SWANAPalooza 2017

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Outline

- Advancing Sustainable Materials Management: Facts and Figures Report
  - Overview and updates
  - Key Data and trends
  - Conclusions/Next Steps

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Facts & Figures

- Highlights for 2014 report:
  - Replaced recovery and disposal with generation, recycling, combustion and landfilling.
  - New methodology updates for electronics and construction and demolition debris (C&D).

 **Rethink**

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Methodology

## Scope

- Municipal solid waste, or trash
- Includes packaging, food, yard trimmings, furniture, electronics, tires, and appliances

## Sources of MSW

- Residential waste
- Institutions such as schools, hospitals, and prisons and commercial sources such as restaurants, office buildings, and retail establishments

## Materials Flow Approach

- Based on national data, which characterizes waste stream of the nation as a whole
- A top-down approach (not a state-by-state or facility-by-facility approach)

## Sources of Data

- Industry associations
- Government data sources such as the Department of Commerce and the U.S. Census Bureau
- Other sources of data such as state websites.

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Key Data (Generation)

- 258 million tons of MSW generated
  - 4.44 pounds per person, per day
  - Increase of 3 million tons (0.02 pounds per day)
- 38.4 million tons of wasted food generated
  - 241 pounds per person per year
  - Increase of 7 pounds per year
  - Composting rose 100,000 tons (0.1%)
- Other generation numbers
  - Yard trimmings
  - Paper
  - Plastics

 Rethink

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

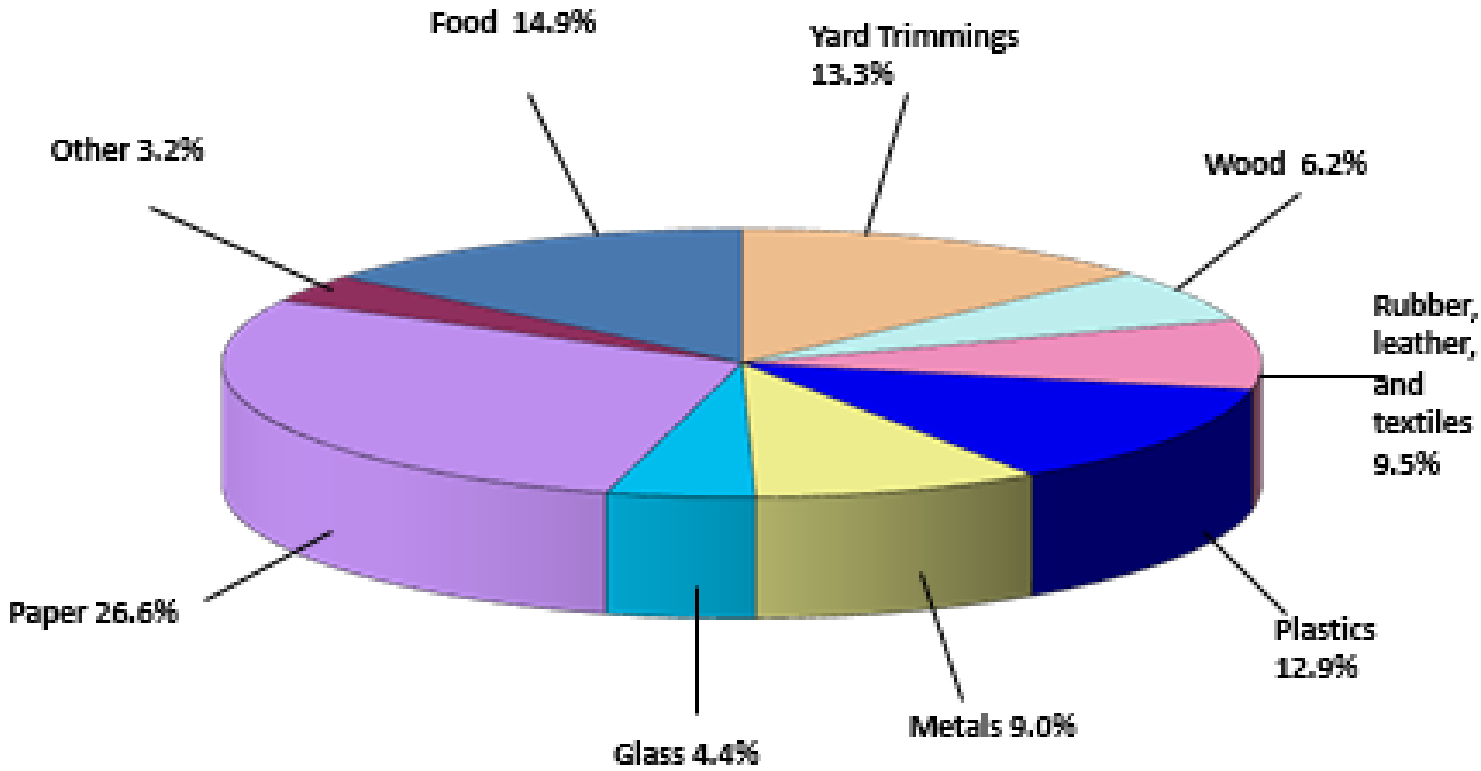

# Key Data (Management)

- 34.6 % recycled
  - Includes both recycling and composting
  - 89 million tons
- 12.8% combusted (with energy recovery)
  - 33 million tons
- 52.6% landfilled
  - 136 million tons

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Municipal Solid Waste Generation in 2014 258.5 Million Tons (before recycling)

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# MSW Generation Rates, 1960 to 2014

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# MSW Recycling Rates, 1960 to 2014

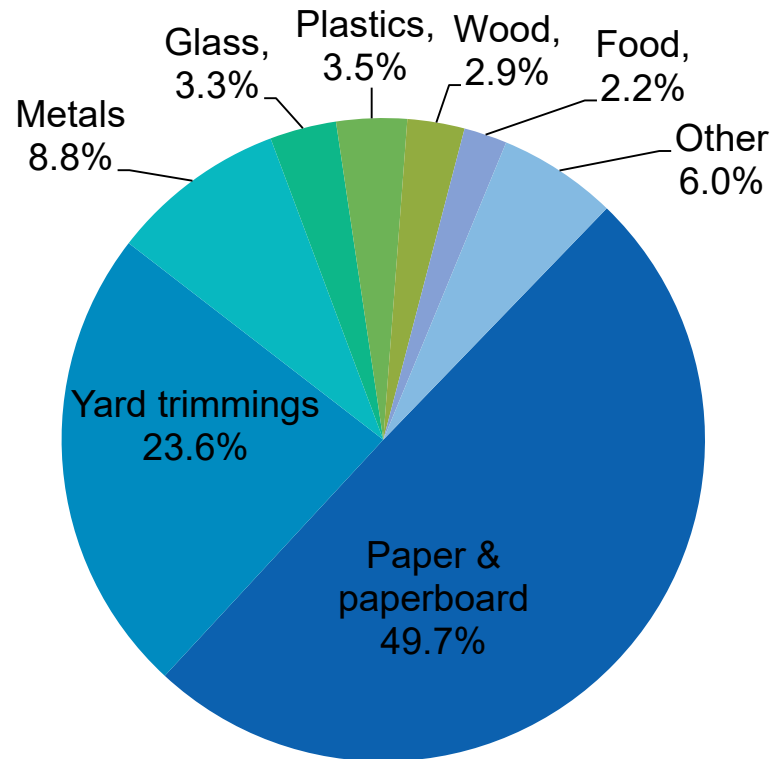

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# MSW Facts and Figures in the U.S. Key Data (Management)

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

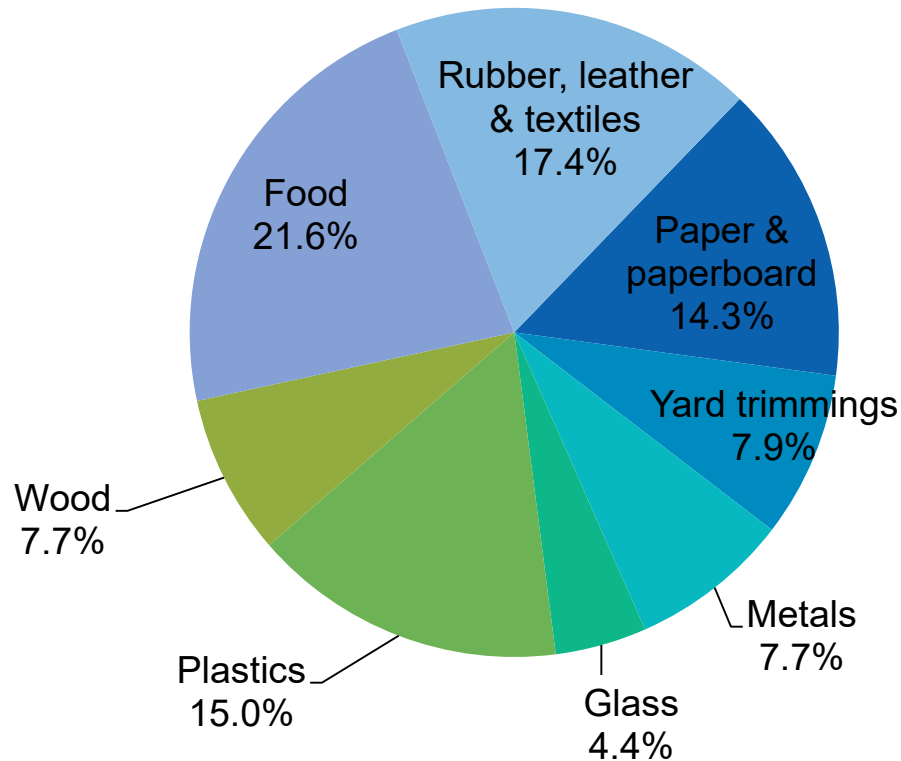

# Total MSW Recycling and Composting (by material) 89 million tons

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Total MSW Combusted with Energy Recovery (by material)

33 Million Tons (after recycling and composting)

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Total MSW Landfilled (by material)

136 Million Tons (after recycling, composting, and combustion with energy recovery)

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Food

## Generation

- 38.4 million tons in 2014, up from 37.1 million tons in 2013.

## Composting

- 1.9 million tons, up from 1.8 million tons of food and other organic materials composted in 2013
- Composting rate of 5.1%, up from 5.0% in 2013

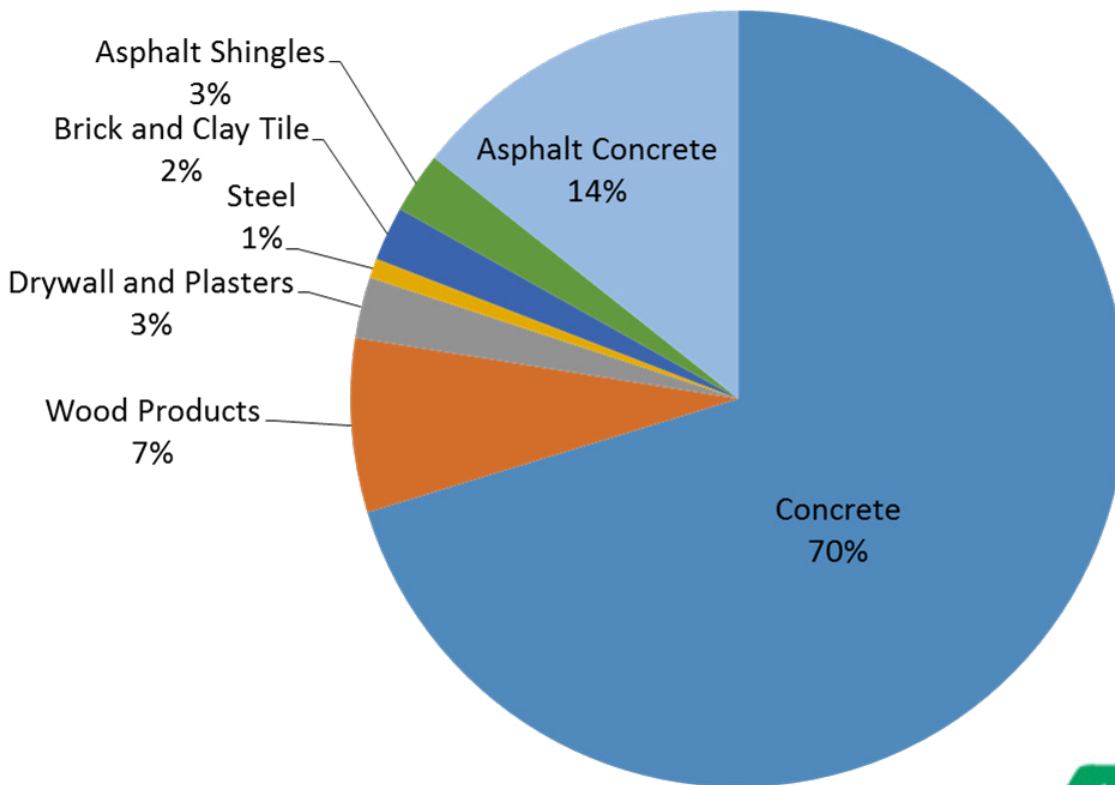

## Landfilling

- 21.6% of MSW landfilled was food

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# C&D Generation Composition by Material, 2014 (534 Million Tons Before Recycling)

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# C&D Debris Generation by Source (Million Tons)

	Buildings	Roads and Bridges	Other
	2014	2014	2014
Concrete	84.8	157.4	133.1
Wood Products	37.3		1.4
Drywall and Plasters	13.6		
Steel	4.4		
Brick and Clay Tile	12.0		
Asphalt Shingles	13.5		
Asphalt Concrete		76.6	
<b>Total</b>	<b>165.6</b>	<b>234.0</b>	<b>134.5</b>

CHANGING HOW WE THINK ABOUT OUR RESOURCES FOR A BETTER TOMORROW

# Conclusions

- EPA is thinking beyond waste by employing a systemic approach to reduce materials use and their associated environmental impacts.
- Data on MSW generation, recycling, composting, combustion with energy recovery and landfilling is an important starting point to implement the SMM approach.
- We continue look for ways to improve our data collection efforts and collaborate with our stakeholders in this process.
