## VIII. Monitoring Plan

The Kohala Center will seek additional funding to track and document actions taken by agricultural and health industry stakeholders, agricultural and educational administrators as well as county and state legislators that support HIA recommendations. This would determine:

- What policies have changed/been enacted?
- How have activities and policies increased production and purchase of local food at the commercial, home, and institutional levels?
- What evidence is there for changes in individual, family, and community health as a result of HIA recommended actions?
