

AGENCY: ENVIRONMENTAL PROTECTION AGENCY (EPA)

TITLE: “Modeling of Climate Change Mitigation, Impacts and Adaption”

ACTION: Request for Proposals (RFP) Questions and Answers (Q/A)

RFA #: EPA-OAR-OAP-16-07

SUMMARY: Formal Agency responses to questions regarding the subject RFP:

DATE: September 12, 2016

Q1) Can you clarify the language below from EPA-OAR-OAP-16-07 - Does EPA only have \$1,250,000 available for the 3 awards which would mean each award would only be for an estimated \$416.6K total? Or would the total of each award be \$1,250,000 which would mean EPA actually has \$3,750,000 available for the 3 awards?

A1) The maximum five year total of funds available through this opportunity is \$1,250,000. As stated in the announcement text, EPA expects to award approximately one to three cooperative agreements resulting from this announcement ranging in value from approximately \$100,000 to \$250,000 per year. EPA may award only one, two, or three cooperative agreements. The amount of any award in each respective year is subject to the availability of funds, quality of evaluated proposals, and other applicable considerations. Proposals should specify the applicant’s planned period of performance, which may be up to 5 years, as described in the RFP.
