RE: U. S. Environmental Protection Agency Draft Permit Numbers MI-163-1I-0004, 0005, 0006, 0007, and 0008 for Five Class I Non-hazardous Wells and a Draft Class III Area Permit Number MI-163-3A-0001 in Wayne County, Michigan

Dear Mr. Bell:

The U.S. Environmental Protection Agency has prepared five underground injection control (UIC) draft permits for the BDW-1, BDW-2, BDW-3, BDW-4 and BDW-5 injection wells and one area permit for solution mining wells CW-1, CW-2, CW-3, and CW-4. Please see the enclosures. We have advised the public that the draft permits are subject to a 30-day comment period (and an additional three days to account for the delay caused by mailing) wherein Buckeye Terminals, LLC or any other person may comment on the draft permits.

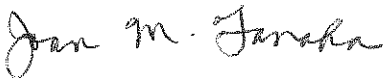

To preserve your right to appeal any final permit decision that may be made in this matter under Title 40 of the Code of Federal Regulations (40 C.F.R.) § 124.19, you must either participate in a public hearing or send in written comments on this draft permit decision. (A hearing is not planned at this time.) Following such participation, the first appeal for review of any condition of the final permit decision must be made to the Environmental Appeals Board of the EPA. Such a petition must include a statement of the reasons supporting review of the decision, including a demonstration that the issue(s) being raised for review were raised during the public comment period (including any public hearing). The petition should, when appropriate, show that each condition being appealed is based on either, (1) a finding of fact or conclusion of law which is clearly erroneous, or (2) an exercise of discretion or an important policy demonstration which the Environmental Appeals Board should, in its discretion, review.

According to 40 C.F.R. § 124.10(b) and § 124.20(d), a public notice of the preparation of the draft permits shall allow at least a 30-day public comment period and three days to account for the delay caused by mailing. After the public comment period you will be notified if any significant changes

in the draft permits are required. If no changes are made, and EPA decides to issue the permits, the final permits will be issued without prior notification.

If you have any questions regarding the Class I permits, please contact Allan Batka of my staff by telephone at (312) 353-7316 or by email to batka.allan@epa.gov. If you have any questions regarding the Class III area permit, please contact William Tong of my staff by telephone at (312) 886-9380 or by email to tong.william@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Joan M. Tanaka".
