These credits may be earned previously by the manufacturer in accordance with subdivision (e) of this section or acquired from another manufacturer.

(b) Manufacturers which sell fewer ZEVs than required, in New York State, in a given model-year shall make up the deficit by the end of the next model-year, by selling an additional number of ZEVs in New York State, equal to their deficit or by submitting a commensurate amount of g/mi NMOG credits earned exclusively from the sale of ZEVs.

(c) Small volume manufacturers shall not be required to meet the percentage ZEV requirements.

(d) Intermediate volume manufacturers shall not be required to meet the percentage ZEV requirements before the 2003 model-year.

(e) In 1994 and subsequent model-years, manufacturers that achieve fleet average NMOG values lower than the fleet average requirement for the corresponding year, shall receive credits in units of g/mi NMOG determined as: $\{[(\text{Fleet Average NMOG Requirement}) - (\text{Manufacturer's Fleet Average NMOG Value})] \times (\text{Total No. of Vehicles Sold, Including ZEVs and HEVs})\}$.

(1) The g/mi NMOG emission credits earned in any given model-year shall retain full value through the subsequent model-year.

(2) The g/mi NMOG value of any credits not used to equalize the previous model-year's debit, shall be discounted by 50 percent at the beginning of the second model-
