

2017-2018 College and University Green Power Challenge

Throughout the 2017-18 academic year, EPA's Green Power Partnership tracked the collegiate athletic conferences with the highest combined green power usage in the nation. The College and University Green Power Challenge is open to any collegiate athletic conference in the United States.

On April 25, 2018, EPA concluded the Green Power Challenge and recognized the Champion Green Power Conference, as well as the largest single green power users within each participating conference. The Champion Green Power Conference for the 2017-18 Challenge is the Big Ten Conference and the individual school using the most green power is the University of Tennessee, Knoxville.

Interested in joining the 2018-19 Green Power Challenge? Check out our [Steps to Join Green Power Partnership](#) page for more information. To be listed, a conference must have at least two Green Power Partners and an aggregate green power purchase of at least 10 million kilowatt-hours (kWh) across the conference.

This list is current as of April 25, 2018. This is the final update to the 2017-18 College and University Green Power Challenge. Thank you and congratulations to all participating schools!

Individual Conference Champions

The following colleges and universities were recognized as conference champions for using the most green power among the schools in their conference. EPA applauds these schools for taking a leadership role in their conference and in supporting a better environmental future:
