Finance Center**

# Dairy Digesters

- Works to reduce greenhouse gas emissions from manure on California dairy farms
- This process works to use the methane from the manure to power farms

# UC Davis Biodigester Project

- Organic waste disposal program implemented in 2017
- Renewable energy facility right on campus

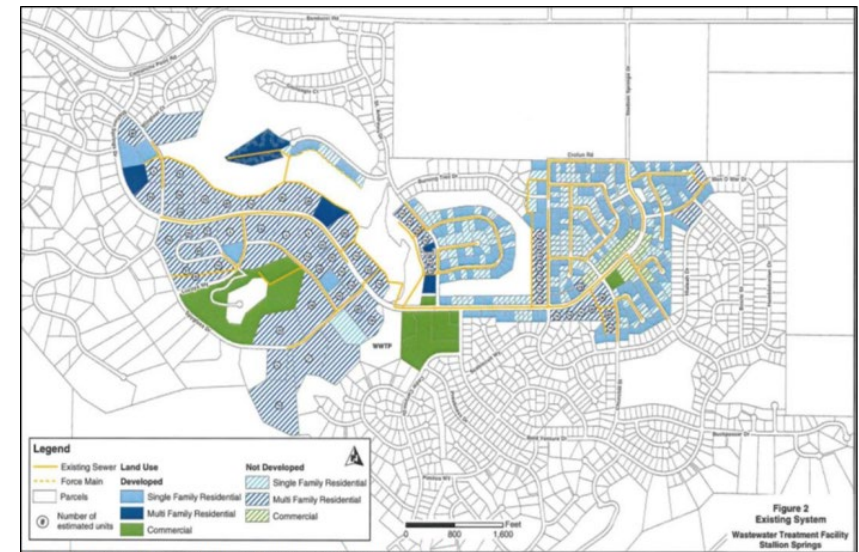

Photo credit: Gregory Urquiaga/UC Davis

# Stallion Springs Community Services District

\$510,000

- Funded the New Wastewater Lift Station Project
- Reduces the cost of pumping wastewater
- Prevent environmental damage by reducing the possibility of raw sewage overflow into streams

# Nonprofit Small Business Urban Greening Watershed Project

Collaboration of CA Coastal Conservatory Grant, SBA, the City  
of Richmond, Community Volunteers, Nor Cal FDC, NCCFL  
Credit and IBank

- Transform parking lots into bioswales
- Filter storm water runoff
- Reduce urban heat island effect

# IBank and BAAQMD Partnership

---

Possible participation would provide up to \$20 million in loans that would allow BAAQMD's Climate Tech Finance program to:

- Support emerging technologies
- Reduce greenhouse gas emissions
