Alexis Strauss  
Acting Regional Administrator  
Environmental Protection Agency  
Pacific Southwest Region (Region 9)  
75 Hawthorne Street

Hafa Adai Ms. Strauss,

The Guam Environmental Protection Agency is pleased to submit to you the revised SO<sub>2</sub> National Ambient Air Quality Standards (NAAQS) Designations Modeling, Analyses, results and Documentation for the island of Guam. Unfortunately, the implications in the modeling analyses presented in the revised modeling report to characterize the potential impact of sources subject to the Data Requirement Rule, plus a very conservative background concentration, is that the Cabras /Piti port area, a small portion of the eastern Orote Peninsula and the elevated terrain to the southeast of the Cabras/Piti plants are in modeled non-attainment of the 1-hour So<sub>2</sub> NAAQS out to a distance of approximately 6.074 km from the mid-point (UTM coordinates X (m) 249,601.60, Y (m) 1,489,602.00) of the modeled applicable sources.

**All other areas of the island of Guam, including the current Tanguisson Non-Attainment Area, are modeled to be in attainment of the 1-hour So<sub>2</sub> NAAQS.**

We are hopeful that this submission satisfies the requirements under 40 CFR 51.1203 (d). If you have any questions, please contact Mr. Roland Gutierrez the Air Pollution Control Program manager at (671) 300-4751/2 or by email at [roland.gutierrez@epa.guam.gov](mailto:roland.gutierrez@epa.guam.gov)

Sincerely,

WALTER S. LEON GUERRERO
