

Table II. EPCRA Section 313 Chemical List For Reporting Year 2016 (including Toxic Chemical Categories)

Individually listed EPCRA Section 313 chemicals with CAS numbers are arranged alphabetically starting on page II-3. Following the alphabetical list, the EPCRA Section 313 chemicals are arranged in CAS number order. Covered chemical categories follow.

Note: Chemicals may be added to or deleted from the list. The Emergency Planning and Community Right-to-Know Call Center or the TRI-Listed Chemicals website will provide up-to-date information on the status of these changes. See section B.3.c of the instructions for more information on the *de minimis* % limits listed below. There are no *de minimis* levels for PBT chemicals since the *de minimis* exemption is not available for these chemicals (an asterisk appears where a *de minimis* limit would otherwise appear in Table II). However, for purposes of the supplier notification requirement only, such limits are provided in Appendix C.

Chemical Qualifiers

Certain EPCRA Section 313 chemicals listed in Table II have parenthetic “qualifiers.” These qualifiers indicate that these EPCRA Section 313 chemicals are subject to the section 313 reporting requirements if manufactured, processed, or otherwise used in a specific form or when a certain activity is performed. An EPCRA Section 313 chemical that is listed without a qualifier is subject to reporting in all forms in which it is manufactured, processed, and otherwise used. The following chemicals are reportable only if they are manufactured, processed, or otherwise used in the specific form(s) listed below:

| Chemical/ Chemical Category | CAS Number | Qualifier |
|---|-------------------|--|
| Aluminum (fume or dust) | 7429-90-5 | <u>Only</u> if it is a fume or dust form. |
| Aluminum oxide (fibrous forms) | 1344-28-1 | <u>Only</u> if it is a fibrous form. |
| Ammonia (includes anhydrous ammonia and aqueous ammonia from water dissociable ammonium salts and other sources; 10 percent of total aqueous ammonia is reportable under this listing) | 7664-41-7 | <u>Only</u> 10% of aqueous forms. 100% of anhydrous forms. |
| Asbestos (friable) | 1332-21-4 | <u>Only</u> if it is a friable form. |
| Hydrochloric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size) | 7647-01-0 | <u>Only</u> if it is an aerosol form as defined. |
| Nitrate compounds (water dissociable; reportable only when in aqueous solution) | NA | <u>Only</u> if in aqueous solution |
| Phosphorus (yellow or white) | 7723-14-0 | <u>Only</u> if it is a yellow or white form. |
| Sulfuric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size) | 7664-93-9 | <u>Only</u> if it is an aerosol form as defined. |
| Vanadium (except when contained in an alloy) | 7440-62-2 | <u>Except</u> if it is contained in an alloy. |
| Zinc (fume or dust) | 7440-66-6 | <u>Only</u> if it is in a fume or dust form. |

The qualifier for the following three chemicals is based on the chemical activity rather than the form of the chemical. These chemicals are subject to EPCRA section 313 reporting requirements only when the indicated activity is performed.

| Chemical/ Chemical Category | CAS Number | Qualifier |
|--|-------------------|--|
| Dioxin and dioxin-like compounds (manufacturing; and the processing or otherwise use of dioxin and dioxin-like compounds if the dioxin and dioxin-like compounds are present as contaminants in a chemical and if they were created during the manufacture of that chemical.) | NA | <u>Only</u> if they are manufactured at the facility; or are processed or otherwise used when present as contaminants in a chemical but only if they were created during the manufacture of that chemical. |
| Isopropyl alcohol (only persons who manufacture by the strong acid process are subject, no supplier notification) | 67-63-0 | <u>Only</u> if it is being manufactured by the strong acid process. Facilities that process or otherwise use isopropyl alcohol are <u>not</u> covered and should <u>not</u> file a report. |
| Saccharin (only persons who manufacture are subject, no supplier notification) | 81-07-2 | <u>Only</u> if it is being manufactured. |

Table II. EPCRA Section 313 Chemical List for Reporting Year 2016

Supplier Notification Implications

There are no supplier notification requirements for isopropyl alcohol and saccharin since the processors and users of these chemicals are not required to report. Manufacturers of these chemicals do not need to notify their customers that these are reportable EPCRA section 313 chemicals.

Qualifier Definitions

Fume or dust. Two of the metals on the list (aluminum and zinc) contain the qualifier “fume or dust.” Fume or dust refers to dry forms of these metals but does not refer to “wet” forms such as solutions or slurries. As explained in Section B.3.a of these instructions, the term manufacture includes the generation of an EPCRA Section 313 chemical as a byproduct or impurity. In such cases, a facility should determine if, for example, it generated more than 25,000 pounds of aluminum fume or dust in the reporting year as a result of its activities. If so, the facility must report that it manufactures “aluminum (fume or dust).” Similarly, there may be certain technologies in which one of these metals is processed in the form of a fume or dust to make other EPCRA Section 313 chemicals or other products for distribution in commerce. In reporting releases, the facility would only report releases of the fume or dust.

EPA considers dusts to consist of solid particles generated by any mechanical processing of materials including crushing, grinding, rapid impact, handling, detonation, and decrepitation of organic and inorganic materials such as rock, ore, and metal. Dusts do not tend to flocculate, except under electrostatic forces.

EPA considers a fume to be an airborne dispersion consisting of small solid particles created by condensation from a gaseous state, in distinction to a gas or vapor. Fumes arise from the heating of solids such as lead. The condensation is often accompanied by a chemical reaction, such as oxidation. Fumes flocculate and sometimes coalesce.

Manufacturing qualifiers. Two of the entries in the EPCRA Section 313 chemical list contain a qualifier relating to manufacture. For isopropyl alcohol, the qualifier is “only persons who manufacture by the strong acid process are subject, no supplier notification.” For saccharin, the qualifier is “only persons who manufacture are subject, no supplier notification.” For isopropyl alcohol, the qualifier means that only facilities manufacturing isopropyl alcohol by the strong acid process are required to report. In the case of saccharin, only manufacturers of the EPCRA Section 313 chemical are subject to the reporting requirements. A facility that only processes or otherwise uses either of these EPCRA Section 313 chemicals is not required to report for these EPCRA Section 313 chemicals. In both cases, supplier notification does not apply because only manufacturers, not users, of these two EPCRA Section 313 chemicals must report.

Ammonia (includes anhydrous ammonia and aqueous ammonia from water dissociable ammonium salts and other sources; 10 percent of total aqueous ammonia is reportable under this listing). The qualifier for ammonia means that anhydrous forms of ammonia are 100% reportable and aqueous forms are limited to 10% of total aqueous ammonia. Therefore when determining threshold and releases and other waste management quantities all anhydrous ammonia is included but only 10% of total aqueous ammonia is included. Any evaporation of ammonia from aqueous ammonia solutions is considered anhydrous ammonia and should be included in threshold determinations and release and other waste management calculations.

Sulfuric acid and Hydrochloric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size). The qualifier for sulfuric acid and hydrochloric acid means that the only forms of these chemicals that are reportable are airborne forms. Aqueous solutions are not covered by this listing but any aerosols generated from aqueous solutions are covered.

Nitrate compounds (water dissociable; reportable only when in aqueous solution). The qualifier for the nitrate compounds category limits the reporting to nitrate compounds that dissociate in water, generating nitrate ion. For the purposes of threshold determinations the entire weight of the nitrate compound must be included in all calculations. For the purposes of reporting releases and other waste management quantities only the weight of the nitrate ion should be included in the calculations of these quantities.

Phosphorus (yellow or white). The listing for phosphorus is qualified by the term “yellow or white.” This means that only manufacturing, processing, or otherwise use of phosphorus in the yellow or white chemical form triggers reporting. Conversely, manufacturing, processing, or otherwise use of “black” or “red” phosphorus does not trigger reporting. Supplier notification also applies only to distribution of yellow or white phosphorus.

Asbestos (friable). The listing for asbestos is qualified by the term “ friable,” referring to the physical characteristic of being able to be crumbled, pulverized, or reducible to a powder with hand pressure. Only manufacturing, processing, or otherwise use of asbestos in the friable form triggers reporting. Supplier notification applies only to distribution of mixtures or other trade name products containing friable asbestos.

Aluminum Oxide (fibrous forms). The listing for aluminum oxide is qualified by the term “fibrous forms.” Fibrous refers to a man-made form of aluminum oxide that is processed to produce strands or filaments which can be cut to various lengths depending on the application. Only manufacturing, processing, or otherwise use of aluminum oxide in the fibrous form triggers reporting. Supplier notification applies only to distribution of mixtures or other trade name products containing fibrous forms of aluminum oxide.

Table II. EPCRA Section 313 Chemical List for Reporting Year 2016

| Notes for Sections A and B of following list of TRI chemicals: |
|--|
| “Color Index” indicated by “C.I.” |
| * There are no <i>de minimis</i> levels for PBT chemicals, except for supplier notification purposes (see Appendix C). |

a. Individually-Listed Toxic Chemicals Arranged Alphabetically

| CAS Number | Chemical Name | De minimis % Limit |
|------------|---|--------------------|
| 71751-41-2 | Abamectin [Avermectin B1] | 1.0 |
| 30560-19-1 | Acephate (Acetylphosphoramidothioic acid O,S-dimethyl ester) | 1.0 |
| 75-07-0 | Acetaldehyde | 0.1 |
| 60-35-5 | Acetamide | 0.1 |
| 75-05-8 | Acetonitrile | 1.0 |

| 136013-79-1 | 1,3-Dichloro-1,1,2,3,3-pentafluoropropane (HCFC-225ea) | 1.0 |

specified, are defined as including any unique chemical substance that contains the named metal (e.g., antimony, nickel, etc.) as part of that chemical's structure.

EPCRA Section 313 chemical categories are subject to the 1% *de minimis* concentration unless the substance involved meets the definition of an OSHA carcinogen in which case the 0.1% *de minimis* concentration applies. The *de minimis* concentration for each category is provided in parentheses. The *de minimis* exemption is not available for PBT chemicals, therefore an asterisk appears where a *de minimis* limit would otherwise appear. However, for purposes of the supplier notification requirement only, such limits are provided in Appendix D.

N010 Antimony Compounds (1.0)

Includes any unique chemical substance that contains antimony as part of that chemical's infrastructure.

N020 Arsenic Compounds (inorganic compounds: 0.1; organic compounds: 1.0)

Includes any unique chemical substance that contains arsenic as part of that chemical's infrastructure.

N040 Barium Compounds (1.0)

Includes any unique chemical substance that contains barium as part of that chemical's infrastructure. This category does not include:

Barium sulfate CAS Number 7727-43-7

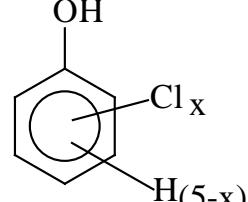

N050 Beryllium Compounds (0.1)

Includes any unique chemical substance that contains beryllium as part of that chemical's infrastructure.

N078 Cadmium Compounds (0.1)

Includes any unique chemical substance that contains cadmium as part of that chemical's infrastructure.

N084 Chlorophenols (0.1)

Where $x = 1$ to 5

c. Chemical Categories

Section 313 requires reporting on the EPCRA Section 313 chemical categories listed below, in addition to the specific EPCRA Section 313 chemicals listed above.

The metal compound categories listed below, unless otherwise

Table II. EPCRA Section 313 Chemical List for Reporting Year 2016

| | |
|---|---|
| N090 Chromium Compounds (except for chromite ore mined in the Transvaal Region of South Africa and the unreacted ore component of the chromite ore processing residue (COPR). COPR is the solid waste remaining after aqueous extraction of oxidized chromite ore that has been combined with soda ash and kiln roasted at approximately 2,000 °F.) (chromium VI compounds: 0.1; chromium III compounds: 1.0) <i>Includes any unique chemical substance that contains chromium as part of that chemical's infrastructure.</i> | N120 Diisocyanates (1.0) This category includes only those chemicals listed below. |
| | CAS Number Chemical Name |
| | 38661-72-2 1,3-Bis(methylisocyanate) - cyclohexane |
| | 10347-54-3 1,4-Bis(methylisocyanate)-cyclohexane |
| | 2556-36-7 1,4-Cyclohexane diisocyanate |
| | 134190-37-7 Diethyldiisocyanatobenzene |
| | 4128-73-8 4,4'-Diisocyanatodiphenyl ether |
| | 75790-87-3 2,4'-Diisocyanatodiphenyl sulfide |
| | 91-93-0 3,3'-Dimethoxybenzidine-4,4'-diisocyanate |
| | 91-97-4 3,3'-Dimethyl-4,4'-diphenylene diisocyanate |
| | 139-25-3 3,3'-Dimethyldiphenylmethane-4,4'-diisocyanate |
| | 822-06-0 Hexamethylene-1,6-diisocyanate |
| | 4098-71-9 Isophorone diisocyanate |
| | 75790-84-0 4-Methyldiphenylmethane-3,4-diisocyanate |
| | 5124-30-1 1,1-Methylenebis(4-isocyanatocyclohexane) |
| | 101-68-8 Methylenebis(phenylisocyanate) (MDI) |
| | 3173-72-6 1,5-Naphthalene diisocyanate |

Table II. EPCRA Section 313 Chemical List for Reporting Year 2016

| | |
|---|---|
| N583 Polychlorinated alkanes (C₁₀ to C₁₃) (1.0, except for those members of the category that have an average chain length of 12 carbons and contain an average chlorine content of 60% by weight which are subject to the 0.1% <i>de minimis</i>) <i>Includes those chemicals defined by the following formula:</i> $C_xH_{2x-y+2}Cl_y$ <p>Where x = 10 to 13; y = 3 to 12; and where the average chlorine content ranges from 40-70% with the limiting molecular formulas C₁₀H₁₉Cl₃ and C₁₃H₁₆Cl₁₂</p> | N725 Selenium Compounds (1.0) <i>Includes any unique chemical substance that contains selenium as part of that chemical's infrastructure.</i> |
| | N740 Silver Compounds (1.0) <i>Includes any unique chemical substance that contains silver as part of that chemical's infrastructure.</i> |
| | N746 Strychnine and salts (1.0) <i>Includes any unique chemical substance that contains strychnine or a strychnine salt as part of that chemical's infrastructure.</i> |
| | N760 Thallium Compounds (1.0) <i>Includes any unique chemical substance that contains thallium as part of that chemical's infrastructure.</i> |
| | N770 Vanadium compounds (1.0) <i>Includes any unique chemical substance that contains vanadium as part of that chemical's infrastructure.</i> |
| | N874 Warfarin and salts (1.0) <i>Includes any unique chemical substance that contains warfarin or a warfarin salt as part of that chemical's infrastructure.</i> |
| | N982 Zinc Compounds (1.0) <i>Includes any unique chemical substance that contains zinc as part of that chemical's infrastructure.</i> |

| CAS Number | Chemical Name |
|------------|---------------------------------|
| 56-55-3 | Benz(a)anthracene |
| 205-99-2 | Benzo(b)fluoranthene |
| 205-82-3 | Benzo(j)fluoranthene |
| 207-08-9 | Benzo(k)fluoranthene |
| 206-44-0 | Benzo(j,k)fluorene |
| 189-55-9 | Benzo(r,s,t)pentaphene |
| 218-01-9 | Benzo(a)phenanthrene |
| 50-32-8 | Benzo(a)pyrene |
| 226-36-8 | Dibenz(a,h)acridine |
| 224-42-0 | Dibenz(a,j)acridine |
| 53-70-3 | Dibenzo(a,h)anthracene |
| 194-59-2 | 7H-Dibenzo(c,g)carbazole |
| 5385-75-1 | Dibenzo(a,e)fluoranthene |
| 192-65-4 | Dibenzo(a,e)pyrene |
| 189-64-0 | Dibenzo(a,h)pyrene |
| 191-30-0 | Dibenzo(a,l)pyrene |
| 57-97-6 | 7,12-Dimethylbenz(a)-anthracene |
| 42397-64-8 | 1,6-Dinitropyrene |
| 42397-65-9 | 1,8-Dinitropyrene |
| 193-39-5 | Indeno(1,2,3-cd)pyrene |
| 56-49-5 | 3-Methylcholanthrene |
| 3697-24-3 | 5-Methylchrysene |
| 7496-02-8 | 6-Nitrochrysene |
| 5522-43-0 | 1-Nitropyrene |
| 57835-92-4 | 4-Nitropyrene |
