“Fugitive emissions” means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening. Those emissions are those that, according to customary and good engineering practice, considering technological and economic feasibility, could not pass through a stack, chimney, vent or other functionally-equivalent opening, except that the Department will utilize the definition of fugitive emissions for those industries for which an approved EPA definition exist under federal law or regulation and which are meeting that law or regulation.

“Modification” means any physical change in, or change in the method of operation of, a stationary source which increases the emission rate of any federally regulated air pollutant over permitted rates or which results in the emission of a federally regulated air pollutant not previously emitted, except that:

- (1) Routine maintenance, repair, and replacement shall not be considered a physical change, and
- (2) The following shall not be considered a change in the method of operation:
 - (a) Any change in the production rate, if such change does not exceed the permitted operating capacity of the source;
 - (b) Any change in the hours of operation, as long as it does not violate applicable air permit conditions; or
 - (c) The use of an alternate fuel or raw material, as long as it does not violate applicable air permit conditions.

“Particulate matter” means any airborne finely divided solid or liquid material with an aerodynamic diameter equal to or less than 100 micrometers.

“Particulate matter emissions” means all particulate matter, other than uncombined water, emitted to the ambient air as measured by applicable reference methods, or an equivalent or alternate method, specified in 40 CFR Part 60 Appendix A or by a test method specified in these regulations or any supplement thereto.

Any physical or operational limitation on the capacity of the source to emit a federally regulated air pollutant, including, but not, limited to, air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is enforceable to the extent it is regulated by the federal Clean Air Act, 42 U.S.C. §§ 7401 et seq. Secondary air emissions do not count in determining the potential to emit of a stationary source.

“Responsible official” means one of the following:

- (1) For a corporation: a president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a
