VOC = Volatile Organic Compound

GW = Ground Water

DUP = Duplicate Sample

CA = Cedarville Aquifer

µg/L = micrograms per liter

See Table 5 in the Third Quarter 2006 Progress Report for definitions of data qualifiers.

TABLE 5: List of Data Qualifiers

| Severn Trent Laboratory Qualification Flags |     | Severn Trent Laboratory Qualification Flag Description                                                                 |
|---------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------------|
| General Chemistry                           | B   | Estimated result. Result is less than the reporting limit.                                                             |
|                                             | G   | Interference                                                                                                           |
|                                             | J   | Target analyte at a reportable level                                                                                   |
| Metals                                      | *   | Relative percent difference (RPD) is outside stated control limits                                                     |
|                                             | B   | Estimated result. Result is less than the reporting limit.                                                             |
|                                             | J   | Target analyte at a reportable level                                                                                   |
|                                             | MSB | The recovery and RPD were not calculated because the sample amount was greater than four times the spike amount.       |
|                                             | E   | Matrix interference                                                                                                    |
|                                             | L   | Serial dilution of a digestate in the analytical batch indicates that physical and chemical interferences are present. |
|                                             | N   | Spiked analyte recovery is outside stated control limits                                                               |
|                                             | A   | Spiked analyte recovery is outside stated control limits                                                               |
| PAHs                                        | B   | Target analyte at a reportable level                                                                                   |
|                                             | DIL | Presence of interfering analytes                                                                                       |
|                                             | J   | Estimated results. Result is less than that reporting limit.                                                           |
|                                             | P   | The percent difference between the original and confirmation analyses is greater than 25%.                             |
|                                             | PF  | The percent difference between the original and confirmation analyses is greater than 50%.                             |
|                                             | G   | Interference                                                                                                           |
|                                             | PG  | The percent difference between the original and confirmation analyses is greater than 40%.                             |
|                                             | L   | Serial dilution of a digestate in the analytical batch indicates that physical and chemical interferences are present. |
| PCBs                                        | A   | Spiked analyte recovery is outside stated control limits                                                               |
|                                             | P   | The percent difference between the original and confirmation analyses is greater than 25%.                             |
| Pesticides                                  | A   | Spiked analyte recovery is outside stated control limits                                                               |
|                                             | P   | The percent difference between the original and confirmation analyses is greater than 25%.                             |
|                                             | PG  | The percent difference between the original and confirmation analyses is greater than 40%.                             |
| SVOCs                                       | A   | Spiked analyte recovery is outside stated control limits                                                               |
|                                             | P   | The percent difference between the original and confirmation analyses is greater than 25%.                             |
|                                             | B   | Target analyte at a reportable level                                                                                   |
|                                             | E   | Estimated result. Result concentration exceeds the calibration range.                                                  |
| VOCs                                        | J   | Estimated results. Result is less than that reporting limit.                                                           |
|                                             | A   | Spiked analyte recovery is outside stated control limits                                                               |
|                                             | P   | The percent difference between the original and confirmation analyses is greater than 25%.                             |
|                                             | B   | Target analyte at a reportable level                                                                                   |
|                                             | E   | Estimated result. Result concentration exceeds the calibration range.                                                  |
|                                             | J   | Estimated results. Result is less than that reporting limit.                                                           |

| Payne Firm Qualification Flags | Payne Firm Qualification Flag Description                                                                                                                                                                                                                             |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| j                              | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.                                                                                                                                    |
| j-                             | The result is an estimated quantity, but the result may be biased low.                                                                                                                                                                                                |
| j+                             | The result is an estimated quantity, but the result may be biased high.                                                                                                                                                                                               |
| n                              | The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."                                                                                                                                       |
| nj                             | The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.                                                                                                 |
| r                              | The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.                                                                        |
| u                              | The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.                                                                                                                                                         |
| uj                             | The analyte was not detected above the reporting sample quantitation limit. However, the reported quantitation limit is approx and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample. |
