

Any chance you are involved in working on the new regulations on storing potentially toxic chemicals near major bodies of water? I know court deadline for promulgating was yesterday

Gov office is getting nervous

Wanted to discuss RFS issues and see what helpful info a client can provide in comments on the supplemental notice

Can we set up a call for 830 your time, 730 ours? That pleading, combined with Sam's statements, is causing serious heartburn. And I'm worried this situation is going to spiral if we don't get everyone on the phone together asap.

Justin, any chance you'd be willing to make an intro with Erik Baptist?

Lunch is probably not going to work. Is there a particular issue you want to discuss with him? If so I can connect you and hopefully set up a call.

If it's more for a general intro I will have to think more carefully about how to make that happen.

Okay. I will switch to work email/phone as this involves agency business rather than social.

Lunch Tuesday might work

So a call would be great

I talked with chairman Shaw today. He was with Sam and the Administrator today in Texas. And Sam advised the Administrator that they've culled all but 1 of the CSAPR units out of the FIP. That's great news!

Of course!

Thanks. Maybe we can grab a quick lunch this week or early next week

Just talked to Chairman Shaw. We're on it
