

Presentations from the 'Franklin County Landfill Gas to Pipeline RNG Energy Project' Webinar are Now Available

The Landfill Methane Outreach Program (LMOP) is pleased to announce that presentations and a video recording from the June 14th “Franklin County Landfill Gas to Pipeline RNG Energy Project” webinar are now available on the [LMOP website](#). The webinar provided an overview of this successful project that upgrades LFG into pipeline quality RNG for vehicle fuel.

Two speakers--representatives from the project developer and the natural gas utility--shared their perspectives on how they collaborated to successfully develop this project:

- **Jay Hopper – Vice President of Business Development, Aria Energy.** Aria Energy, an LMOP Partner, has developed more than 50 LFG projects over the last 25 years.
- **Mike Anderson – Director of Supply Development, NiSource Gas Distribution.** NiSource, a Natural Gas STAR and Methane Challenge Partner, serves nearly four million natural gas and electricity customers across seven states through its local NIPSCO and Columbia Gas utilities.
