COMMONWEALTH OF PENNSYLVANIA  
DEPARTMENT OF ENVIRONMENTAL RESOURCES  
SOUTHWEST REGION - FIELD OPERATIONS  
AIR QUALITY CONTROL  
400 WATERFRONT DRIVE  
PITTSBURGH, PENNSYLVANIA 15222-4745

RACT OPERATING PERMIT

In accordance with provisions of the Air Pollution Control Act, of January 8, 1960, P.L. 2119, as amended, and after due consideration of an application received under Chapter 127 of the Rules and Regulations of the Department of Environmental Resources, the Department hereby issues this permit for the operation of the air contamination source described below.

Permit No.: 32-000-100

Source: Paint Booths

Owner: Fisher Scientific Co. International

Air: Water Screens

Address: 1410 Wayne Ave.  
Indiana, PA 15701

Cleaning:  
Devices:

Attention: Robert Hundley  
Plant Manager

Plant: Instrument Manufacturing Div.  
Location: White Township  
County: Indiana

Ozone

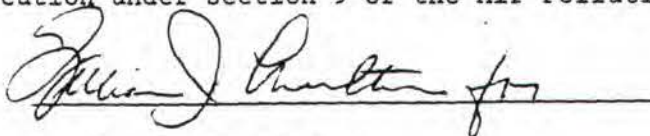

This permit is subject to the following conditions:

- ) That the source and any associated air cleaning devices are to be:
- (a) operated in such a manner as not to cause air pollution;
  - (b) operated and maintained in a manner consistent with good operating and management practices.
- (2) This permit valid only for the specific equipment, location and owner named above.
- (3) See attached.

EPA REGION III

Failure to comply with the conditions placed on this permit is a violation of Section 127.25. Violation of this or any other provision of Article III of the Rules and Regulations of the Department of Environmental Resources will result in suspension or revocation of this permit and/or prosecution under Section 9 of the Air Pollution Control Act.

Issued: 07/18/95

Joseph P. Pezze  
Regional Air Quality Manager  
Southwest Region

Permit Term: 3/31/1995 - 3/31/2000

1

Fisher Scientific Company International  
RACT Approval: #32-000-100

Special Conditions

3. This RACT Approval is for four paint booths, a vapor degreaser and fugitive sources at Fisher Scientific in Indiana, Indiana County.
4. All coatings shall be applied electrostatically with airless paint spray guns or other devices with equivalent transfer efficiency.
5. Emissions of VOC's from each booth shall not exceed 3 pounds per hour, and the four booths combined shall not exceed 40 TPY of VOC. Records to establish compliance with these limits shall be maintained on a daily basis and made available to the Department upon request.
6. All coatings used in these spray booths shall have a VOC content equal to or less than 3.50 lbs/gallon.
7. All VOC emissions from spray booth/gun cleaning operations shall be kept on record at the facility.
8. The total amount of coatings used in these spray booths shall not exceed 23,000 gallons/year.
9. A daily log shall be kept of all VOC-containing coatings, inks, and solvents purchased, consumed, and inventory on hand at the facility. These records shall be maintained in a file for a period of not less than two years and made available to the Department upon request.
11. Fisher Scientific shall take "as applied" paint samples of the four coatings used at the facility. This will be done to analyze the VOC content minus water and it will be performed on a semi-annual basis and maintained in a file for a period of at least two years. This file will be made available to the Department upon request.
12. Emissions of toxic air pollutants identified in Title III of the CAAA of 1990 shall not exceed 10 TPY of any single pollutant and shall not exceed 25 TPY of the aggregate of all pollutants. Fisher Scientific shall maintain records on a daily basis and make them available to the Department upon request, which are sufficiently detailed to establish compliance with this condition.
