

Proceedings Available from EPA's October Workshop on RNG

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to notify its stakeholders that the proceedings are posted online for the [2018 Natural Gas STAR and Methane Challenge Renewable Natural Gas Workshop](#), held on October 23, 2018, in Fort Worth, Texas. The workshop was hosted by EPA's Natural Gas STAR and Methane Challenge Programs, in collaboration with the American Gas Association.

LMOP staff gave a presentation on "EPA Voluntary Programs and Renewable Natural Gas" during the **Benefits of Renewable Natural Gas Use** panel.

Summary of the four panels at the October 2018 workshop:

- **Benefits of Renewable Natural Gas Use:** Introduction to EPA's voluntary methane reduction programs and the benefits of RNG.
- **RNG Project Case Studies:** Developers and utility operators presenting on RNG project development and usage.
- **RNG Technical Gas Quality and Cleanup Issues:** Explanation of quality requirements for RNG and processes to produce RNG.
- **RNG Policy, Financial Incentives and Market Forces:** Roundtable discussion of market forces in the RNG industry and strategies to increase production of and demand for RNG.
