	Solvent Use Abatement Options.....	IV-52
3-3	Engineering Cost Data on a Facility Basis	IV-55
3-4	Technical Effectiveness Summary	IV-56
3-5	Example Break-Even Prices for Abatement Measures in Solvent Use	IV-57
3-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-57
4-1	Projected Baseline Emissions from Foams Manufacturing: 2010–2030 (MtCO ₂ e)	IV-65
4-2	Foams Manufacturing Abatement Options	IV-65
4-3	Engineering Cost Data on a Facility Basis	IV-71
4-4	Technical Effectiveness Summary	IV-73
4-5	Example Break-Even Prices for Abatement Measures in Foams Manufacturing	IV-74
4-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-75
5-1	Projected Baseline Emissions from Aerosol Product Use: 2010-2030 (MtCO ₂ e).....	IV-82
5-2	Aerosol Product Use Abatement Options	IV-83
5-3	Engineering Cost Data on a Facility Basis	IV-85
5-4	Technical Effectiveness Summary	IV-86
5-5	Example Break-Even Prices for Abatement Measures in Aerosol Product Use.....	IV-86
5-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-87
6-1	Projected Baseline Emissions from Fire Protection: 2010 to 2030 (MtCO ₂ e)	IV-94
6-2	Fire Protection Abatement Options.....	IV-95
6-3	Engineering Cost Data on a Facility Basis	IV-98
6-4	Technical Effectiveness Summary	IV-98
6-5	Example Break-Even Prices for Abatement Measures in Fire Protection	IV-99

6-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-100
7-1	Projected Baseline Emissions from Primary Aluminum Production: 2010–2030 (MtCO ₂ e)	IV-108
7-2	Primary Aluminum Production Abatement Options	IV-109
7-3	Engineering Cost Data on a Facility Basis	IV-111
7-4	Description of Primary Aluminum Production Facilities	IV-112
7-5	Technical Effectiveness Summary	IV-112
7-6	Example Break-Even Prices for Abatement Measures in Primary Aluminum Production	IV-113
7-7	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-113
8-1	Projected Baseline Emissions from HCFC-22 Production: 2010–2030 (MtCO ₂ e)	IV-120
8-2	Distribution of HCF-23 Emissions by Location and Facility Type: 2010–2030	IV-121
8-3	HCFC-22 Production Abatement Options	IV-122
8-4	Engineering Cost Data on a Facility Basis	IV-122
8-5	Technical Effectiveness Summary	IV-125
8-6	Example Break-Even Prices for Abatement Measures in HCFC-22 Production	IV-125
8-7	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-126
9-1	Projected Baseline Emissions from Semiconductor Manufacturing: 2010-2030 (MtCO ₂ e)	IV-133
9-2	Semiconductor Manufacturing Abatement Options	IV-134
9-3	Engineering Cost Data on a Facility Basis	IV-135
9-4	Annual Cost per Tool for Thermal Abatement Systems	IV-136
9-5	Capital Costs per CVD Chamber for Making a Facility NF ₃ Ready	IV-138
9-6	Percentage of Annual Emissions by Process and Fab Type	IV-141
9-7	Technical Effectiveness Summary for New Fabs (Constant Over Time)	IV-141
9-8	Technical Effectiveness Summary for Old Fabs (in 2020)	IV-141
9-9	Example Break-Even Prices for Abatement Measures in Semiconductor Manufacturing	IV-142
9-10	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-143
10-1	Projected Baseline Emissions from Electric Power Systems: 2010–2030 (MtCO ₂ e)	IV-152
10-2	EPS Abatement Options	IV-153
10-3	Engineering Cost Data on a Facility Basis	IV-154
10-4	EPSs System Country Mapping	IV-159
10-5	Technical Effectiveness Summary	IV-160
10-6	Example Break-Even Prices for Abatement Measures in EPSs	IV-160
10-7:	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-161
11-1	Projected Baseline Emissions from Magnesium Production: 2010–2030 (MtCO ₂ e)	IV-168
11-2	Magnesium Production Abatement Options	IV-169
11-3	Engineering Cost Data on a Facility Basis	IV-171
11-4	Technical Effectiveness Summary	IV-172
11-5	Example Break-Even Prices for Abatement Measures in Magnesium Manufacturing..	IV-173

11-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-173
12-1	Projected Baseline Emissions from PV Cell Manufacturing: 2010–2030 (MtCO ₂ e).....	IV-182
12-2	PV Cell Manufacturing Abatement Options.....	IV-182
12-3	Engineering Cost Data on a Facility Basis	IV-184
12-4	Technical Effectiveness Summary	IV-185
12-5	Example Break-Even Prices for Abatement Measures in PV Cell Manufacturing	IV-186
12-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-186
13-1	Projected Baseline Emissions from FPD Manufacturing: 2010–2030 (MtCO ₂ e)	IV-194
13-2	FPD Manufacturing Abatement Options	IV-195
13-3	Engineering Cost Data on a Facility Basis	IV-197
13-4	Technical Effectiveness Summary	IV-198
13-5	Example Break-Even Prices for Abatement Measures in FPD Manufacturing.....	IV-198
13-6	Abatement Potential by Country/Region at Selected Break-Even Prices in 2030 (MtCO ₂ e)	IV-199

Section V

1-1	Projected Net GHG Baseline Emissions from Non-Rice Croplands by Country: 2010–2030 (MtCO ₂ e)	V-3
1-2	DAYCENT Base Mean Yields, and Differences from Mean Yield for Mitigation Strategies, by Year (Metric tons of Grain per Hectare).....	V-9
1-3	Abatement Potential at Selected Break-Even Prices in 2030 (No “Optimal Fertilization “Scenario)	V-11
1-4	Global Total Abatement Potential from Cropland Soils by Measure (MtCO ₂ e) (“Optimal N Fertilization” Strategy excluded).....	V-13
1-5	Global Total Abatement Potential from Cropland Soils by Measure (MtCO ₂ e) (Includes “Optimal N Fertilization” Strategy).....	V-14
2-1	Baseline CH ₄ , N ₂ O, and Soil Carbon Estimates for Rice Cropland for 2010, 2020 and 2030 by Region	V-20
2-2	Baseline yields for 2010, 2020 and 2030 for selected countries (kg/ha).....	V-24
2-3	Baseline production for 2010, 2020 and 2030 for selected countries (metric tonnes)	V-24
2-4	DNDC Average N Fertilizer Application Rate by Country and Rice Production Type	V-25
2-5	Distribution of Baseline Water Management for Irrigated Rice by Country (%).....	V-28
2-6	Alternative Rice Management Scenarios Simulated using DNDC	V-33
2-7	Rice Management Techniques	V-35
2-8	Abatement Potential by Region at Selected Break-Even Prices in 2030 (MtCO ₂ e).....	V-37
2-9	Distribution of Net GHG Reductions across Mitigation Options, Baseline Production Case	V-38
3-1	Projected Baseline Emissions from Livestock Management: 2010–2030 (MtCO ₂ e)	V-48
3-2	Projected Baseline Emissions from Enteric Fermentation: 2010–2030 (MtCO ₂ e)	V-48
3-3	Projected Baseline Emissions from Manure Management: 2010–2030 (MtCO ₂ e)	V-49
3-4	Abatement Measures for Enteric Fermentation CH ₄	V-51
3-5	Abatement Measures for Manure Management.....	V-54
3-6	Projected Global Livestock Populations by Species.....	V-58
3-7	Regional Livestock Populations by Species, 2010 and 2030.....	V-60

3-8	Livestock Distribution by Intensity and Livestock Production System for India, 2010 (% of animals by species)	V-62
3-9	Abatement Potential by Region at Selected Break-Even Prices in 2030 (MtCO ₂ e), Baseline Production Case	V-63
3-10	MAC Results and Differences from Constant Production Case for Baseline Number of Animals Scenario.....	V-66
3-11	MAC Results and Differences from Constant Production Case for No Antimethanogen Scenario	V-68
3-12	MAC Results and Differences from Constant Production Case for Combined Baseline Number of Animals and No Antimethanogen Case	V-69
