

Top 30 On-site Generation (as of April 22, 2019)

The Top 30 On-site Generation list represents those partners generating and consuming the most green power on-site within the Green Power Partnership. The combined on-site green power consumption of these organizations amounts to nearly 1.8 billion kilowatt-hours of green power annually, which is equivalent to the electricity use of more than 164,000 average American homes each year.
