

Dan Villeneuve, Research Toxicologist in EPA's National Health and Environmental Effects Research Laboratory.

Mid-Continent Ecology Division
6201 Congdon Blvd
Duluth, MN, 55804

Villeneuve.dan@epa.gov

Area of Expertise: My research interest is focused on development and application of the adverse outcome pathway (AOP) framework to support use of alternative, mechanistically-based, data as a foundation for regulatory decision-making. I use systems biology approaches to understand the means through which chemicals interact with physiological pathways to cause reproductive and developmental toxicity in fish and other aquatic organisms.

(in press; doi: 10.1002/etc.2403).

Education:

- B.S., University of Wisconsin-Stevens Point, Stevens Point, WI, Biology and Water Resources, 1995
- Ph.D., Michigan State University, East Lansing, MI, Zoology-Environmental Toxicology, 2000

Professional Experience:

- Project Lead in Chemical Safety for Sustainability, Adverse Outcome Pathway Discovery and Development
- Associate Editor, Environmental Toxicology and Chemistry
- Expert Advisor, Organization for Economic Cooperation and Development (OECD), Extended Advisory Group on Molecular Screening and Toxicogenomics (EAGMST)
- US National Academy of Sciences and Kavli Foundation Kavli Fellow, 2014
- US EPA Bronze Medal, 2011 and 2012
- US EPA Scientific and Technological Achievement Awards, 5 level II, 12 level III, 5 honorable mention, 2007-2015.
