<b>1:00 PM</b>	<b>Convene Meeting and Identification of Board Members</b> – Jim Downing (Designated Federal Officer, EPA HSRB, OSA)
<b>1:10 PM*</b>	<b>Meeting Administrative Procedures</b> – Jim Downing, DFO
<b>1:15 PM</b>	<b>Meeting Process</b> – Sean Philpott, Ph.D. (HSRB Chair)
<b>1:20 PM</b>	<b>Public Comments</b>
<b>1:30 PM</b>	<b>Board Discussion and Decision on Final Report</b> – Sean Philpott, Ph.D. (HSRB Chair)

The Board's response to EPA charge questions presented at the October 19-20, 2011 meeting.

**A new scenario design and associated protocol from the Antimicrobial Exposure Assessment Task Force II (AEATF-II), describing proposed research to monitor the dermal and inhalation exposure of workers while pouring liquid antimicrobial pesticide products from both conventional and reduced-splash containers.**

Charge to the Board:

If the AEATF liquid pour study proposal is revised as suggested in EPA's review and if the research is performed as described:

- Is the research likely to generate scientifically reliable data, useful for assessing the exposure of individuals who manually pour liquid antimicrobial products?
- Is the research likely to meet the applicable requirements of 40 CFR part 26, subparts K and L?

**A new scenario design and associated protocols from the Agricultural Handler Exposure Task Force (AHETF) describing proposed research to measure dermal and inhalation**

**exposure to workers who use closed system equipment to load liquid pesticide products from returnable and non-returnable containers.**

Charge to the Board:

If the AHETF closed system liquid loading study proposal is revised as suggested in EPA's review and if the research is performed as described:

- Is the research likely to generate scientifically reliable data, useful for assessing the exposure of workers using closed systems to load liquid pesticide products from returnable or non-returnable containers?
- Is the research likely to meet the applicable requirements of 40 CFR part 26, subparts K and L?

**A completed Carroll-Loye Biological Research, Inc. (CLBR) study (No Mas 003) to evaluate the field repellent efficacy against mosquitoes of a product containing 16% para-methane-3,8-diol and 2% lemongrass oil.**

Charge to the Board:

- Is the CLBR completed study No Mas 003 sufficiently sound, from a scientific perspective, to be used to estimate the duration of complete protection against mosquitoes provided by the tested repellent?
- Does available information support a determination that the study No Mas 003 was conducted in substantial compliance with 40 CFR Part 26, subparts K and L?

**A published report by *Moiemen et al* (2011) of an intentional exposure human study measuring dermal absorption of silver from the use of nanosilver-containing wound dressings to treat major burns.**

Charge to the Board:

- Is the Moiemen (2011) study scientifically sound, providing reliable data?
- If so, can the Moiemen (2011) study be used to support the Agency's conclusion that the dermal absorption factor for silver from nanosilver on human skin is less than 0.1%?
- Is there adequate information to support a determination that the study was conducted in substantial compliance procedures at least as protective as those at subparts A-L of 40 CFR Part 26?

**3:55 PM      Summary and Next Steps – Sean Philpott, Ph.D. (HSRB Chair) and Jim Downing (DFO)**

**4:00 PM      Adjournment**
