

# TRAINING

## CREATING & POSTING A NEWS RELEASE IN EPA'S WEB CMS

### Drupal WebCMS (DWCMS)

[Log in](#) [Logon Help](#)

**Username (Required)**  
  
Enter your EPA LAN ID

**Password (Required)**  
  
Enter your EPA LAN password

[Log in](#)

**WARNING NO**  
You are accessin

1. this compute
2. this compute
3. all computers
4. all devices an  
network.

# This training is for...

- Anyone who will *publish* a news release.
- This generally includes:
  - HQ press officers in OPA
  - Regional Public Affairs Directors and staff
  - Contractors who post news releases under the direction of EPA staff.
- New users may receive access with approval of OPA or their regional PAD.

# This training will cover:

How to post an EPA news release online, including:

- Basic info you need to know first.
- Logging in.
- Creating a draft news release.
- Publishing the draft news release.
- Finding the published news release.
- Making edits and re-publishing a news release.
- Where to get help or how-tos.

# This training won't cover:

- the policy, process, or authority to develop or issue a news release.
- the content or purpose of a news release.

EPA news releases are generally managed in the Office of Public Affairs, Office of the Administrator.

The Public Affairs Director (PAD) oversees news releases for that EPA region.

# What is a “news release”?

The general audience for news releases is reporters.

Example of EPA news release types are:

- A press release
- A news brief
- A media alert, media advisory
- A statement or desk statement.

All these types use the same “News Release” form. The point is: there is only one online form you will use.

# This training assumes...

... you use Word, maybe email, to develop a news release, including writing, review and approval, adding hotlinks, etc.

... you know little or nothing about HTML, EPA's Web Content Management System or "CMS", or other web things.

NOTE: If you are already familiar with EPA's Web CMS, you will have a small learning curve. HOWEVER, publishing a news releases requires a couple of unusual steps you need to know.

# A news release needs...

Headline (max 255 characters)

Release Date

Body

Subject

Press Office (Region #, or AA-ship if HQ)

Press Officer (name, email, phone)

**NEW:** Certain tags and metadata settings, depending.

**OPTIONAL BUT AVAILABLE TO YOU:**

Secondary Headline

Geographic Area or Location – *this is NOT EPA Region.*

# Now we use a **browser**.

- **Use Chrome for the news releases site.**  
Firefox is OK too if you already have it.
- You should not depend on *Internet Explorer* (IE) to create and publish news releases. IE is unpredictable in Web CMS.
- Contact your help desk to get Chrome installed. OEI has a specific waiver for installing Chrome for this purpose.  
More info: [intranet.epa.gov/newsreleases](http://intranet.epa.gov/newsreleases)

# Technical note

- What you're actually doing is **creating a web page in EPA's "News Releases" web area.**
- This isn't too different from creating a news release in Notes, but there are improvements.
- Due to time, *this* training will deliberately skip many details about EPA's Web CMS.  
More about Web CMS at [epa.gov/webguide](http://epa.gov/webguide)

# Just so you know...

- Your news releases will be in the system **along with everyone else's**.
- You (or your region) don't have your own separate set of news releases.
- You can however, use the ***Dashboard*** to narrow the list to yours. More on this later.

# Web CMS Terminology

**PLEASE READ THIS – this is important for using Web CMS.**

- **Web CMS** = EPA's web content management system.
- **Draft** = the first version of a new news release that you first create and **save**.
- **Publish** = to go live, online so the public can see it. The news release doesn't go live until you *publish*. *Saving is not publishing*.
- **Unpublish** = to take it offline. This doesn't delete the revision inside Web CMS.
- **Revision** = subsequent versions of the published version, after you make edits. If you edit a published version, those edits don't automatically appear online. You must publish a revision to make it live.
- **Republish** = if you make changes, you must republish. Your changes will not automatically appear online.

# Remote Log-In

- You should be able to log in remotely (like, from home) to the Web CMS.
- It should be accessible once you log-in and you can access the EPA Intranet in your browser.
- Contact your usual help desk for remote log-in or telework stuff.

# LOGGING IN

LOGIN:

**<https://wcms.epa.gov/user>**

CREATE:

**<https://wcms.epa.gov/newsreleases/create-content>**

There will be a link to these URLs at the end of this training.

# Logging in

- Go to <https://wcms.epa.gov/user>
- Log in with your user ID and password.

### WARNING NOTICE

You are accessing a U.S. Government information system, which includes

1. this computer,
2. this computer network,
3. all computers connected to this network, and
4. all devices and storage media attached to this network or to a computer on this network.

This information system is provided for U.S. Government-authorized use only. Unauthorized or improper use of this system may result in disciplinary action, as well as civil and criminal penalties. By using this information system you understand and consent to the following:

- You have no reasonable expectation of privacy regarding any communications or data transiting or stored on this information system.

# After you log in...

- To create NEW news release, go to <https://wcms.epa.gov/newsreleases/create-content>
- To find a DRAFT or PUBLISHED news release, go to <https://wcms.epa.gov/newsreleases/dashboard>

NOTE - You'll probably need to:

- bookmark these links, or
- memorize these links, or
- get them on page **[intranet.epa.gov/newsreleases](https://www.intranet.epa.gov/newsreleases)**

# IF YOU ARE AN EXPERIENCED EPA Web CMS USER

IMPORTANT – unlike other web areas you may be used to, News Releases has no “home page” where you go to click to create content or go to the dashboard.

That is why we ask (on the previous slide) to use the direct links.

If you might have a better solution for how this functions, please let us know. *We'd love to have your help* to make this as easy as possible for everyone.

# On the “Create Content” page

- Click “News Release” content type.

*Do not use Basic page, Document, or any other type.*

## Create Content for *News Releases*

View Edit Group Dashboard **Create Content** Workflow Panelizer

- [Basic page](#)
- [Document](#)
- [Event](#)
- [News Release](#)
- [Regulation](#)
- [Webform](#)

- *HINT: bookmark this page for faster access to creating a new news release.*

# THE FORM.

- This is where you type or paste in your news release content.

Home

## Create News Release

**Headline \***

**Secondary Headline**

**WFR AREA \***

## TYPE OR PASTE IN THE HEADLINE.

Secondary Headline: Optional.

You may type or paste. It's a text-only field.

### NOTE

- Headlines are automatically set. You can't change font size or type.
- Headline limit: 255 characters. If exceeded, Web CMS will just cut off the text. There's no way around this.
- **IMPORTANT: Don't change settings in the web area box.** They are used by the Web CMS to put your news release in this web area.

The image shows a screenshot of a web form titled "Create News Release". The form has a light gray header bar with the title. Below the header, there are two text input fields. The first field is labeled "Headline" and the second is labeled "Secondary Headline". Both fields are empty and have a white background with a thin gray border. Red arrows point to the right side of each input field, indicating that text can be pasted or typed into them.

# **FYI: Most of the headline you enter will become the URL for the news release.**

page title = URL, except small words.

## EXAMPLE:

If you use this headline...

**EPA Releases the First of Four Preliminary Risk Assessments for Insecticides Potentially Harmful to Bees**

...then the URL will be something like:

**epa.gov/newsreleases/epa-releases-first-four-preliminary-risk-assessments-insecticides-potentially-harmful**

The URL will cut off at 100 characters including “news releases.” Just so you know.

## ENTER THE DATE

The **Release Date** will automatically appear as today's date.

You can keep it, or change it to any date.

**RELEASE DATE \***

**Date**

07/20/2015

E.g., 07/20/2015

A red arrow points from the right side of the form towards the date input field, which contains the text '07/20/2015'. The arrow is positioned to the right of the input field and points left towards its center.

# NOTE ABOUT THE DATE

RELEASE DATE \*

Date

07/20/2015

E.g., 07/20/2015

A red arrow points to the date input field.

## THIS DATE IS:

- It is the date used for chronology, and the search function.
- It is text only. It won't change if you edit and re-publish.

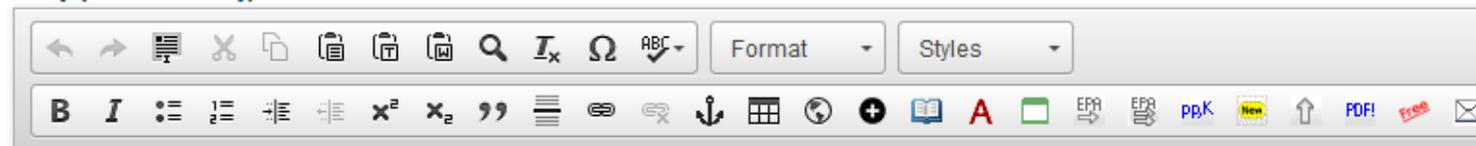

## THIS DATE IS NOT:

- It's not a timer to automatically publish later.
- It's not the physical publish date (in page footer).

# ADD THE BODY

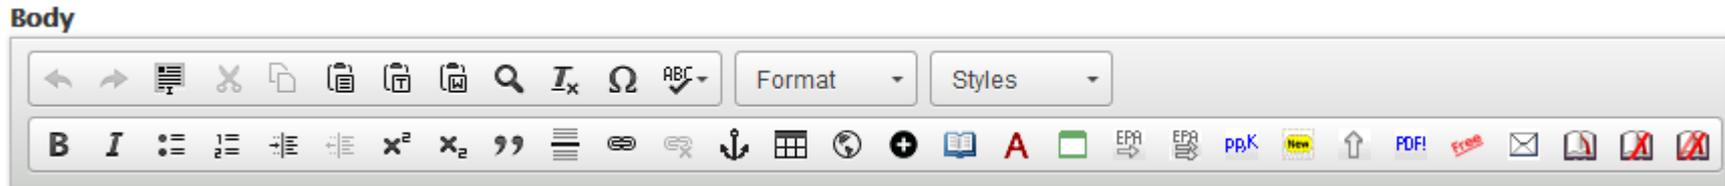

- Type or paste the news release from Word into the large "Body" field.
- Keep to plain text as much as possible.
- Just paste, e.g. Ctrl-V. Don't use the "clipboard" buttons.

Body (Edit summary)

click anywhere in here to type or paste

# About formatting

- The body section includes edit tools for text style, bold, italics, super/sub scripts, links, table insert, or other things.
- You should use these very sparingly. Suggest you format your news release in Word, then paste into Web CMS.

# Wait! Are you missing the edit bars?

- If you are using **IE** and you don't see the two edit bars, **STOP. You should not use IE for news releases.**
- **THE FIX:** ask the help desk to install Chrome on your computer or use Firefox if you have it.

More information about browser type is at

<http://intranet.epa.gov/newsreleases>

# Got Multimedia?

- The body of the news release is where you can add special features like photos, sound bites, or embed a video. This is optional and up to the discretion of your news director.
- If you have A LOT of special features or info, consider creating a “media kit” – a separate, non-news-release page.
- Remember – you will ALSO need to add a link in your VOCUS email back to the news release page.
- Find out more about all this stuff on the **News Releases support site** ([intranet.epa.gov/newsreleases](http://intranet.epa.gov/newsreleases))

# The RICH TEXT Button (link)

- You can **IGNORE** the link of “Disable rich text.”
- *What it is:* This is to let you make certain, *limited* adjustments to the existing HTML code. But you can’t change styles or add scripts. Web CMS will automatically delete disallowed code you try to add.

# LET'S TALK ABOUT: Hotlinks

- If you added hotlinks to your news release in Word, you shouldn't have to do anything more. Hotlinks in your Word document should paste successfully into the body field.
- You can manually add hotlinks if you need to – covered next.
- **NOTE - You can't click a link to test it while in edit mode.** You can test it after you save as **draft**, before you publish.

Read more about this: <http://www.epa.gov>

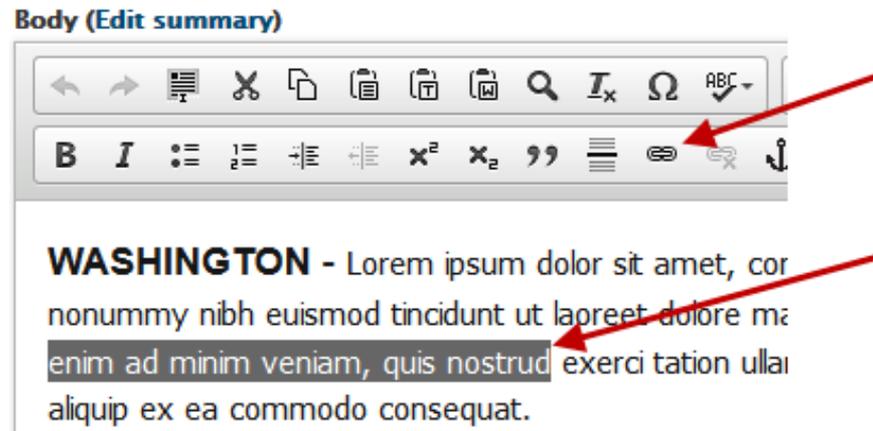

## IF YOU *DO* NEED TO MANUALLY ADD A HOTLINK, HERE'S ONE WAY:

- First COPY the URL of the Web page you want to link to, so you have it ready to paste.

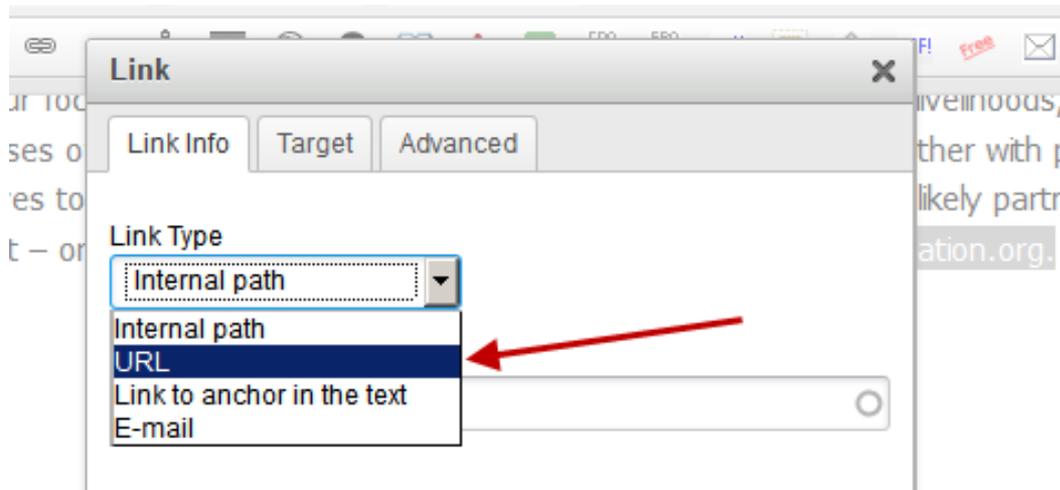

Example: [http://www.epa.gov/mercury/mgmt\\_options.html](http://www.epa.gov/mercury/mgmt_options.html)

- In your news release, select (block) the characters to be hotlinked.
- Click the **chain** "link" icon in the edit bar.

## (manually adding a hotlink)

Change the Link Type to **URL**. This is important.

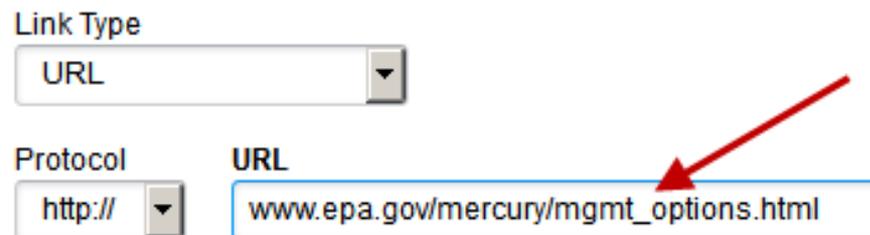

(There are other ways to make links in Web CMS. You can use those, too, if you know how. See also <https://www.epa.gov/drupaltraining/linking-content-drupal-webcms>)

## (manually adding a hotlink)

PASTE the URL into the URL field. The **http://** part of your URL might disappear. *It's OK, it's supposed to.*

Do not change “Protocol.”

Click the **OK** button (not shown).

Link Type  
URL

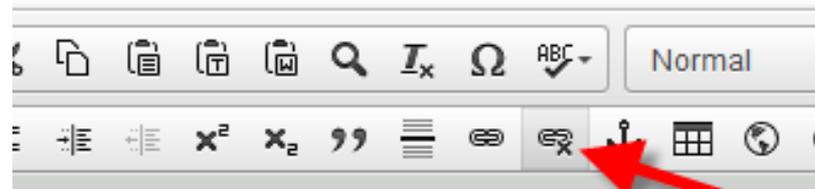

Protocol  
http://

URL  
www.epa.gov/mercury/mgmt\_options.html

**Done.**

# Delete an existing link (unlink)

- Block the text to unlink.
- Click on the link icon with the “X”
- This will unlink the selected text.

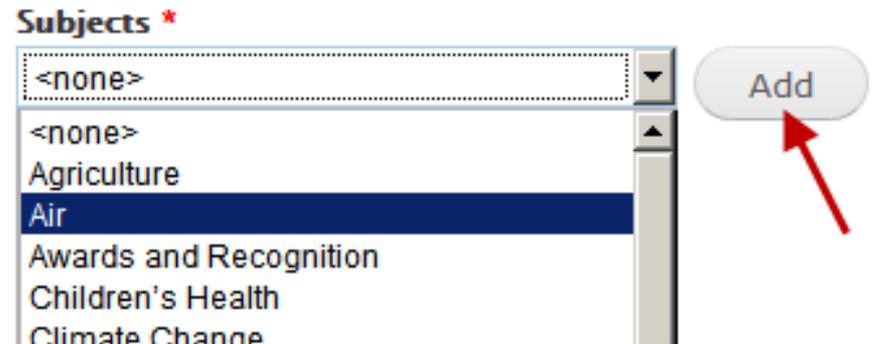

ON - Lorem ipsum dolor sit amet, mel ex idque  
pri, et quando gubergren eam. Qui ex legere la

s reprehendunt, epicuri eligendi mea eu. Dolor  
illit primis sit. Vis lucilius consulatu gubergren ci

Now back to creating  
your news release...

# Add the Subject

Pull down the **Subjects** picker and stop on the subject you want.

Then click the Add button. ***You must click “Add”***  
*or it won't insert the Subject. This trips up a lot of people.*

**To add multiple Subjects:** pull the picker down again, select the next subject, and click Add again.

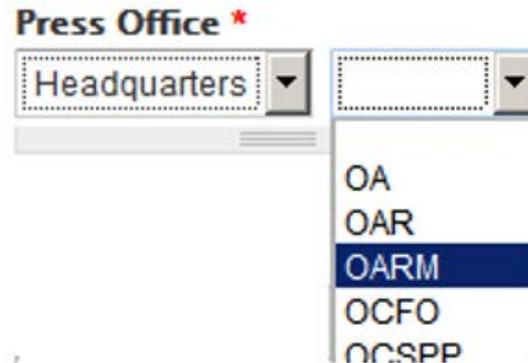

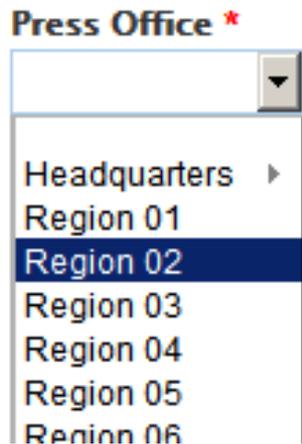

**To remove a Subject:** click the “Remove” word.

# Choose Press Office

Click the Press Office Picker. If you choose Headquarters, a list of the AA-ships will appear to choose from.

Click the Add button. You must click “Add” to insert the Press Office into the list.

Yes, you can add more than one.

# Add the press officer contact info.

Note – format the phone number how you want it, like (222) 456-7890, 222-456-7890, etc.

To add another phone number for **THIS** press officer:

- Click "Add another item" under the first phone.

To add another press officer:

- Click "Add another item" underneath the previous Press Officers box.

The screenshot shows a form titled "PRESS OFFICERS" with a red asterisk. It contains the following fields and controls:

- Name:** A text input field containing "Joe Blow".
- Email:** A text input field containing "blow.joe@epa.gov".
- PHONE NUMBER(S):** A section header with a plus sign icon to its left. Below it is a text input field containing "202-123-1234".
- Buttons:** Below the phone number field are two buttons: "Add another item" and "Remove".
- Global Button:** At the bottom of the form is a button labeled "Add another item".

(Yes, we've asked them to clarify the buttons to be "Add another phone number" and "Add another press officer.")

# Description, Keywords are Automatic

We made it so these two fields are filled in automatically, to help your work go faster.

- **Description** - populates from the news release title.
- **Keywords** - populates from the subject(s) you select.

You have the *option* to edit Description and Keywords. But you don't have to.

*How are Description and Keywords used?* They are used by the EPA Web, also search engines to identify and sort web pages. They are embedded in the HTML code of the web page and do not appear on the news release page.

Generate automatic description

Uncheck this to create a custom description below.

## Description

EPA News Release: EPA's Energy Star Battle of the Buildings  
Million, Prevents 250,000 Metric Tons of GHG Emissions/ The  
all 50 states, the District of Columbia, and Puerto Rico

Content limited to 256 characters, remaining: **19**

Do not restate the title; add context to it.

Generate automatic keywords

Uncheck this to add custom keywords below.

## Keywords

Air

A comma-separated list of keywords and phrases about the page title/description. Use terms that are part of your page or document.

# ABOUT THESE:

- **Type.** Leave this alone. Do not change it.
- **Channel.** Leave “About EPA” checked. Optional: check any of the others depending on the content of your news release.
- **Is Searchable.** Leave this alone. Do not check this.

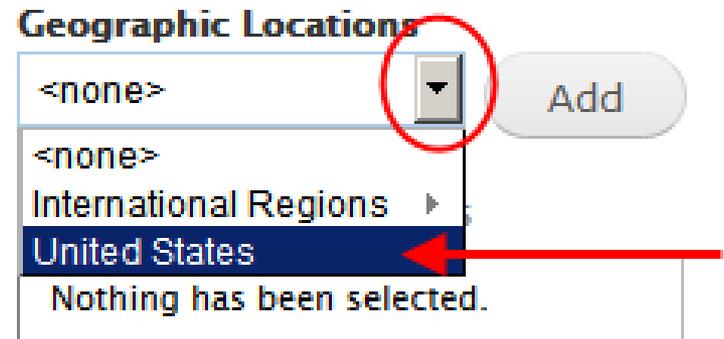

*These settings are required in the Web CMS. They will not (greatly) affect access to your news release.*

The image shows a screenshot of a CMS form with three sections crossed out with large red X marks. The first section is labeled 'Type \*' and contains a dropdown menu with 'Speeches, Testimony and Transcripts' selected. Below it is a link: 'Use this guide for choosing the right type.' The second section is labeled 'Channel \*' and contains four checkboxes: 'About EPA' (checked), 'Laws & Regulations', 'Learn the Issues', and 'Science & Technology'. Below it is a link: 'Use this guide for choosing the right channel.' The third section is labeled 'Is Searchable Collection' and contains an unchecked checkbox. Below it is a link: 'Removes all navigation elements from the content.'

# To add a geographic name.

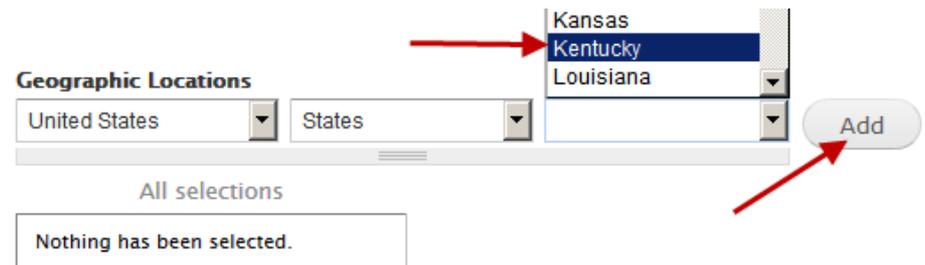

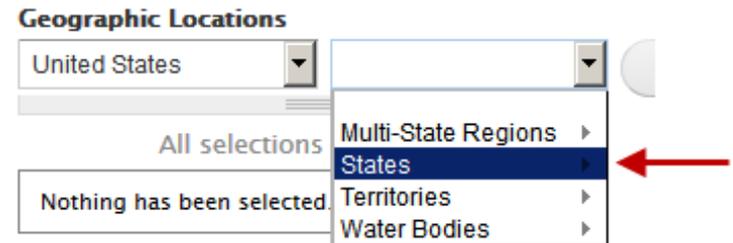

## ***This is OPTIONAL.***

- There's also a "Geographic Location" picker near the bottom of the form.
- Adding state names is a multi-step process but it's easy.
- Begin by clicking the "Geographic Locations" chooser, then pick "United States."

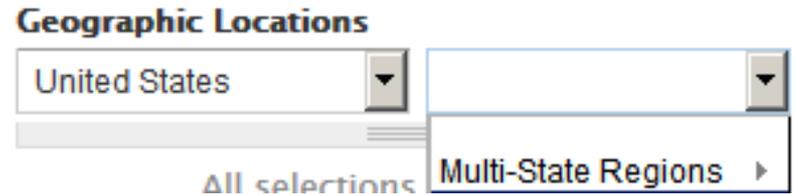

# Enter State(s) or other Location

- ***Remember, this is OPTIONAL.***
- Click “States.”
- A new chooser with state names will appear. Click the state you want.
- Click Add.
- Repeat for multiple states.

# What is Multi-State Region?

- **Multi-state regions refers to general areas of the US.**

- *It does not mean EPA Region, even if your region seems to fit the description.*
- **WHY USE THIS?** To tag your news release for readers (reporters, mainly) who look for announcements for that section of the USA.

EXAMPLE: information about a hurricane that hits Louisiana would be of interest to readers in the "SOUTHEAST."

# ¿What if the news release is not English?

## ONLY FOR NON-ENGLISH NEWS RELEASES

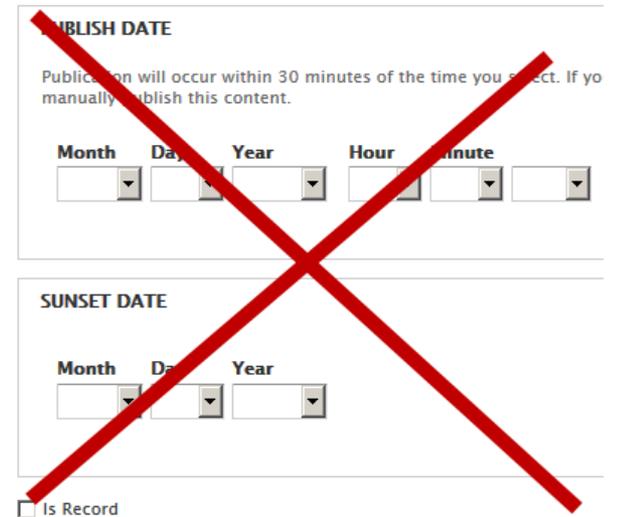

- Scroll to the bottom of the news release entry page.
- Click “Other Metadata” in the box at left of the “Description” field.
- A picker for different languages will appear.
- Click the language of your news release.\*
- Then click “Primary Metadata” to go back to the regular edit view of the news release draft.

This is important for Spanish or any other non-English news releases, because setting the language metatag *helps users see the page better in that language & font.*

# IGNORE

- You may notice settings that appear to pre-set the publish time.
- **Suggest you ignore this for now, and continue to *manually* publish news releases as needed.**
- Reason is, the publication time is accurate to only within a half-hour. *Do not depend on this for precise publishing.*

**PUBLISH DATE**

Publication will occur within 30 minutes of the time you select. If you manually publish this content.

Month Day Year Hour Minute

Month Day Year

Is Record

The image shows a screenshot of a web form with two sections: 'PUBLISH DATE' and 'SUNSET DATE'. The 'PUBLISH DATE' section includes a text box with a warning, followed by dropdown menus for Month, Day, Year, Hour, and Minute. The 'SUNSET DATE' section has dropdown menus for Month, Day, and Year. A large red 'X' is drawn over the entire form. At the bottom left, there is a checkbox labeled 'Is Record'.

# Save Your Draft

Click **SAVE**. This saves as a **draft**. THIS DOES NOT PUBLISH.

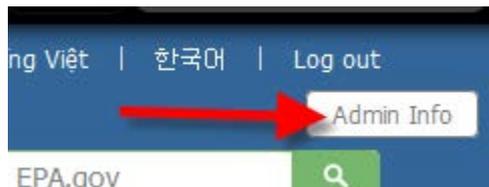

**Important** – you must click **Save**. If you try to “view” the draft without first saving it as a draft, your entries or changes will probably be lost.

**WAIT.** It may take the Web CMS a few moments to respond to your SAVE click.

# “Admin Info”

- If you see a WHITE “Admin Info” button at top right, **click it.**
- It should turn orange, and edit controls should appear.
- **Click the little green “Set” or “Save” button.**
- The green button will disappear.

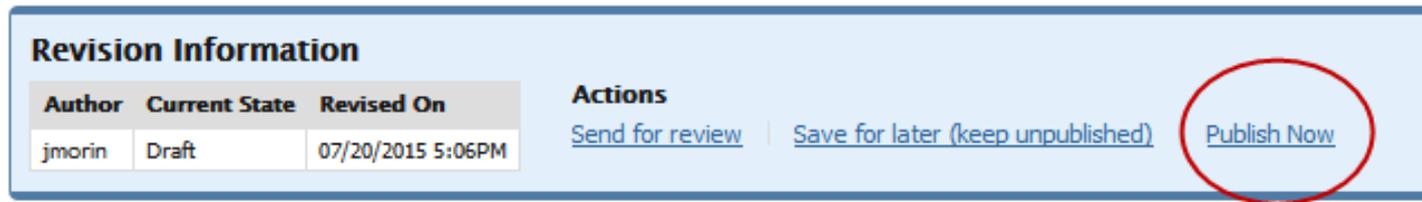

Its purpose is merely to show or hide the editing controls so you can have a clean view of the draft.

If there's no “Admin Info” button *at all* at top right, contact us.

# To Publish Your Draft

After saving the draft, you should see a link for "Publish Now" in the blue "Revision" bar at the top of the page.

The screenshot shows a light blue horizontal bar titled "Revision Information". On the left, there is a table with three columns: "Author", "Current State", and "Revised On". The "Author" column contains "jmorin", "Current State" contains "Draft", and "Revised On" contains "07/20/2015 5:06PM". To the right of the table is an "Actions" section with three links: "Send for review", "Save for later (keep unpublished)", and "Publish Now". The "Publish Now" link is circled in red.

Author	Current State	Revised On
jmorin	Draft	07/20/2015 5:06PM

**Actions**

[Send for review](#) | [Save for later \(keep unpublished\)](#) | [Publish Now](#)

**CLICK "Publish Now"** – to the publish dialogue.

# The publish dialogue page

## HERE IS WHERE YOU PUBLISH NOW.

- **You must enter a log message.** Suggest either a simple concept like "publishing" or message-to-self, like "publishing for Jane Doe who's out today."
- **You must check the external links box.**
- **You must check the accessible box.**
- **Click "Update state".** Now it will publish.

The screenshot shows a web form titled "Log message for this state change \*". It features a large text input area, a "Please enter a meaningful log message." prompt, two checkboxes with associated bulleted requirements, and two buttons at the bottom: "Update state" (highlighted in green) and "Cancel". Red arrows on the left side of the form point to the input area, the first checkbox, the second checkbox, and the "Update state" button.

Log message for this state change \*

Please enter a meaningful log message.

Update state Cancel

# What is accessible?

## What about external links?

- When you publish a news release in Web CMS, you will be asked to certify that the news release meets EPA and legal requirements for ***external links and accessibility***.
- While there are many requirements, the ones likely to affect you are few and won't come up often.
- **Please see the VERY BRIEF training online. You should look at it. Web CMS will log that you “certified.”**

# Status Page of the Current Revision.

After it publishes you will get a new page showing the status block of the news release “Current Revision.” STATUS should say “Published.”

✓ EPA's Energy Star Battle of the Buildings Competition Saves \$50 Million, Prevents 250,000 Metric Tons of GHG Emissions/ The agency recognizes competitors in all 50 states, the District of Columbia, and Puerto Rico transitioned to the published state.

07/22/2015 10:33AM	jmorin => Published.														

# Find your published news release

This is one easy way:

- Like any public user, find it online:  
<http://www.epa.gov/newsroom> (note the www)
- Then go to your Region or AA-Ship list of news releases. **Copy its link.**
- You can also go to the chronological, *all* list. Or find some other method that works for you.

# IMPORTANT!

DO NOT ACCIDENTALLY USE OR GIVE OUT A “WCMS” URL.

Look *closely* at the URL of your news release.

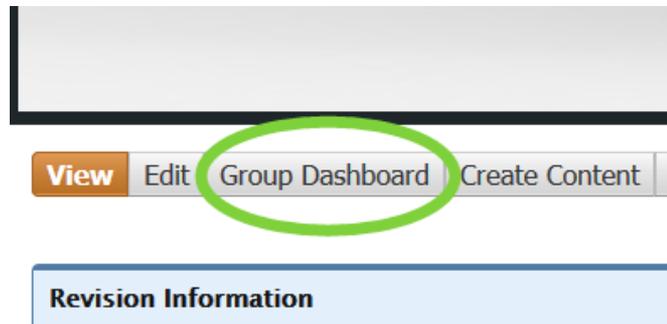

If you see **https://wcms** in the URL, this is the Web CMS version. You can see this because you are logged in.

**THIS IS NOT THE PUBLIC URL.** Do not give out URLs with “WCMS.”

# To **edit** a published news release

- Use the **Group Dashboard** to find and edit your published news release.

- When you **SAVE** and **PUBLISH** your edits, the published one is replaced automatically.
  - The URL and the “release date” do not change.
- Previous revisions remain in the system (offline) but you can go back to them if you need to.

# Login > Dashboard > Content

- Log in.
- Go to the Group Dashboard at <https://wcms.epa.gov/newsreleases/dashboard>  
Click on the **Browse Content** link or tab. This goes to the actual listing of all files.

## Group Dashboard

---

**Browse Content**

Search and browse this web area's content.

# Find your news release

- The “Content” list shows ALL NEWS RELEASES -  
- not just published, and not just yours.
- You will need to find your news release **among all the others**.
- Browse, search, or sort the list.

# There are ways to narrow the list

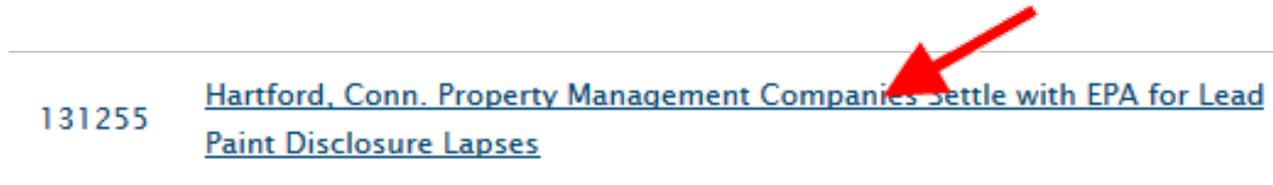

- Put your user ID in the “Author” field.
  - This will show you just yours.
- Choose “Published” as the Status type.
  - This will show just the published ones.
- Click “Search.”

The screenshot shows a search interface with three filter sections: Author, Type, and Status. The Author field contains 'jdoe45'. The Type dropdown menu is open, showing options like 'Basic page', 'Document', 'Event', 'News Release', 'Regulation', 'Web Area', and 'Webform'. The Status dropdown menu is also open, showing options like 'Draft', 'Draft, needs review', 'Draft, approved', 'Published', 'Published, needs review', 'Published, scheduled for expiration', and 'Unpublished'. The 'Published' option is highlighted. A green 'Search' button is located at the bottom left, with a red arrow pointing to it. Red arrows also point to the 'jdoe45' text in the Author field and the 'Published' option in the Status dropdown.

Author	Type	Status
jdoe45	Basic page	Draft
	Document	Draft, needs review
	Event	Draft, approved
	News Release	<b>Published</b>
	Regulation	Published, needs review
	Web Area	Published, scheduled for expiration
	Webform	Unpublished

# When you see your news release...

- Click the title.

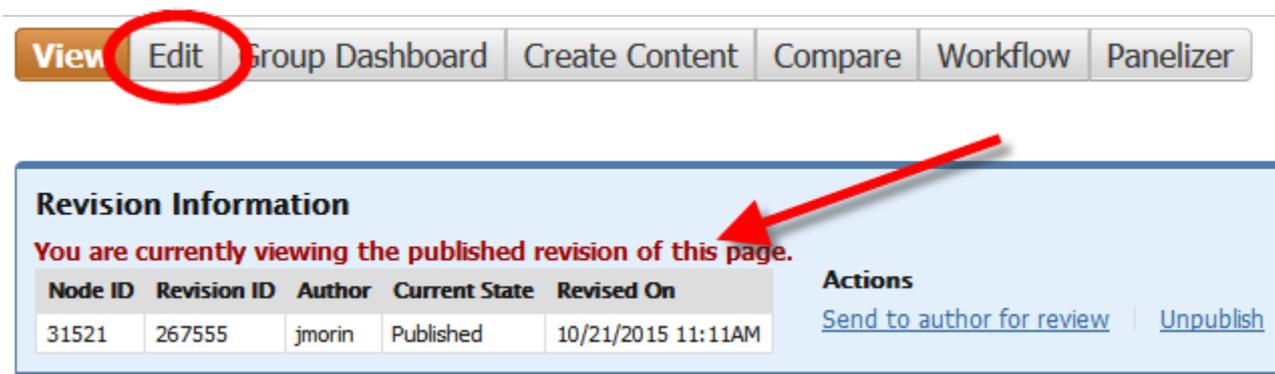

- This will open the page for editing as a “Revision.”

# Finishing someone else's?

- You should be able to edit or publish someone else's news release.
- And someone else can edit, publish, or otherwise finish up a news release that you left undone (for whatever reason).
- **CAUTION:** All news releases are in here, so be **VERY CAREFUL** open the correct news release.
- Web CMS keeps track of which user changes which revisions – in case there's a question.

# Now you can edit the “Revision”

- You should now be at <https://wcms.epa.gov/newsreleases/whateveryoucalledit>
- You should see the edit controls at the top.

The screenshot shows a navigation bar at the top with buttons for 'View', 'Edit', 'Group Dashboard', 'Create Content', 'Compare', 'Workflow', and 'Panelizer'. The 'Edit' button is circled in red. Below the navigation bar is a 'Revision Information' panel. The panel contains the text 'You are currently viewing the published revision of this page.' with a red arrow pointing to it. Below this text is a table with the following data:

Node ID	Revision ID	Author	Current State	Revised On
31521	267555	jmorin	Published	10/21/2015 11:11AM

To the right of the table is an 'Actions' section with two links: 'Send to author for review' and 'Unpublish'.

# Edit and Publish

- Click the **Edit** button at the top of the page. Make your changes.
- Click the **SAVE** when you're done making edits.

## *IMPORTANT*

**You must click to publish the revision.**

“SAVE” ALONE DOES NOT PUT YOUR CHANGES ONLINE.

## NOTES

- The URL will not change. People who linked to your news release should not have a broken link.
- It may take a few minutes for a re-published page to appear online. Remember to refresh your browser.

# *REMEMBER*

- **You must also do the PUBLISH step** if you make a change and save the revision.
- Just saving your changed revision, will not put your changed version online.

# Bookmark these URLs
