OFFICE OF THE
REGIONAL ADMINISTRATOR

APR 19 2019

Ms. Carol Comer
Director
Missouri Department of Natural Resources
PO Box 176
Jefferson City, Missouri 65102-0176

Dear Ms. Comer:

With this letter, I am pleased to approve the Missouri Department of Natural Resources' Air Pollution Control Program's 2018 Monitoring Network Plan submitted for the U.S. Environmental Protection Agency's approval on August 9, 2018.

I am also approving the proposed discontinuation of sulfur dioxide, nitrogen dioxide and particulate matter monitoring at the Margareta State and Local Air Monitoring Station in St. Louis, PM₁₀ monitoring at the Troost SLAMS in Kansas City, and lead monitoring at the Glover SLAMS in Glover, Missouri. Discontinuation of monitoring at these locations meets the discontinuation requirements of 40 CFR Part 58. The EPA may require restarting lead monitoring at the Glover SLAMS in the future [using the authority in 40 CFR part 58 Appendix D, paragraph 4.5(c)] if a change in the facility status occurs (such as demolition, site cleanup, or construction) that could result in increased re-entrainment of lead dust.

We will continue to coordinate with you and your staff to ensure that Missouri's monitoring obligations in multi-state areas are met for the next monitoring network planning period.

The EPA appreciates your commitment to protecting air quality for the citizens of Missouri and dedication to our shared mission. I look forward to continued work with you and your staff.

Sincerely,

A handwritten signature in black ink that reads "James B. Gulliford".
