

STATE OF ARKANSAS ASA HUTCHINSON GOVERNOR

January 24, 2017

Mr. Ron Curry Regional Administrator U.S. Environmental Protection Agency, Region VI 1445 Ross Avenue, Suite 1200 Dallas, Texas 75202-2733

Re:

Submissions of Sulfur Dioxide (SO₂) National Ambient Air Quality Standard (NAAQS) Area Attainment Designation Recommendation for Counties in the State of Arkansas.

Dear Mr. Curry:

Section 107(d)(1) of the Federal Clean Air Act requires state governors to recommend attainment status designations after the promulgation of any new or revised NAAQS. On June 2, 2010, the federal Environmental Protection Agency (EPA) promulgated a new primary 1-hour NAAQS for SO_2 at 75 ppb for the 3-year average of the 99^{th} percentiles of the maximum daily values per calendar year.

As reflected in the State's letter dated March 22, 2011, all monitored counties in Arkansas are then and now attaining the existing primary and secondary SO₂ standards. However, as part of the implementation of the new 1-hour SO₂ NAAQS, EPA has begun requiring, in addition to monitoring data, the use of dispersion modeling for areas with facilities emitting SO₂ in quantities greater than the threshold set by the EPA.

For Round 3, the current round of designations, two counties in Arkansas (Benton and Mississippi) are subject to this requirement because they include facilities with SO₂ emissions greater than the EPA-determined threshold for review. Benton and Mississippi counties are in compliance with the 2010 SO₂ NAAQS based on modeling analyses conducted by or for the Arkansas Department of Environmental Quality (ADEQ). Copies of the two Modeling Reports as well as two complete archives of AERMOD-associated modeling files are enclosed. As a result, Arkansas recommends that the two counties (Benton and Mississippi) be designated "unclassifiable/attainment".

Based on a Round 2 follow-up modeling demonstration involving both Entergy Arkansas Inc.'s Independence Steam Electrical Station and FutureFuel Chemical Company resulting from EPA's June 30, 2016 designation of Independence County as "Unclassifiable" based on "insufficient information", Arkansas also recommends that Independence County be designated "unclassifiable/attainment". A copy of the combined simulation Modeling Report and a complete archive of AERMOD-associated modeling files are enclosed.

In addition, the two counties with existing monitor sites, Pulaski and Union, continue to maintain the standard and should be designated as in "attainment". Jefferson County was already designated as "unclassifiable/attainment" by the EPA in Round 2. All other counties in Arkansas should be designated "unclassifiable."

For further information regarding these recommendations, please contact Stuart Spencer, Associate Director for the Office of Air Quality, Arkansas Department of Environmental Quality, by phone at 501-682-0750 or email at SPENCER@adeq.state.ar.us.

Sincerely

Asa Hutchinson

attachment: Table of Arkansas County Designation Recommendations

enclosures:

1) SO₂ Air Dispersion Modeling Report and a complete archive of AERMODassociated modeling files for Southwestern Electric Power Company d/b/a Flint Creek Power Plant

2) SO₂ Air Dispersion Modeling Report and a complete archive of AERMOD-associated modeling files for Plum Point Services Company, LLC

3) SO₂ Air Dispersion Modeling Report and a complete archive of AERMOD-associated modeling files for a combined simulation for Entergy Arkansas Inc.'s Independence Steam Electric Station and FutureFuel Chemical Company
