Current Activities

Removal operations continued under subcontract 3 for the transport and disposal (T&D) of hazardous waste. Bids for all remaining wastes listed under subcontract 4 were received on May 13, 2014. Personnel continued to prepare materials for removal as well as cut/crush drums and totes. Non-hazardous and hazardous debris are in the process of being segregated into identified areas.

The development of a comprehensive sampling plan also continued with focus on strategies for sampling ground water.

The EPA continued to work with numerous partners including the Gloucester County Fire Marshal's Office, HazMat Team, NJDEP, U.S. Fish and Wildlife Service, and local officials. NJDEP personnel continued weekly visitations. Security personnel continued to patrol the site during non-operational hours.

Response Actions to Date

To view removal actions completed during other operational periods, please contact Keith Glenn at 732-321-4454 or email: glenn.keith@epa.gov.

On May 13, 2014 quotes were received for T&D subcontract 4; the removal of all remaining containerized waste located on-site. A number of questions and concerns were generated based on the information provided by the vendors and

companies were given till May 15th to respond. Once received, quote sheets were re-evaluated and changed to represent more accurate costs.

During the operational period, personnel developed an area west of the building for drum crushing and container destruction activities. With the use of an excavator, the drums are being crushed and flattened for easier disposal. All steel totes are being cut prior to crushing for maximizing future disposal space.

On May 13th a subcontract was approved for the disposal of non-hazardous waste and debris, to include personal protective equipment and soiled pallets. The facility is currently being reviewed through the off-site rule process.

On May 15, 2014 a total of 18 containers were transported off-site to an approved disposal facility. The waste, consisting of TCE contaminated liquids and acidic, oxidizing liquids, represents approximately 1,725 gallons of material removed.

During the weekly meeting with the NJDEP case manager, it was requested to determine if the state maintains a program for proper T&D of tires. Approximately 50 tires are located on-site and should be removed for health and safety reasons. NJDEP is reviewing options available.

RST continued to provide air monitoring to ensure the safety of personnel and surrounding properties. Additionally, RST continued to manage the SCRIBE and Response Manager databases.

Planned Response Activities

Collaboration between the EPA, NJDEP, FWS, County, and local officials will continue throughout the removal activities of the Superior Barrel and Drum Site.

ERRS will continue to stage and prepare containers identified for removal under T&D subcontract 3. These containers will be removed in the following operational period. Additionally, all empty containers will be cut or crushed in preparation for disposal. Local metal recycling companies will be contacted to determine options for removal of non-contaminated metal.

The T&D of all remaining containerized waste will be approved by the contracting officer and awarded to a vendor. Profile sheets will be generated and potential disposal facilities will be reviewed through the off-site rule process. This is the last subcontract for T&D of containerized wastes. Removal of wastes under T&D subcontract 4 will commence on or around May 27th.

The sampling design for ground water and additional soil samples will continue to be developed. RST personnel will continue perimeter air monitoring.

Issues

Severe weather hit the Glassboro, NJ area on May 16th causing significant rainfall, thunderstorms and localized flooding. As a result, site operations were reduced.
