Subject: In-person staff-to-staff meeting to discuss changes to Clean Water Rule

Hello Karen,

We are interested in setting up a staff-to-staff meeting to discuss the Presidential Executive Order directing EPA and the Corps to Review and Rescind or Revise the Clean Water Rule. The Snoqualmie Indian Tribe recognizes the extreme importance of wetlands to watershed and ecosystem functions in the Tribe's traditional areas and has concerns about the effects that decreasing protections of wetlands and other waterbodies will have on culturally significant resources. Can you please send information about when, where, and with whom such a meeting might be possible? Thank you.

Sincerely,
Matt

Matthew J. Baerwalde
