

The Water Infrastructure Finance and Innovation Act (WIFIA) program accelerates investment in our nation's water infrastructure by providing long-term, low-cost supplemental loans for regionally and nationally significant projects.

INDIANA WATER AND WASTEWATER INFRASTRUCTURE PROJECTS

BORROWER: Indiana Finance Authority LOCATION: Statewide WIFIA LOAN AMOUNTS: \$436 million TOTAL WIFIA PROJECT COSTS: \$890 million POPULATION SERVED BY PROJECTS: 1.2 million NUMBER OF JOBS CREATED: 3,034 jobs

PROJECT DESCRIPTION

By providing a loan to the Indiana Finance Authority, the WIFIA program will help finance 23 wastewater and drinking water projects. The projects will serve over 1.2 million people in both Indianapolis and small and medium Indiana communities facing challenges with adequate and reliable water infrastructure. Drinking water projects include improvements to water treatment plants, storage tanks, distribution system components, wells, pump stations, and resiliency features, as well as water conservation measures. Wastewater projects include improvements and increased capacity to wastewater treatment plants, tunnels to capture combined sewer overflows, and collection systems.

PROJECT BENEFITS

- Supports a diversity of projects across the state including 13 small projects (\$10 million or less) and projects in urban, rural, and economically distressed areas
- Results in significant environmental benefits including discharge compliance, combined sewer overflow reductions, failing septic tank elimination, potable water volume increases, and nutrient reduction
- Saves Indiana Finance Authority \$20 million in interest by financing the projects with a WIFIA loan compared to a bond issuance
