## HEALTH IMPACT ASSESSMENT GENERIC SCREENING TOOL

Specific policy, program or project to be assessed:

Health impact assessment requires a broad definition of health. These are the definitions we have used in our own work.

Health is more than not being sick. Health is a resource for everyday life—the ability to realize hopes, satisfy needs, change or cope with life experiences, and participate fully in society. Health has physical, mental, social and spiritual dimensions.<sup>1</sup>

Health is a product of individual factors (such as genes, beliefs, coping skills, and personal behaviors) combined with collective conditions (factors in the physical, social and economic environment.) The social and economic environment is a major determinant of population health that has not been a focus of most health improvement efforts in Minnesota.<sup>2</sup>

The purpose of screening is to filter out projects that are either not appropriate or beyond the user's capabilities at this time. Circle one response for each question.

Tendency to do an HIA	To your knowledge:	Tendency not to do an HIA
Yes	Are there potential positive and/or negative health impacts of the policy, program, or project to be assessed that need further investigation?	No/ maybe
No/ maybe	Are there any major political obstacles/barriers to successfully completing a health impact assessment on this policy, program or project?	Yes
Yes/ maybe	Are the individuals and organizations with a stake in this policy, program or project likely to buy into the HIA process?	No
Yes	Is your organization willing to act as the lead agency in conducting the health impact assessment on this policy, program or project, <u>OR</u> have you contacted another organization that will?	No
Yes	Are the combined resources of the lead agency and its partners likely to be sufficient to complete an HIA on this policy, program or project, or can resources be accessed?	No
Yes	Can a health impact assessment on this policy, program, or project be completed within a time frame that is useful for influencing decision-making?	No
High High	What is your sense of the likelihood that the health impacts of this policy, program or project might be intensified for disadvantaged groups?  Positive health impacts and/or Negative health impacts	Moderate/ low Moderate/ low
Yes/ maybe	Is there already some discussion (a "buzz") at the <u>policy</u> level about potential (or suspected) health impacts of this policy, program or project?	No
Yes/ maybe	Is there already some discussion (a "buzz") at the <u>community</u> level about potential (or suspected) health impacts of this policy, program or project?	No
Yes/ maybe	Is there some reason to suspect that health issues not considered in the planning process of this policy, project or program might become more visible by doing an HIA?	No
No	Is there already so <u>much</u> evidence, data, or experience out there regarding this policy, program or project that an HIA might be a waste of resources?	Yes
No	Is there so <u>little</u> evidence, data, or experience regarding this policy, program or project that an HIA might not be possible?	Yes

g over the answers you gave above, please summarize briefly why you do or do not think that this ogram/project would be a good candidate for HIA at this time.
