

Jonathan B. Burkhardt, Environmental Engineer in EPA's National Risk Management Research Laboratory

Water Systems Division
[Mailing Address](#)

burkhardt.jonathan@epa.gov

Areas of Expertise: Water distribution system modeling, adsorption modeling and event detection software. Current research involves modeling water quality in premise plumbing systems and modeling trace chemical adsorption in granular activated carbon and ion-exchange systems. Additional research has involved application of event detection software for a variety of monitoring applications.
