PERMIT CONDITIONS

PERMIT NO.: 14-309-010A

COMPANY: Corning Asahi Video Products

3. If at any time the permittee causes, permits or allows any modification (as that term is defined in Chapter 121 of Title 25, the Rules and Regulations of the Department of Environmental Resources) of the aforementioned air contamination source(s), the operation and use of which is authorized by this permit, or causes, permits or allows any modifications, malfunction or removal of any air pollution control device required as a condition of this permit, then and in that event, this permit shall be suspended, and the permittee shall not thereafter continue to operate or use said air contamination source(s).
4. The aforementioned source(s) may be operated and used only so long as any associated air pollution control devices are operated and maintained in accordance with the specifications set forth in the respective plan approval(s), and the application(s) submitted for said plan approval(s) (as approved by the Department), and in accordance with any conditions set forth herein.
5. This operating permit supersedes all previously issued operating permits and temporary operating permits bearing the number(s) 14-309-010 and 14-309-010A.
- ~~6. The operation of this furnace shall not at any time result in the emission of particulate matter in excess of the limitations specified in Section 123.13, visible air contaminants in excess of the limitations specified in Section 123.41 or sulfur oxides in excess of the limitations specified in Section 123.21, all Sections of Chapter 123 of Article III of the Rules and Regulations of the Department of Environmental Resources, or in the emission of these or any other type of air contaminant in excess of the limitations specified in, or established pursuant to, any other applicable rule or regulation contained in Article III of the Rules and Regulations of the Department of Environmental Resources.~~
- ~~7. There shall be no additions of arsenic to Tank 221 unless approved by the Department.~~
8. The company shall maintain and operate continuous nitrogen oxides emission and exhaust gas flow monitoring systems on Tank 221 in accordance with all applicable requirements specified in Chapter 139 of Article III of the Rules and Regulations of the Department of Environmental Resources and the Department's "Continuous Source Monitoring Manual". This includes the performance of an acceptable System Performance/Relative Accuracy Test Audit on each monitoring system at least once every year (but no less than 6 months after the previous such audit).
