

Detailed Performance Data

The National Water Program is charged with evaluating the progress it is making in developing and implementing effective programs to monitor, protect, and improve the waters of the United States. Activities of the National Water Program fall under Goal 2 of the FY 2014 – 2018 EPA Strategic Plan, “Protecting America’s Waters.” The National Water Program tracks 110 performance measures under 15 subobjectives. In March of 2017 EPA released the annual *National Water Program Performance, Trends, and Best Practices Report* which presents performance results and trends using fiscal year 2016 (FY 2016) end-of-year data reported by states, tribes, and EPA regional and headquarters offices, as well as best practices in program implementation. This document complements that report and contains all available end-of-year data for the 110 measures between fiscal years 2012 and 2016; in addition, it contains the 2017 commitments and budget targets (if applicable).

Data Presentation

The data for each measure is organized on a single page using a standard format. National-level data is presented at the top of the page followed by regional data. End-of-year results are presented as the top row followed by commitment and universe data. If a national measure is also a budget measure, the budget target is presented on an additional row. Below is a key to this document:

	Baseline Data
	Results Met Commitment
	Commitment Not Met
N.R.	Not Reported

Met/Not Met designations are based on the commitment value unless it is a budget measure, in which case the budget target is the comparable value. For Regions where a measure is not applicable, the associated cells are “grayed out.” Other blank cells may indicate that information is not applicable or not reported. Pages are titled with the measure code and a short description of the measure. The Measure Information sidebar contains information on the full measure language, units, direction of positive change, type of measure (e.g., annual, cumulative, budget, tribal), summarized terms and phrases, and a summary methodology. For

FULL MEASURE DEFINITIONS

The National Water Program’s performance webpage contains full definitions for each measure. Click on the links below to access each measure definition by subobjective.

additional information on the measure, visit the National Water Program's webpage using the links in the blue sidebar above, or included at the bottom of each measure page.

How to Use this Document

Measures are organized by subobjective beginning with 2.1.1 (Water Safe to Drink) and ending with subobjective 2.2.9 (U.S. Mexico Border Environmental Health). To locate information on a specific measure use the Find function (Ctrl +F) in Adobe and search for the exact number or phrase.

Measure Information

Measure Language: Percent of community water systems (CWSs) that have undergone a sanitary survey within the past three years (five years for outstanding performers or those ground water systems approved by the primacy agency to provide 4-log treatment of viruses).

Units: CWSs

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: CWS is a public, year-round water system; Primary Agency is the relevant primary enforcement authority; Sanitary survey is an on-site review of the public water system.

Methodology: Based on CWSs with outstanding performance.

Measure Information

Measure Language: Fund utilization rate [cumulative dollar amount of loan agreements divided by cumulative funds available for projects] for the Drinking Water State Revolving Fund (DWSRF).

Units: Cumulative \$ loans/cumulative fund \$ available

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Fund utilization rate is the proportion of available funding signed into loans for projects; DWSRF is a loan fund for drinking water infrastructure.

Methodology: Based on executed loans and cumulative funds available for projects.

Measure Information

Measure Language: Percent of Classes I, II and Class III salt solution mining wells that have lost mechanical integrity and are returned to compliance within 180 days thereby reducing the potential to endanger underground sources of drinking water.

Units: Wells

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Injection well is a device that places fluid deep underground into porous rock formations; Wells that have lost mechanical integrity are wells that do not meet mechanical integrity standards; Well returned to compliance is a well that has corrected its violation(s).

Methodology: Based on the number of wells that lose mechanical integrity and are returned to compliance.

Measure Information

Measure Language: Number of Class V motor vehicle waste disposal wells (MVWDW) and large capacity cesspools (LCC) that are closed or permitted.

Units: Class V wells

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Budget

Terms and Phrases: Class V motor vehicle waste disposal well (MVWDW) is a well used to inject fluids from motor vehicle repair or maintenance activities; Large-Capacity Cesspools (LCC) is a sanitary waste placement well that can serve at least 20 people per day.

Methodology: Based on the number of MVWDW and LCC permitted.

Measure Information

Measure Language: Percent of DWSRF projects awarded to small PWS serving <500, 501-3,300, and 3,301-10,000 consumers.

Units: Projects awarded to small PWS

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Public water system (PWS) is a water system that provides water to at least 25 people for at least 60 days annually.

Methodology: Based on the number of DWSRF projects awarded to PWSs.

Measure Information

Measure Language: Number and percent of small CWS and NTNCWS (<500, 501-3,300, 3,301-10,000) with repeat health based Nitrate/Nitrite, Stage 1 D/DBP, SWTR and TCR violations.

Units: Small CWS and NTNCWS

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: CWS are community water systems; TNCWS are transient non-community water systems; NTNCWS are non-transient non-community water systems; Repeat violations are repeats of the same combination of violation code.

Methodology: Based on the number of repeat health-based TCR, Nitrates, and SWTR violations.

Measure Information

Measure Language: Number and percent of schools and childcare centers that meet all health-based drinking water standards.

Units: Schools and childcare centers

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: CWS are community water systems; TNCWS are transient non-community water systems; NTNCWS are non-transient non-community water systems; Schools are CWS or NTNCWS with a primary service area equal to school or daycare.

Methodology: Based on school systems without reported health-based violations.

Measure Information

Measure Language: Volume of CO2 sequestered through injection as defined by the UIC Final Rule.

Units: Volume of CO2 in millions of gallons

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Geologic Sequestration is the process of injecting carbon dioxide into subsurface rocks for storage.

Methodology: Based on the amount of carbon dioxide sequestered through injection.

Measure Language: Percent of ‘person months’ (i.e. all persons served by community water systems times 12 months) during which community water systems in Indian country provide drinking water that meets all applicable health-based drinking water standards.

Units: Tribal "person months"

Direction of Positive Change: Increasing

Type of Measure: Annual; Tribal

Terms and Phrases: CWS is a public, year-round water system; Person-months per CWS is the product of the months with overlapping health-based violations, and the service area population.

Methodology: Based on violations of Maximum Contaminant Level, Maximum Residual Disinfection Limit, and Treatment Technique.

Measure Information

Measure Language: Percent of the population served by community water systems that receive drinking water that meets all applicable health-based drinking water standards through approaches including effective treatment and source water protection.

Units: Population

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: CWS is a public, year-round water system; Source water is untreated water from the environment used for public drinking water.

Methodology: Based on violations of Maximum Contaminant Level, Maximum Residual Disinfection Limit, and Treatment Technique.

Measure Information

Measure Language: Percent of "person months" (i.e. all persons served by community water systems times 12 months) during which community water systems provide drinking water that meets all applicable health-based drinking water standards.

Units: "Person months"

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: CWS is a public, year-round water system; Person-months per CWS is the product of the months with overlapping health-based violations, and the service area population.

Methodology: Based on violations of Maximum Contaminant Level, Maximum Residual Disinfection Limit, and Treatment Technique.

Measure Information

Measure Language: Percent of the population served by community water systems where risk to public health is minimized through source water protection.

Units: Population served by CWSs

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: CWS is a public, year-round water system; Source water is untreated water from the environment used for public drinking water.

Methodology: Based on the percent of CWSs and the percent of population served by the CWSs.

Measure Information

Measure Language: Percent of women of childbearing age having mercury levels in blood above the level of concern.

Units: Women of childbearing age

Direction of Positive Change:
Decreasing

Type of Measure: Annual; Budget

Terms and Phrases: None provided.

Methodology: Based on biomonitoring exposure data.

Measure Information

Measure Language: Number and national percent, using a constant denominator, of Combined Sewer Overflow (CSO) permits with a schedule incorporated into an appropriate enforceable mechanism, including a permit or enforcement order, with specific dates and milestones, including a completion date consistent with Agency guidance, which requires: 1) Implementation of a Long-term Control Plan (LTCP) which will result in compliance with the technology and water quality-based requirements of the Clean Water Act; or 2) implementation of any other acceptable CSO control measures consistent with the 1994 CSO Control Policy; or 3) completion of separation after the baseline date.

Units: CSO permits

Direction of Positive Change: Increasing

Type of Measure: Cumulative

Terms and Phrases: CSS is a publicly-owned combined sewer collection system; Enforceable Mechanism is an enforcement order with a Long-Term Control Plan (LTCP to address combined sewer overflows (CSOs).

Methodology: Based on the number of CSO permits.

Measure Information

Measure Language: Percent of days of the beach season that coastal and Great Lakes beaches monitored by state beach safety programs are open and safe for swimming.

Units: Days of beach season

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Beach season days are the product of each state's and territory's beach season multiplied by the number of beaches.

Methodology: Based on the number of days of beach-specific advisories or closures.

Measure Information

Measure Language: Number of numeric water quality standards adopted for total nitrogen or total phosphorus for all waters within the State or Territory for each of the following waterbody types: lakes/reservoirs, rivers/streams, and estuaries.

Units: Numeric water quality standards

Direction of Positive Change: Increasing

Type of Measure: Cumulative

Terms and Phrases: Numeric standards for total nitrogen and total phosphorus are numeric water quality criteria; Waterbody type refers to lakes and reservoirs (excluding the Great Lakes), or rivers and streams, or estuaries; For full list of terms, see the web page.

Methodology: Based on the number of approved state and territorial WQS.

Measure Information

Measure Language: Number, and national percent, of states and territories that within the preceding three year period, submitted new or revised water quality criteria acceptable to EPA that reflect new scientific information from EPA or other resources not considered in the previous standards.

Units: States/Territories

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Acceptable to EPA means EPA has approved the new or revised criteria for that locality; Three year period means May 1, 2014 through April 30, 2017; New scientific information from EPA includes, but is not limited to, draft or final water quality criteria documents.

Methodology: Based on number of new or revised water quality standards.

Measure Information

Measure Language: Number, and national percent of tribes that within the preceding three year period, submitted new or revised water quality criteria acceptable to EPA that reflect new scientific information from EPA or other resources not considered in the previous standards.

Units: Tribes

Direction of Positive Change:
Increasing

Type of Measure: Annual; Tribal

Terms and Phrases: Acceptable to EPA means EPA has approved the new or revised criteria for that locality; Three year period means May 1, 2014 through April 30, 2017; New scientific information from EPA includes, but is not limited to, draft or final water quality criteria documents.

Methodology: Based on number of new or revised water quality standards.

Measure Information

Measure Language: Percentage of submissions of new or revised water quality standards from states and territories that are approved by EPA.

Units: WQ standards submissions

Direction of Positive Change:
Increasing

Type of Measure: Annual

Terms and Phrases: Submission is a package of new or revised water quality standards transmitted to EPA; Partial approvals receive fractional credit means that partial approvals count proportionally

Methodology: Based on the proportion of approved new or revised water quality standards.

Measure Information

Measure Language: Number of tribes that currently receive funding under Section 106 of the Clean Water Act that have developed and begun implementing monitoring strategies that are appropriate to their water quality program consistent with EPA Guidance.

Units: Tribes

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Tribal

Terms and Phrases: Tribe means a federally recognized Indian tribe.

Methodology: Based on the number of tribes that are implementing water monitoring strategies consistent with the EPA 106 Tribal Guidance.

Measure Information

Measure Language: Number of waterbodies identified by states (in 1998/2000 or subsequent years) as being primarily nonpoint source (NPS)-impaired that are partially or fully restored.

Units: Waterbodies

Direction of Positive Change: Increasing

Type of Measure: Cumulative

Terms and Phrases: NPS impairments are NPS pollutants or stressors that violate water quality standards; Eliminated means that the violations were removed by corrective actions and the waterbody now meets the water quality criterion.

Methodology: Based on the number of NPS impairments eliminated.

Measure Information

Measure Language: Number, and national percent, of follow-up actions that are completed by assessed NPDES (National Pollutant Discharge Elimination System) programs.

Units: Follow-up actions

Direction of Positive Change: Increasing

Type of Measure: Cumulative

Terms and Phrases: Follow-up actions are action items that address a deficiency or noncompliance; National Pollutant Discharge Elimination System (NPDES) are CWA provisions that prohibit discharge of pollutants into water.

Methodology: Based on the number of new action items each year.

Measure Information

Measure Language: Percent of tribal facilities covered by NPDES permits that are considered current.
[Measure will still set targets and commitments and report results in both % and #.]

Units: Tribal facilities

Direction of Positive Change: Increasing

Type of Measure: Annual; Tribal

Terms and Phrases: National Pollutant Discharge Elimination System (NPDES) are CWA provisions that prohibit discharge of pollutants into water.

Methodology: Based on the number of facilities covered by NPDES individual and non-stormwater general permits.

Measure Information

Measure Language: Number, and national percent, of MS-4s covered under either an individual or general permit.

Units: Facilities

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: MS4 is a publicly-owned system that collects and discharges stormwater; Concentrated Animal Feeding Operations (CAFOs) are point sources, as defined by the CWA.

Methodology: Based on the number of MS4s covered under an existing MS4 permit.

Measure Information

Measure Language: Fund utilization rate [cumulative loan agreement dollars to the cumulative funds available for projects] for the Clean Water State Revolving Fund (CWSRF).

Units: Cumulative \$ loans/cummulative fund \$ available

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Loan agreements are the dollar amount of loans provided by the CWSRF; Funds available are CWSRF funds available for projects.

Methodology: Based on the amount of CWSRF funds available to fund projects.

Measure Information

Measure Language: Number of high priority state NPDES permits that are issued in the fiscal year.

Units: High priority State NPDES permits

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: National Pollutant Discharge Elimination System (NPDES) are CWA provisions that prohibit discharge of pollutants into water.

Methodology: Based on the number of selected priority permits issued per year.

Measure Information

Measure Language: Extent of priority areas identified by each state that are addressed by EPA-approved TMDLs or alternative restoration approaches for impaired waters that will achieve water quality standards. These areas may also include protection approaches for unimpaired waters to maintain water quality standards.

Units: Priority areas

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Clean Water Act 303(d) Program Vision Priorities is a long-term process for identifying priority watersheds or waterbodies; TMDL is the sum of the individual load allocations for point and nonpoint sources; For full list of terms, see the web page.

Methodology: For full methodology please see definition of the web page.

[Click Here for the Complete Measure Definition](#)

Measure Information

Measure Language: Number of states protecting or improving water quality conditions, as demonstrated by state-scale statistical surveys:

- On average, water quality is improving or at least not degrading (there is no statistically significant decrease in mean water quality);
- The percentage of waters in good condition is increasing or remaining constant; and,
- The percentage of waters in poor condition is decreasing or remaining constant.

Units: States

Direction of Positive Change:
Increasing

Type of Measure: Annual

Terms and Phrases: State-wide statistically valid survey is a survey that meets the criteria set out in the 2008 Guidelines for the Award of Monitoring Initiative Funds; Core indicators are parameters selected by the state and reported consistently to track water quality; For full list of terms, see the web page.

Methodology: Based on data from state-scale statistically-valid surveys.

Measure Information

Measure Language: Number of waterbodies identified in 2002 as not attaining water quality standards where standards are now fully attained.

Units: Waterbodies

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Budget

Terms and Phrases: Attaining water quality standards means the water body is fully compliant; Impairment is a violation of the TMDL.

Methodology: Based on the number of noncompliant water bodies in 2002, that have undergone corrective action.

Measure Information

Measure Language: Remove the specific causes of waterbody impairment identified by states in 2002.

Units: Impairment causes

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Budget

Terms and Phrases: Removal of an impairment cause means that the original impairment cause in 2002 is no longer impairing the water body.

Methodology: Based on the number of impairments.

Measure Information

Measure Language: Improve water quality conditions in impaired watersheds nationwide using the watershed approach.

Units: 12-digit HUC watersheds

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Budget

Terms and Phrases: Impaired watershed is a watershed containing one or more impaired water bodies; Impaired waterbody has a TMDL violation reported in 2002; Watershed approach is the process of prioritizing water resource problems

Methodology: Based on the number of watersheds and water bodies with violations reported in 2002.

Measure Information

Measure Language: Ensure that the condition of the Nation's lakes does not degrade (i.e., there is no statistically significant increase in the percent of lakes rated "poor" and no statistically significant decrease in the streams rated "good").

Units: Scale

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: None provided.

Methodology: Based on national assessment of coastal waters, lakes, rivers/streams, or wetlands.

Measure Information

Measure Language: Improve water quality in Indian country at baseline monitoring stations in tribal waters (i.e., show improvement in one or more of seven key parameters: dissolved oxygen, pH, water temperature, total nitrogen, total phosphorus, pathogen indicators, and turbidity).

Units: Monitoring stations

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Tribal

Terms and Phrases: Seven key parameters are the seven parameters identified in the EPA's Clean Water Act.

Methodology: For full methodology please see definition on the web page.

Measure Information

Measure Language: Identify monitoring stations on tribal lands that are showing no degradation in water quality (meaning the waters are meeting tribal water quality objectives).

Units: Monitoring stations

Direction of Positive Change: Increasing

Type of Measure: Cumulative; Tribal

Terms and Phrases: No degradation means all the core indicators met benchmark water quality criteria over the last two years; Benchmark water quality criteria EPA-approved/recommended criteria included in the tribe's CWA; Core indicators might include, but are not limited to, the seven indicators identified in the CWA guidance for tribes.

Methodology: For full methodology please see definition of the web page.

Measure Information

Measure Language: Percent of population in the U.S. Pacific Island Territories served by community water systems that has access to continuous drinking water meeting all applicable health-based drinking water standards, measured on a four quarter rolling average basis.

Units: Population: American Samoa; Mariana Islands; Guam

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: CWS is a public, year-round water system; U.S. Pacific territories consist of American Samoa, Commonwealth of the Northern Mariana Islands, and Guam.

Methodology: Based on Quarterly Safe Drinking Water Information System data.

Measure Information

Measure Language: Achieve 'no net loss' of stony coral cover (mean percent stony coral cover) in the Florida Keys National Marine Sanctuary (FKNMS) and in the coastal waters of Dade, Broward, and Palm Beach Counties, Florida (SE FL), working with all stakeholders (federal, state, regional, tribal, and local).

Units: Stony coral cover

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Stony corals (scleractinians) are the group primarily responsible for laying the foundations of reef structures.

Methodology: Based on data from the Florida Keys Coral Reef Evaluation and Monitoring Project.

Measure Information

Measure Language: Annually maintain the overall health and functionality of sea grass beds in the FKNMS as measured by the long-term sea grass monitoring project that addresses composition and abundance, productivity, and nutrient availability.

Units: Sea grass

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Thalassia is the dominant species of seagrass within the Florida Key National Marine Sanctuary (FKNMS).

Methodology: Based on data from the Seagrass Monitoring Project (SMP) for the FKNMS.

Measure Information

Measure Language: At least seventy five percent of the monitored stations in the near shore and coastal waters of the Florida Keys National Marine Sanctuary will maintain Chlorophyll a (CHLA) levels at less than or equal to 0.35 ug l-1 and light clarity (Kd) levels at less than or equal to 0.20 m-1.

Units: Monitoring stations

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Chlorophyll a (CHLA) estimates the amount of algae in the water; Light clarity (Kd) measures the water clarity.

Methodology: Based on data from the Water Quality Monitoring Project.

Measure Information

Measure Language: Number of active dredged material ocean dumping sites that are monitored in the reporting year.

Units: Sites

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: Active refers to a dredged material ocean dumping site that has been used in five years; A dredged material ocean dumping site is a an area where ocean dumping of wastes is permitted; Monitoring refers to efforts to collect and test various conditions at ocean dredged material disposal sites.

Methodology: Based on the number of active dredged material ocean dumping sites.

Measure Information

Measure Language: Working with partners, protect or restore additional acres of habitat within the study areas for the 28 estuaries that are part of the National Estuary Program (NEP).

Units: Acres of habitat

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Partners are governmental, non-governmental, and private sector entities; Habitat means aquatic and terrestrial areas within the NEP study area; Estuary is a partly enclosed coastal body of water in which river water is mixed with seawater.

Methodology: Based on data from the National Estuary Program.

Measure Information

Measure Language: Percent of active dredged material ocean dumping sites that will have achieved environmentally acceptable conditions (as reflected in each site's management plan and measured through on-site monitoring programs).

Units: Sites

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Active refers to a dredged material ocean dumping site that has been used in five years; A dredged material ocean dumping site is a an area where ocean dumping of wastes is permitted; Site Management Plan is a baseline assessment of the site and site management practices for environmental protection.

Methodology: Based on the number of active dredged material ocean dumping sites.

Measure Information

Measure Language: Percent of Clean Water Act Section 404 standard permits, upon which EPA coordinated with the permitting authority (i.e., Corps or State), where a final permit decision in FY 08 documents requirements for greater environmental protection* than originally proposed.

Units: Permits

Direction of Positive Change: Increasing

Type of Measure: Annual

Terms and Phrases: ORM 2.0 is a database used by the U.S. Army Corps of Engineer to track permitting activities under the CWA Section 404 regulatory program; DARTER is the EPA interface for accessing records and commenting on proposed permits in the ORM 2.0 database.

Methodology: Based on data from the Army Corps of Engineers ORM 2.0 Database.

Measure Information

Measure Language: In partnership with the U.S. Army Corps of Engineers, states and tribes, achieve 'no net loss' of wetlands each year under the Clean Water Act Section 404 regulatory program.

Units: Status

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Clean Water Action Section 404 Regulatory Program is a regulatory program for the disposal of dredged materials in waters and wetlands.

Methodology: Based on total acres of wetland impacts and total acres or credits of compensatory mitigation. For full methodology please see definition of the web page.

Measure Information

Measure Language: Number of Beneficial Use Impairments removed within Areas of Concern.

Units: BUIs

Direction of Positive Change:
Increasing

Type of Measure: Cumulative;
Budget

Terms and Phrases: Beneficial Use Impairment (BUI) is a change in the chemical, physical or biological integrity of the Waters of the Great Lakes; Great Lakes Areas of Concern (AOC) are severely degraded geographic areas within the Basin.

Methodology: Based on the number of BUIs.

CB-05.N14: Percent attainment of water quality standards in the Bay and tidal tributaries

Level	Data Type	Baseline 2015	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	Measure Information
Nat'l	Result	40.0%			28.9%	33.9%	37.2%		Measure Language: Percent attainment of water quality standards for dissolved oxygen, water clarity/underwater grasses, and chlorophyll a in Chesapeake Bay and tidal tributaries. Units: Goal achieved Direction of Positive Change: Increasing Type of Measure: Annual Terms and Phrases: Dissolved oxygen (DO) is the amount of oxygen that is present in the water. Underwater grasses refers to the 16 species found in the Chesapeake Bay. Chlorophyll a is used as a measure of phytoplankton (microalgae) biomass. Methodology: Based on achievement or non-achievement of the water quality standards applicable to a designated use within a segment.

Measure Information

Measure Language: Percent of goal achieved for implementing nitrogen pollution reduction actions to achieve the final TMDL allocations, as measured through the phase 5.3 watershed model.

Units: Percent goal achieved (m lbs) based on simulated load reductions from FY 2010 (2009) scenario) to the TMDL allocation.

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: None provided.

Methodology: Based on simulated loads which are compared to Chesapeake Bay TMDL allocations. Targets set are based on the Chesapeake Bay TMDL.

Measure Information

Measure Language: Reduce the size (square miles) of observed hypoxia (Dissolved Oxygen <3mg/l) in Long Island Sound.

Units: Square miles; days

Direction of Positive Change: Decreasing

Type of Measure: Annual

Terms and Phrases: Dissolved oxygen (DO) refers to the amount of oxygen that is present in the water; Hypoxia is less than three milligrams of dissolved oxygen per liter of water.

Methodology: Based on DO measurements.

Measure Information

Measure Language: Reopen miles of river and stream corridors to diadromous fish passage from the 2010 baseline of 177 river miles by removal of dams and barriers or by installation of bypass structures.

Units: Miles

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: Diadromous fish travel between salt and fresh water to spawn.

Methodology: Based on data from the NEPORT reporting system.

PS-SP49.N11 (ps1): Number acres of Puget Sound shellfish areas improved (cumulative)

Level	Data Type	Baseline 2007	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	Measure Information
Nat'l	Result	322	2,489	3,203	3,249	3,277	3,887		Measure Language: Improve water quality and enable the lifting of harvest restrictions in acres of shellfish bed growing areas impacted by degraded or declining water quality. (cumulative starting in FY 06) Units: Acres Direction of Positive Change: Increasing Type of Measure: Cumulative; Budget Terms and Phrases: Harvest restrictions are defined through a Growing Area Classification Program. Methodology: Based on data from the Washington Department of Health.
	Budget Target					4,700	4,750	6,350

Measure Language: Number of additional homes provided adequate wastewater sanitation in the U.S.-Mexico border area that lacked access to wastewater sanitation in 2003.

Units: Homes

Direction of Positive Change: Increasing

Type of Measure: Annual; Budget

Terms and Phrases: U.S.-Mexico Border area is the area within 100km of the U.S.-Mexico border, in the United States or Mexico.

Methodology: Based on project completions that increase the number of households that are provided access to wastewater sanitation service.
