look for

Your Style. More Savings.

Remodel Your Way to a Dream Bathroom With WaterSense

You've always wanted that perfect bathroom. Distinctive fixtures. Sleek lines. The latest styles. Now that look you've always dreamed about comes with real savings. Faucets, toilets, and showerheads that have earned the EPA's WaterSense® label elevate your bathroom oasis while delivering the added benefit of water-saving performance.

Here's where you can really get inspired. With elegant designs, a full spectrum of colors and finishes, and a range of prices, WaterSense labeled fixtures can turn a bathroom from merely remodeled to absolutely refined.

Whether your bathroom is small or large, practical or spa-like, there's a WaterSense labeled fixture that fits your style and elevates your space.

A polished-brass faucet can bring a touch of European style. The lines of a square showerhead can make your morning routine a post-modern experience. And even a simple black matte faucet can add a dramatic contrast against a white tile backdrop.

The best thing about a bathroom remodeled with WaterSense labeled fixtures? You get all that style, with all that substance—and you can save nearly 10,000 gallons of water every year, not to mention energy and money.

That's pretty dreamy too.
