DEPARTMENT OF THE ENVIRONMENT

Subtitle 11 AIR QUALITY

Chapter 19 Volatile Organic Compounds from Specific Processes

.05 Coil Coating.

A. Definition. "Coil coating" means the coating of any flat metal sheet or strip supplied as rolls or coils.

B. Emission Standards. A person may not cause or permit the discharge into the atmosphere of any VOC from coil coating in excess of 2.6 pounds per gallon of coating applied (minus water) (0.31 kilogram/liter of coating applied (minus water)).
