Look for EPA's Safer Choice label

to find products with ingredients that are
safer for schools and communities

EPA's Safer Choice label

Products that carry the Safer Choice label have been carefully evaluated by EPA scientists to ensure they contain ingredients that are safer for human health and the environment.

Safer Choice-labeled products must:

- Contain safer ingredients
- Work
- Disclose all ingredients
- Meet packaging requirements

The Safer Choice label helps you find products made with ingredients that are safer for our families, pets, communities, and the environment.

Find Safer Choice-labeled products!
