**Memorandum**

**Date:** September 23, 2008

James T. Owens, III  
 Director  
 Sullivan  
 83

**Subject:** Transmittal of Second 5 Year Review,  
 Sullivan's Ledge Superfund Site,  
 New Bedford, MA

**From:** David O. Lederer  
 Remedial Project Manager

**To:** James T. Owens, III  
 Director, Office of Site Remediation and Restoration

**Thru:** Bob Cianciarulo,  
 Chief, Massachusetts Superfund Section

Larry Brill   
 Chief, Remediation and Restoration Branch

Richard A. Cavagnero   
 Deputy Director, Office of Site Remediation and Restoration

The Sullivan's Ledge Site, located in New Bedford, Massachusetts, consists of two operable units, Operable Unit 1 (OU1) and Operable Unit 2 (OU2). OU1 consists of a 12-acre historic disposal area and the adjacent unnamed stream. OU2 includes a 13-acre wooded wetland called Middle Marsh, and a 1.5 acre wetland area bordering the unnamed stream (400 feet upstream of the Middle Marsh) referred to as the "Adjacent Wetlands."

This is the second five-year review for the site. The trigger for this statutory review is the signature date of the previous five-year review report on September 29, 2003. This review is required by statute as the selected remedies for OU1 and OU2 result in site contaminants being left on the site above levels that allow for unlimited use and unrestricted exposure.
