

Proceedings for LMOP Webinar on Wellfield Operations and Technologies for Upgrading Landfill Gas

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to announce that the proceedings from our November 16, 2017 webinar on **wellfield operations and technologies for upgrading landfill gas (LFG)** are now available on the LMOP website at <https://www.epa.gov/lmop/wellfield-operations-and-technologies-upgrading-landfill-gas>.

The following two speakers presented during the webinar:

- **Frank Terry**, Smith Gardner, Inc., spoke on considerations when designing, constructing and operating an LFG collection system as well as monitoring and wellfield tuning.
- **Mark Hill**, DTE Biomass Energy, continued the discussion by presenting on different types of equipment to remove unwanted constituents from LFG when creating pipeline-quality gas, ways for the converted gas to enter the vehicle fuel market and common pitfalls for this type of project.

We appreciate the time and expertise shared by our two presenters.

If you have feedback on this webinar, would like to suggest topics for future webinars or have an interest in presenting, please email us at lmop@epa.gov.

Sincerely,
The LMOP team
