

Plywood and Composite Wood Products Residual Risk Review HEM Input Files

This zip file contains Microsoft Excel files formatted for HEM3. The EPA used these files with the latest version of HEM3 (downloadable at <https://www.epa.gov/fera/risk-assessment-and-modeling-human-exposure-model-hem>) and the most-recent Census data file for residual risk modeling of the plywood and composite wood products (PCWP) source category.

Input files are provided for PCWP source category actual, allowable, and acute emission estimates. Input files are also provided for whole facility actual emission estimates for processes in the PCWP source category and for non-PCWP-category processes.

A source ID crosswalk file is also provided. Non-PCWP-category process are identified with an Emission Process Group “NON-PCWP-CATEGORY” or “NN.” All other Emission Process Groups are part of the PCWP source category.

Please direct questions regarding these files to Katie Hanks at hanks.katie@epa.gov or 919-541-2159.
