RE: Modeling Report: Brame Energy Center, Rapides Parish, Louisiana

Dear Mr. Donaldson:

In accordance with the Sulfur Dioxide (SO₂) Data Requirements Rule, the Louisiana Department of Environmental Quality (LDEQ) hereby submits for your review the modeling report for Brame Energy Center. The model results indicate that the impact of the SO₂ emission sources within the Brame Energy Center will be significantly lower than the 1-hour SO₂ National Ambient Air Quality Standards and therefore Rapides Parish is expected to be in attainment. The LDEQ agrees with the conclusions of this report.

Electronic modeling files have been forwarded to the EPA Region 6 modeling staff via the ftp site.

If you have any questions or need further assistance please contact Vennetta Hayes of my staff at 225-219-3412.

Sincerely,

Donald Trahan
Administrator
