

The DERA program places a priority on projects located in areas that have the highest emissions from diesel engines. The term "project location," as used in this 2017 National RFP, refers to the primary area where affected vehicles or engines operate, or the primary area where emissions benefits of the project will be realized. Applicants may apply for projects not located in priority areas.

Priority areas for the 2017 National RFP include:

- Counties and areas designated as PM 2.5 or 8-hr Ozone Nonattainment or Maintenance (1997 PM 2.5 NAAQS is for nonattainment only) in EPA's Green Book of Nonattainment Areas for Criteria Pollutants (www.epa.gov/green-book) - OR -
- Counties and areas where all or part of the population is exposed to more than 2.0 µg/m³ of diesel particulate matter emissions in the 2011 National Scale Air Toxics Assessment (www.epa.gov/national-air-toxics-assessment/2011-nata-assessment-results).
