Re: Case No. 19-3705, *Genscape, Inc. v. EPA*
Originating Case No. : EPA 05-31-2019

Dear Counsel,

This case has been docketed as number **19-3705** with the caption that is enclosed on a separate page. Please check the caption for accuracy and notify the Clerk's Office if any corrections should be made.

Before preparing any documents to be filed, counsel are strongly encouraged to read the Sixth Circuit Rules at www.ca6.uscourts.gov. If you have not established a PACER account and registered with this court as an ECF filer, you should do so immediately.

The following forms should be downloaded from the web site and filed with the Clerk's office by **August 9, 2019**. If payment did not accompany the petition for review, the \$500 filing fee should also be paid by this date.

	Appearance of Counsel
Petitioner:	Disclosure of Corporate Affiliations Application for Admission to 6th Circuit Bar (if applicable)
Respondent:	Appearance of Counsel

More specific instructions are printed on each form. These deadlines are important - if the initial forms are not timely filed and necessary fees paid, the case will be dismissed for want of prosecution. If you have questions after reviewing the forms and the rules, please contact the Clerk's office for assistance.

Sincerely yours,

s/Ryan E. Orme
Case Manager
Direct Dial No. 513-564-7079

PETITION FOR REVIEW

Genscape, Inc. hereby petitions this Court for review of the final action of the U.S. Environmental Protection Agency entitled “EPA Final Determination in the Matter of Genscape, Inc., Option A Quality Assurance Plan Auditor Under the Renewable Fuel Standard Program” (“Determination”), which was issued on May 31, 2019.¹ A copy of the Determination is attached as Exhibit A.

¹ The Determination has not been published in the Federal Register, and so the sixty-day clock for challenging that action has not yet begun to run. *See* 42 U.S.C. 7607(b)(1). Genscape nonetheless brings this petition now because the Determination purports to require Genscape to comply within sixty days of issuance.

Respectfully submitted,

s/ Amanda Shafer Berman

MAY 31 2019

Mr. Jon Ecker
Chief Executive Officer
Genscape, Inc.
1140 Garvin Place
Louisville, KY 40203

Dear Mr. Ecker,

On January 4, 2017, the United States Environmental Protection Agency (EPA) sent Genscape, Inc. (Genscape) a notice letter, informing Genscape of EPA's intent to (1) revoke Genscape's registration as a third-party auditor; (2) revoke Genscape's Quality Assurance Plan A (QAP A); and (3) require Genscape to replace invalid Gen-X Energy Group (Gen-X) and Southern Resources and Commodities, LLC (SRAC) generated renewable identification numbers (RINs), specifically A-RINs, that Genscape verified and were used for compliance purposes.

Today, EPA is enclosing its final decision regarding this matter, which is a final agency action for purposes of 42 U.S.C. § 7607(b)(1).

EPA has taken into consideration the information that Genscape provided to EPA regarding this matter, including, but not limited to, the information Genscape itself considered before it verified the RINs at issue. For the reasons described in the enclosed decision memorandum, EPA is (1) revoking Genscape's registration as an EPA approved QAP provider, pursuant to 40 C.F.R. § 80.1450(g)(11)(i); (2) revoking Genscape's QAP A for the reason that it has proved inadequate in practice, pursuant to 40 C.F.R. § 80.1469(e)(4); (3) although not required by the regulations, EPA is formally deeming all of the Gen-X and SRAC RINs invalid; and (4) requiring Genscape to retire 69,168,201 valid current or prior year D3, D4, D5, or D7 RINs to replace the invalid A-RINs Genscape verified, pursuant to 40 C.F.R. § 80.1470(d).¹ Within 60 days of receipt of the enclosed final decision memorandum, pursuant to 40 C.F.R. § 80.1474(b)(5)(i), Genscape must retire valid RINs that meet the requirements of 40 C.F.R. § 80.1474(d).²

Genscape is registered as a QAP auditor under "Genscape QAP," and as a RIN owner under "Genscape, Inc." In today's action, EPA is revoking Genscape's registration under "Genscape QAP." EPA is not revoking Genscape's RIN owner registration under "Genscape, Inc." to allow

¹ Genscape retired 1,427,869 D4 RINs on April 17, 2017, pursuant to 40 C.F.R. §§ 1470(c)(2) and 80.1474(b)(5). Appendix A of the enclosed decision memorandum provides a list of the invalid A-RINs used for compliance purposes, which Genscape is required to replace.

² See 40 C.F.R. § 80.1474(b)(5)(i).

Genscape to acquire and retire the RINs it is required to replace, as described in the enclosed decision memorandum. Since "Genscape QAP" had activity for part of the 2018 compliance period, it has quarterly reporting requirements under 40 C.F.R. § 80.1451(g) and annual attest engagement requirements under 40 C.F.R. § 80.1464(i). The attest engagement for the 2018 compliance period is due June 1, 2019. For any outstanding reports or subsequent updates required under both 40 C.F.R. §§ 80.1451 or 80.1464, to be submitted by "Genscape QAP," EPA is allowing Genscape to submit those reports under its RIN owner registration, "Genscape Inc."

Ben Larson of my staff is available to assist you with the mechanics of RIN replacement. He can be reached at larson.ben@epa.gov or (202) 343-9565.

Sincerely,

Byron Bunker, Director
Compliance Division

I. Introduction.

Congress promulgated the Renewable Fuel Standard (RFS) program to increase the production of renewable fuel to replace or reduce the quantity of fossil fuel present in transportation fuel, heating oil and jet fuel. A Renewable Identification Number (RIN) corresponds to an actual produced volume of renewable fuel. Parties called “obligated parties” who are required to meet an annual renewable volume obligation (RVO), such as refiners and importers, have the option to either blend the renewable fuel into transportation fuel, heating oil or jet fuel, or buy RINs to satisfy their RVO. RINs are an essential part of the RFS program because they represent the production and use of renewable fuel and provide obligated parties with needed compliance flexibility.

Because a RIN has an associated market value,¹ there is some incentive for unscrupulous parties to register as renewable fuel producers and cheat - for example, by generating RINs for fuel they have not produced. Fraudulent “producers” have orchestrated various scams, such as setting up facades of renewable fuel production facilities, claiming but failing to produce renewable fuel, and fraudulently generating and selling RINs for significant profit. The United States Environmental Protection Agency (EPA or Agency), which implements and regulates the RFS program, has brought civil cases to address civil noncompliance, resulting in the replacement of invalid RINs and the collection of significant civil penalties. The EPA has also criminally prosecuted renewable fuel producers who have effectuated fraud in the RFS program, and many of those involved have been sentenced to long prison terms.

To combat RIN market fraud and promote market liquidity by encouraging obligated parties to purchase valid biodiesel and renewable diesel RINs from smaller companies, EPA promulgated the Quality Assurance Plan (QAP) regulations. Under the QAP regulations, independent third-party auditors monitor renewable fuel facilities to ensure these facilities are producing qualifying renewable fuel and generating valid RINs. A third-party auditor is required to register with EPA and submit a QAP for EPA approval before conducting any audits under that plan. Once a third-party auditor has conducted the on-site review, document review, and initiated on-going monitoring, the RINs may be identified as verified by the third-party auditor and sold to other parties as QAP verified RINs. This QAP label is intended to represent to the purchaser of those RINs that it is buying credits that have been closely examined by a third-party auditor who has determined the RINs are valid. Additionally, an obligated party that uses QAP verified RINs to demonstrate compliance with its RFS obligation may assert an affirmative defense and, in certain circumstances, not have to replace those RINs or pay civil penalties and in some instances, RIN replacement., if they are later deemed invalid. The third-party auditor may have to replace any invalid RINs that it verified.

Genscape chose to participate very early in the QAP program as a third-party auditor. In meetings with the EPA and regulated community, Genscape presented itself as a leading expert

¹ For example, the invalid RINs at issue in this decision memorandum are D5 RINs, and the average price per D5 RIN in 2013 was \$0.68. In 2014, the average D5 RIN price was \$0.56.

in the field of monitoring and auditing renewable fuel facilities and the EPA registered the company as a QAP auditor. Additionally, Genscape assured the Agency that should it verify RINs that were in fact invalid that it would be able to replace them, as Genscape had the "...sound financial backing of its publicly traded corporate parent Daily Mail and General Trust (DMGT), a \$2.5 billion annual revenue company."² Despite its characterizations of using cutting-edge and robust monitoring technology, Genscape did not carry out the basic requirements of its QAP, ignored and failed to follow through on glaring signs of RIN fraud, and failed to meet the requirements of the QAP regulations.

In 2013, Genscape was hired as a QAP provider for Gen-X Energy Group (Gen-X) and its subsidiary Southern Resources and Commodities, LLC (SRAC).³ The Gen-X and SRAC facilities, in the states of Washington and Georgia, respectively, had registered to produce non-ester renewable diesel with non-cellulosic separated food waste as the qualifying feedstock. While conducting routine QAP activities at its client SRAC's claimed renewable diesel facility, Genscape saw highly anomalous transportation patterns of trucks entering and departing the facility. Those observations led to concerns that fuel was leaving the facility and reentering the facility as feedstock in what is called a "fuel-to-feedstock cycle," thus allowing SRAC to generate multiple RINs from the same fuel. Genscape essentially uncovered the fraudulent scheme at SRAC and documented its findings.

These observations led Genscape to conduct a "Field Inquiry," in which it attempted to verify the legitimacy of the three feedstock suppliers and two fuel purchasers working with SRAC. The purpose of the Field Inquiry was for Genscape to confirm that SRAC was producing renewable diesel from qualifying feedstock, and that purchasers of the renewable diesel were using it for a qualifying purpose.

During its Field Inquiry, Genscape's investigation of the fuel purchasers and feedstock suppliers failed to resolve its concerns of a fuel-to-feedstock cycle occurring, as documented in detail below. An example of one such finding regarding its fuel purchaser investigation is that Genscape observed SRAC fuel delivery trucks traveling to a nearby Pawn Shop, and then returning to SRAC, without having delivered the fuel. An example of one such finding regarding a feedstock supplier, Centennial Transload Inc. (Centennial), is that Genscape was given one address for that supplier, but Genscape could not find infrastructure for feedstock handling or storage at that location. Genscape was then given a second address for Centennial, where it failed to observe equipment, signs, truck or trailer traffic, and nearby businesses stated they had not observed any truck or trailer traffic. There was even an incident in which a Genscape auditor noted he was "aggressively followed" by a vehicle while performing his duties.

² Genscape RIN Replacement Service Plan for QAP-A, signed by Jesse Mindel, Genscape, Inc. Director of Finance (April 16, 2013).

³ Gen-X and SRAC are used interchangeably in most of Gen-X's correspondence with Genscape. SRAC is also occasionally referred to as the Gen-X facility in Dublin, Georgia. (*See* Genscape_Tab02_0000097).

As a result of the observed anomalous transportation patterns and the observed lack of normal feedstock supplier or fuel storage infrastructure, Genscape continued its investigation and conducted a “For-Cause Audit” of SRAC, which did not resolve its concerns of a fuel-to-feedstock cycle, as documented in detail below. Genscape continued to find a lack of operating infrastructure at the fuel purchaser locations. It also was unable to verify all of the feedstock suppliers, including one that refused to cooperate at all with the investigation.

In April 2014, Genscape issued a letter to Gen-X and SRAC stating that the RINs Gen-X and SRAC generated between November and December 2013 were potentially invalid RINs (PIRs). Genscape demanded a response from Gen-X and SRAC prior to resuming QAP verification. However, prior to receiving a PIR response from Gen-X and SRAC, Genscape sent a subsequent letter also requiring a prospective procedure in late April 2014 to prevent the potential fuel-to-feedstock cycle from continuing. For example, Genscape initiated a prospective requirement that SRAC mark finished renewable diesel with a red dye to ensure the same fuel did not return as a feedstock. However, Genscape did not adequately follow up and monitor this control, as discussed below. It also required SRAC to put in place, prospectively, a code of conduct for its employees relating to RIN fraud, and accepted a statement from SRAC’s CEO that he was in full compliance with the regulations.

Genscape uncovered and documented extensive evidence of SRAC’s fraudulent fuel-to-feedstock loop. Yet, instead of invalidating the RINs, in September of 2014, Genscape chose to ignore the obvious indicia of fraud and verified the RINs.

In 2015, the CEO of Gen-X and SRAC, along with several co-conspirators, entered criminal guilty pleas for the fuel-to-feedstock scam that Genscape had identified. Genscape did not comply with the QAP regulations. In fact, Genscape arguably facilitated the continuing nature of the fraud. Because of this, EPA is formally revoking Genscape’s registration in the QAP program, revoking Genscape’s QAP A in place at the time that these RINs were verified, and requiring Genscape to replace 69,168,201 invalid RINs.

II. Background.

A. History of the Renewable Fuel Standard and the Quality Assurance Plan.

The federal RFS is set forth in section 211(o) of the Clean Air Act (CAA), 42 U.S.C. 7545(o), as amended by the Energy Policy Act of 2005, and the Energy Independence and Security Act of 2007. The CAA specifies that the EPA must promulgate regulations to ensure that transportation fuel sold or introduced into commerce in the United States, on an average annual basis, contains specified volumes of renewable fuel and three subcategories of renewable fuel – advanced biofuel, cellulosic biofuel, and biomass-based diesel.⁴ The EPA promulgated these regulations as 40 C.F.R. Part 80, Subpart M. Each year EPA uses the relevant annual volumes along with an

⁴ CAA section 211(o)(2)(A)(i).

estimate (provided by the Department of Energy) projecting the amount of gasoline and diesel that will be sold or introduced into commerce that year, to compute the percentages of total transportation fuel that should qualify as each type of renewable fuel.⁵ The relevant annual volumes may come directly from the statute,⁶ may be established by EPA for years for which the statute does not specify volumes,⁷ or may result from EPA using its statutory authority to adjust statutory volumes.⁸ Each of the various refiners and importers who are subject to the RFS (obligated parties) then apply those percentages to their annual production or import of gasoline and diesel to determine the number of gallons of each type of renewable fuel for which they are responsible.⁹

EPA regulations implementing CAA section 211(o) do not require obligated parties to blend renewable fuel into gasoline and diesel themselves, but allow them to demonstrate compliance with the RFS by acquiring and retiring RINs.¹⁰ Each RIN represents a gallon of renewable fuel that has been produced or imported for use in the United States and for which RINs have not already been generated.¹¹ An obligated party demonstrates to EPA, after each calendar year, that it has accumulated sufficient RINs corresponding to each renewable fuel type to meet its renewable fuel obligations.¹² Obligated parties need not acquire RINs at the same time that they produce or import fuel but may simply purchase the required number of RINs by the end of the compliance period, once their annual production is known.¹³ An obligated party can also carry a surplus and/or a deficit of RINs for one year into the following year, subject to certain limitations.¹⁴

Due to “[s]everal cases of fraudulently generated RINs,” there was substantial concern within the Agency and industry over RIN validity and RIN market stability.¹⁵ To protect themselves, obligated parties began auditing RIN producers prior to making RIN purchases, but since this process is very resource intensive, it caused them to predominantly purchase RINs from large, well-known entities.¹⁶ RINs generated by those large producers were viewed as more certain and, therefore, more valuable, and the smallest RIN producers were severely disadvantaged.¹⁷ This also resulted in reduced liquidity in the RIN market.¹⁸ Therefore, EPA proposed in February 2013¹⁹ and finalized in July 2014²⁰ the QAP rule. The QAP rule became effective 60 days later,

on September 16, 2014.²¹

The QAP rule created a voluntary program in which independent third-parties (hereinafter QAP auditor) may audit and verify that RINs have been properly generated and are valid for compliance purposes.²² The QAP rule also defines the conditions under which RINs must be replaced, and a process for determining who will replace the RINs.²³ In general, the RFS program is based on a “buyer beware” liability and compliance approach, in which obligated parties are expected to conduct due diligence to confirm that the RINs they purchased are valid for compliance purposes and are prohibited from using invalid RINs for compliance.²⁴ If the RINs were verified as A-RINs, however, the renewable fuel producer or the QAP auditor may be held liable for RIN replacement²⁵ and potentially for violations under the RFS regulations.²⁶ Obligated parties who purchase RINs verified through the QAP program may assert an affirmative defense for the transfer or use of any invalid RIN that had been verified under an approved QAP.²⁷

EPA proposed the QAP rule on February 8, 2013, and finalized the QAP rule on July 18, 2014; the QAP rule became effective on September 16, 2014. However, without an alternative QAP system for the time period after publication of the rule and before the effective date, the RIN market would have remained sluggish and uncertain.²⁸ Therefore, EPA created a few regulatory flexibilities that would cover auditors for the period of program implementation, known as the interim period, spanning February 21, 2013, through December 31, 2014.²⁹ First, QAP auditors were allowed to pre-register for the program and submit their QAPs to EPA for informal approval.³⁰ Second, because QAPs are designed to provide prospective assurance of RIN validity, EPA had to provide a way to verify RINs that had been generated before a QAP could be implemented at the renewable fuel facility.³¹ To address this, during the interim period, QAP auditors could perform a one-time retrospective audit based on a document review of renewable fuel produced and RINs generated after January 1, 2013, and before the QAP auditor had conducted the site inspection and set-up ongoing monitoring for the QAP A.³² EPA intended this retrospective audit to provide a “reasonable flexibility to account for a start-up lag” while the QAP auditors got their QAP plans implemented at their client facilities.³³ EPA acknowledged “that the retrospective audit process for RINs generated prior to the actual audit being conducted

³¹ 78 FR at 12168.

³² *Id.* During the interim period, EPA allowed two QAP options, A and B. “The requirements for Option A QAP would be more detailed and involved than Option B QAPs. The differing sets of requirements would correspond with the differing RIN replacement responsibility under the two QAPs.” 78 FR 12165.

³³ *Id.* at 12165.

may offer less certainty than the process that applies to RINs generated after the audit is conducted.”³⁴ However, EPA envisioned the document review to only cover “a short period of time...in many cases a matter of a few months,” after which RIN verification becomes prospective.³⁵ EPA wanted to also ensure “that auditors are not inappropriately taking advantage of this flexibility by doing retrospective audits only (which require less monitoring and work, especially for Option A QAPs) until the final rule is effective.”³⁶ Therefore, EPA created the condition that “[a]uditors would only be able to perform the retrospective audit if all the elements of the QAP were already in place and could only perform one retrospective audit of a given producer.”³⁷ In this way, RINs generated prior to the QAP rule’s effective date could be informally verified during the interim period.³⁸ Once the QAP rule became effective, the QAP auditors were required to register and resubmit their QAPs for formal EPA approval.³⁹ Then, the QAP auditors could choose to formally verify the interim period RINs, though they were not obligated to do so.⁴⁰

B. Timeline of Genscape’s actions as a QAP auditor for Gen-X Energy Group and its corporate subsidiary, Southern Resources and Commodities, LLC.

Genscape became involved very early in the QAP rule, submitting comments on the proposed rule, speaking on the record at the QAP rule hearing, and then pre-registering with EPA as a QAP auditor. On February 8, 2013, Genscape submitted its interim period QAP A,⁴¹ which EPA informally pre-approved on February 19, 2013.⁴² In May 2013, Genscape began verifying RINs generated by Gen-X and its subsidiary, SRAC, located in the states of Washington and Georgia, respectively.⁴³ Genscape completed a one-time retrospective audit of these companies on October 8, 2013.⁴⁴

Beginning in November 2013, Genscape began investigating Gen-X and SRAC for a fuel-to-feedstock cycle. Its investigation was largely carried out in stages: the Field Inquiry and For-Cause Audit Parts 1, 2, and 3.⁴⁵ Genscape focused its investigation largely on SRAC, despite the fact that Gen-X was SRAC’s parent and Genscape documented concerns with Gen-X’s Washington state operations.⁴⁶ As a result, EPA’s decision memorandum focuses primarily on SRAC.

⁴⁵ The Field Inquiry and For-Cause Audit Report was transmitted to Gen-X, and a copy sent to EPA, with a cover letter that was dated April 10, 2014. Genscape_Tab02_0000001.

⁴⁶ Genscape_Tab02_0000088.

Genscape conducted the Field Inquiry between November 11, 2013, and December 15, 2013.⁴⁷ It did so due to its concerns that finished fuel was reentering the feedstock supply chain in a fuel-to-feedstock cycle.⁴⁸ Genscape initially had these concerns because of its receipt of market feedback,⁴⁹ and its observation of anomalous transportation patterns at SRAC.⁵⁰ During the Field Inquiry, Genscape investigated the fuel-to-feedstock cycle concerns by: (1) examining SRAC's two fuel purchasers, ADI and Trooper, the fuel delivery patterns and the fuel delivery sites' infrastructure; and (2) examining the three feedstock suppliers, Columbia, Centennial, and Grease Depot, the feedstock supplier delivery patterns and the feedstock supplier sites' infrastructure.⁵¹ Genscape's concerns about finished fuel reentering the SRAC feedstock supply chain were not alleviated by the Field Inquiry.⁵²

Genscape conducted its more formal investigation, called a For-Cause Audit, from January to September 2014.⁵³ In Genscape's own words, the purpose of this For-Cause Audit was to "determine whether renewable fuel additive produced by SRAC was recycled back into the feedstock supply chain during November and December 2013. One of the QAP requirements issued by the EPA is that "Feedstock is not renewable fuel for which RINs were previously generated."⁵⁴ Since RINs were generated by SRAC for all fuel sold during the period of the audit, feedstock derived from SRAC fuel would violate this QAP requirement."⁵⁵ In Part 1 of Genscape's For-Cause Audit, it investigated SRAC's fuel purchasers, ADI and Trooper, and feedstock suppliers Centennial and Columbia (which refused to participate in the For-Cause Audit), between January 28 and January 30, 2014.⁵⁶ As explained in detail below, Genscape's concerns of fuel reentering the feedstock supply chain were not resolved by examining the fuel purchasers and the feedstock suppliers, and it chose to extend its For-Cause Audit.⁵⁷

Genscape conducted Part 2 of its For-Cause Audit between February 19 and April 9, 2014.⁵⁸ During this part of its For-Cause Audit, Genscape attempted to investigate SRAC's three feedstock suppliers back to their separated food waste sources.⁵⁹ Genscape failed to identify the sources of any of the feedstock suppliers and its investigation of them did not resolve its concerns about fuel reentering the SRAC feedstock supply chain.⁶⁰

⁴⁷ Genscape_Tab02_0000017.

⁴⁸ Genscape_Tab02_0000009.

⁴⁹ Genscape does not define what was meant by "market feedback," but it appears to have relied upon this information when initiating the Field Inquiry.

⁵⁷ Genscape_Tab02_0000051.

⁵⁸ *Id.*

⁵⁹ *Id.*

⁶⁰ Genscape_Tab02_0000065.

Genscape conducted Part 3 of its For-Cause Audit between February 19 and April 9, 2014.⁶¹ During this part of the For-Cause Audit, Genscape continued its For-Cause Audit investigation and uncovered: (1) ADI (fuel purchaser) and Columbia (feedstock supplier) used the same registered agent, a disbarred attorney who had spent 78 months in federal prison for financial fraud; and (2) SRAC had documented that its fuel delivery and feedstock pick up times took far less time than possible.⁶²

On April 10, 2014, Genscape issued a notification to Gen-X and SRAC that it had determined the RINs generated at SRAC between November and December 2013 were potentially invalid (hereinafter 2014 PIR Notice).⁶³ Genscape included a report (hereinafter Field Inquiry and For-Cause Audit Findings Report) supporting its findings in its 2014 PIR Notice. In its 2014 PIR Notice, Genscape states to Gen-X and SRAC that “[i]t has collected information that may suggest that at least a significant portion of the feedstock used by SRAC to produce ‘G-Force’ fuel additive between November 1, 2013, and December 3, 2013, was actually finished fuel delivered back to the SRAC facility as feedstock, thereby forming a fuel-to-feedstock’ cycle.”⁶⁴

On April 24, 2014, Genscape sent to Gen-X and SRAC a letter following-up on the 2014 PIR Notice (hereinafter April 2014 Letter), in which Genscape outlined a plan to resume QAP-A services at SRAC. This plan, as described below, included the implementation of a red dye fuel marker system at SRAC, among other specific actions and steps that SRAC would need to take before its RINs could be verified.⁶⁵

On June 6, 2014, Gen-X responded to Genscape’s 2014 PIR Notice and April 2014 Letter with a letter (hereinafter June 2014 Letter) providing purported explanations for Genscape’s observations and making assertions of renewable fuel and RIN validity.⁶⁶

On August 26, 2014, Genscape resubmitted its QAP A for formal approval under the QAP final rule.⁶⁷ On September 5, 2014, Genscape notified Scott Johnson, the President of Gen-X, and a corporate officer of its subsidiary SRAC, of its decision to uphold the QAP-A status for the RINs previously identified as PIRs, and that it intended to verify these RINs as A-RINs under the final QAP rule, which would become effective on September 16, 2014.⁶⁸ On September 16, 2014, EPA approved Genscape’s QAP A (hereinafter QAP A or Final QAP) and notified Genscape that any A-RINs Genscape informally verified during the interim period were eligible for formal verification if Genscape determined that the RINs were valid.⁶⁹ On September 29, 2014, Genscape verified all of Gen-X’s RINs, including those generated at its subsidiary facility

⁶⁹ See Genscape_Tab29_0000036.

SRAC, the majority of which were A-RINs, under the RFS QAP final rule.⁷⁰ During the interim period, Genscape verified 71,394,322 fraudulently generated RINs as A-RINs.

C. Timeline of this administrative action.

On November 24, 2015, Scott Johnson, the President of Gen-X, and a corporate officer of its subsidiary SRAC, entered a guilty plea for fraudulently generating “at least 72 million” RINs from approximately October of 2012 to approximately April of 2015, based on renewable fuel that was never produced or fuel that was re-processed as feedstock.⁷¹

On December 24, 2015, EPA issued a notice to Gen-X and SRAC stating that Scott Johnson’s plea agreement “includes an admission that GEN-X Energy Group, Inc. (GEN-X) and Southern Resources and Commodities (SRC) generated at least 72 million invalid [RINs] from approximately October of 2012 to April of 2015.”⁷² That December 2015 Notice required corrective action be taken by Gen-X and SRAC within 30 days of being notified by EPA.⁷³ Neither Gen-X nor SRAC responded to the December 2015 Notice, nor took any corrective action within the 30-day period or otherwise.

On May 8, 2016, Genscape met in person with EPA personnel in Ann Arbor, Michigan, while EPA personnel in Washington, D.C., and Denver, Colorado, participated remotely. At this meeting, EPA provided Genscape an opportunity to answer questions posed in the meeting and to explain why it verified the 71,394,322 RINs, despite the evidence before it of a fuel-to-feedstock cycle. At this meeting, Genscape committed to sending EPA additional information.

On June 30, 2016, Genscape submitted information as a follow-up to the May 2016 meeting (the June 2016 Submittal). This submittal included communications between Genscape and Gen-X and SRAC, feedstock purchase agreements with attached affidavits, pictures and video from ongoing monitoring activities, among other documents Genscape relied upon during its QAP activities at Gen-X and SRAC.

On January 4, 2017, EPA issued a notice letter (January 2017 Notice) to Genscape informing it of the Agency's intent to: (1) revoke Genscape’s registration as a third-party auditor, pursuant to 40 C.F.R. § 80.1450(g)(11)(i); (2) revoke its interim QAP A under 40 C.F.R. § 80.1469(e)(4); and (3) require Genscape to retire valid RINs to replace the 70,596,087⁷⁴ invalid A-RINs

⁷⁰ See Genscape_Tab29_0000036; see also, email from Jim Venhoff to Brent Williams, cc to Robert Barton, Susan Olson, on September 29, 2014; see also, Genscape_Tab02_0000098.

⁷¹ *United States v. Scott Carl Johnson*, No. 4:15-CR-6042-SMJ, at 6 (E.D. Wash. Nov. 24, 2015).

⁷² See, E-mail from Brent Williams, Attorney-Advisor, to Susan Olson, Genscape Vice President of Biofuels, with Tahani Rivers, Attorney-Advisor, Jeff Kodish, Attorney-Advisor, and Mary Manners, Deputy Director of EPA Compliance Division, carbon copied (Feb. 11, 2016, 10:18 MST); see also <https://www.epa.gov/enforcement/civil-enforcement-renewable-fuel-standard-program> for a posting on the EPA website of notification to parties involved.

⁷³ See 40 C.F.R. § 80.1474(b)(4).

⁷⁴ Though Genscape verified 71,394,322 invalid A-RINs generated by Gen-X and SRAC during the interim period, Genscape is only required to replace the invalid A-RINs that were used for compliance. There were 46,913 invalid A-RINs that Gen-X and SRAC had already replaced or had never transferred; Genscape is not responsible for replacing those. EPA stated in the January 2017 Notice Letter that the total number of RINs Genscape had verified was 71,347,409, which is equal to 71,394,322 minus the 46,913 RINs. EPA also stated that, as of October 25, 2016,

Genscape verified that were used for compliance purposes, pursuant to 40 C.F.R. §§ 80.1470(d) and 80.1474(b)(5)(i).

On April 17, 2017, Genscape submitted a response (April 2017 Response) to the January 2017 Notice, which included approximately 88GB of data. Also, on April 17, 2017, Genscape retired (with reservations) 1,427,886 RINs in compliance with the regulatory requirement to replace two percent of the invalid A-RINs generated during the interim period that Genscape verified and that were used for compliance, which totaled 71,347,409.⁷⁵

On February 6, 2018, Genscape met in person with EPA personnel in Washington, D.C., while EPA personnel in Ann Arbor and Denver participated remotely. At this meeting, EPA asked Genscape questions arising from the review of Genscape's April 2017 Response. After this meeting, EPA sent Genscape a list of the questions asked during the meeting and others that arose out of the meeting discussion.

On May 8, 2018, Genscape submitted additional information in response to some of the EPA questions discussed during the February 2018 meeting. Genscape submitted additional information in response to the remaining questions on June 29, 2018 (collectively, these two responses are the May 2018 Response).

On May 31, 2018, Genscape met with EPA personnel and Assistant Administrator for the Office of Air and Radiation, Bill Wehrum, in Washington, D.C., while other EPA personnel in Ann Arbor and Denver participated remotely. At this meeting, which Genscape requested, Genscape and EPA discussed a few questions that remained from the February 6, 2018, meeting.

Since the May 31, 2018, meeting, EPA and Genscape have exchanged correspondence and held telephone calls.

The United States Department of Justice also entered into an initial tolling agreement with Genscape, which tolled EPA's claims until March 31, 2019, and an amended tolling agreement, which extended the tolling period until June 30, 2019.

III. EPA's regulatory authority to revoke a QAP auditor's registration, QAP A, and require RIN replacement.

This section describes the actions EPA is taking against Genscape, the regulatory authority for EPA's actions, and the general facts which support these actions. First, EPA is revoking Genscape's registration as a QAP auditor pursuant to 40 C.F.R. § 80.1450(g)(11). Second, EPA is revoking Genscape's QAP A under 40 C.F.R. § 80.1469(e)(4). Third, although not required by

67,998,685 invalid A-RINs had been retired for compliance, but that additional invalid A-RINs could be retired until March 31, 2017. As of March 26, 2019, an additional 2,597,402 invalid Gen-X and SRAC A-RINs were used for compliance. Thus, the total number of invalid Gen-X and SRAC A-RINs generated during the interim period that were used for compliance is 70,596,087. See Appendix A for a list of the 70,596,087 invalid A-RINs used for compliance purposes.

⁷⁵ See email from Susan Olson, Genscape Managing Director of Ag & Biofuels, to Mary Manners, OTAQ Compliance Division Deputy Director, Brent Williams, OTAQ Compliance Division Attorney Adviser, and John Weihrauch, OTAQ Fuels Compliance Data Center Director (Apr. 17, 2017, 5:23 PM EST).

the regulations, EPA is formally deeming all of the Gen-X and SRAC RINs invalid. Fourth, EPA is requiring that Genscape replace the remaining 69,168,201 invalid Gen-X and SRAC A-RINs it verified and that were used for compliance purposes pursuant to 40 C.F.R. §§ 80.1470(d) and 80.1474(b)(5)(i).

A. EPA is revoking Genscape’s QAP auditor registration due to its failure to verify elements in its QAP.

Section 80.1450(g)(11) states that EPA may “revoke the registration of a third-party auditor if the [EPA] determines that the auditor has failed to fulfill any requirement of this subpart.” EPA is revoking Genscape’s registration under 40 C.F.R. § 80.1450(g)(11) because it has determined that Genscape failed to fulfill the requirement at 40 C.F.R. 80.1472(a)(3) that “[e]ach [QAP] audit shall verify every element contained in an applicable and approved QAP.”⁷⁶ Genscape, as a QAP auditor in the RFS program, was required to implement its QAP to assess whether a facility was producing renewable fuel and generating RINs in compliance with the RFS regulations. If it determined that a facility was producing valid renewable fuel, then it could verify the associated RINs, which were then given the elevated status of “QAPed RINs.” This label was intended to represent to the purchaser of those RINs that it was buying RINs that had been closely examined by a QAP auditor who had determined their validity. As explained in detail in Section IV, Genscape failed to verify every element in its approved QAP during its auditing of Gen-X and SRAC. Specifically, Genscape failed to verify the ongoing QAP requirements:

- “[f]eedstock is not renewable fuel for which RINs were previously generated;”⁷⁷
- “[f]eedstocks are renewable biomass as defined in § 80.1401;”⁷⁸
- separated food waste feedstock was collected according to a food waste plan;⁷⁹ and
- “[r]enewable fuel was intended and sold for qualifying uses as transportation fuel, heating oil, or jet fuel.”⁸⁰

1. Feedstock cannot be renewable fuel used to generate duplicate RINs.

Genscape incorporated the regulatory requirement that “[f]eedstock is not renewable fuel for which RINs were previously generated” into its Final QAP at (1)(i)(G). During its Field Inquiry and For-Cause Audit⁸¹ of SRAC, Genscape made findings relating to SRAC using finished fuel

⁷⁶ The term “verify” is not defined in either the CAA or EPA’s RFS regulations. Accordingly, EPA applies the plain dictionary meaning to this term. The Merriam-Webster online dictionary defines “verify” to mean “to establish the truth, accuracy, or reality” of something. Merriam-Webster Online Dictionary at <https://www.merriam-webster.com/dictionary/verify>, last accessed on April 15, 2019.

⁷⁷ 40 C.F.R. § 80.1469(a)(1)(i)(G).

⁷⁸ 40 C.F.R. § 80.1469(a)(1)(i)(A).

⁷⁹ 40 C.F.R. § 80.1426(f)(5)(ii). *See also*, 40 C.F.R. § 80.1450(b)(1)(vii).

⁸⁰ 40 C.F.R. § 80.1469(a)(3)(i)(G).

⁸¹ A For-Cause Audit is defined in Genscape’s QAP as “[a] process of investigating RINs validity during which the RINs generated by the Facility will not be validated as QAP-A or QAP-B RINs. The result of a For-Cause Audit is

as a feedstock.⁸² Per its QAP, Genscape was then obligated to take concrete actions to ensure that multiple RINs were not generated from that fuel. Specifically, Genscape had to acquire SRAC's product transfer documents (PTD) to determine which fuel batches were produced from feedstock that was off-spec or renewable fuel.⁸³ It had to cross-check the PTD information with separate renewable fuel and feedstock production data.⁸⁴ Genscape then had to take steps to confirm that RINs were not previously generated for the renewable fuel or off-spec renewable fuel that was used as feedstock.⁸⁵ In cases where it had been, Genscape was required to ensure that corrective action and EPA notification steps were taken.⁸⁶

Genscape argues that it was not required to meet QAP requirements (1)(i)(G)(d)(i) – (iii) at SRAC because it did not first determine that feedstock was renewable fuel or off-spec renewable fuel. However, Genscape's argument is inconsistent with its actions and documented evidence. As described in more detail in Section IV, Genscape's Field Inquiry and For-Cause Audit Findings Report describe its findings concerning a fuel-to-feedstock cycle. It also issued Gen-X and SRAC a notice that the RINs it generated between November and December 2013 were potentially invalid.⁸⁷ In addition, it required that SRAC implement a procedure in which it would mark finished fuel with red dye to ensure it did not circle back to the facility as feedstock.⁸⁸ It also had Gen-X/SRAC implement an Employee Code of Conduct requiring employees to combat fraud.⁸⁹ All of these actions and others described in Section IV demonstrate its findings relating to a fuel-to-feedstock cycle. Thus, it was required but failed to meet all of the applicable requirements in QAP(1)(i)(G)(d)(i)-(iii). Genscape's actions were inconsistent with its obligations under the QAP and applicable regulations and its failure to implement these QAP requirements arguably led to the fraudulent scheme continuing.

2. Feedstock must be renewable biomass.

Genscape incorporated the regulatory requirement that "feedstocks are renewable biomass as defined in § 80.1401"⁹⁰ into its Final QAP at (1)(i)(A).⁹¹ This section requires, among other things, that Genscape perform Third Party Confirmations of feedstock purchases.⁹² Additionally,

the determination of valid or invalid RINs. The For-Cause Audit may require the completion of an Approved Remediation Procedure by the Facility to align with RFS2 requirements." Genscape Final QAP, at 2.

⁸² Genscape stated on page 1 of its 2014 PIR Notice that "[i]t has collected information that may suggest that at least a significant portion of the feedstock used by SRAC to produce 'G-Force' fuel additive between November 1, 2013, and December 3, 2013, was actually finished fuel delivered back to the SRAC facility as feedstock, thereby forming a 'fuel-to-feedstock' cycle." Genscape_Tab02_0000001.

⁸⁵ Final QAP (1)(i)(G)(d)(iii). See Genscape_Tab29_00000014-15.

⁸⁶ Final QAP (1)(i)(G)(d)(iii)(1) & (2). See Genscape_Tab29_00000014-15.

⁸⁷ Genscape_Tab_02_0000001-7.

⁸⁸ Genscape_Tab23_0000001, see, e.g., Genscape_Tab05_0001388.

⁸⁹ Genscape_Tab05_0001388.

⁹⁰ 40 C.F.R. § 80.1469(a)(1)(i)(A).

⁹¹ Genscape claims that (1)(i)(A)(f) is a follow-on procedure from (1)(i)(A)(e) and was never triggered. EPA does not agree, as section (f) is a standalone section and not a subsection to (1)(i)(A)(e). The QAP also clearly defines "For-Cause Audit," and this term is not specific to section (e).

⁹² Final QAP (1)(i)(A). See Genscape_Tab29_0000004.

this section of Genscape's Final QAP states that "[d]uring a For-Cause Audit, feedstock purchases will be examined over a period of at least 30 days before the trigger event. Third Party Confirmations of feedstock purchase(s) for the audit period will be used to assure the feedstock type and if a feedstock change occurred."⁹³ Genscape failed to meet these requirements because it failed to examine a period of at least 30 days of feedstock purchases for two of its three feedstock suppliers. Due to its failure to verify this QAP requirement, Genscape did not verify the "feedstock type" used. That feedstock in fact was non-qualifying finished fuel used to generate duplicate RINs or renewable fuel that was never produced at all.⁹⁴ Section IV describes in detail how Genscape failed to meet these QAP requirements, its findings relating to finished renewable fuel being used as feedstock, and its decision to verify the RINs generated from this fuel regardless of this information.

3. The feedstock source must be examined to ensure it is from a qualifying feedstock.

Section 80.1426(f)(5)(ii), incorporated into Genscape's Final QAP at section (1)(i)(B)(a), requires that Genscape ensure that a renewable fuel producer's Separated Food Waste Plan (SFWP) has been submitted to and accepted by the EPA. Section (1)(i)(B)(c) of the QAP requires that Genscape assure, during an initial site visit, that the requirements for separating the food waste are in accordance with the SFWP. SRAC's SFWP states the feedstocks "come from two primary supply chains: 1. Fats, oils, and grease components *collected directly from the generators*, [and] 2. Third-Party Suppliers or Brokers of fats, oils, and grease components who *collect directly from the generators*" (emphasis added).⁹⁵ Genscape failed to meet QAP Section (1)(i)(B)(c) because it failed to assure that SRAC collected its feedstocks in accordance with its SFWP. SRAC's feedstock *did not come directly from a generator*, here Columbia, Centennial, or Grease Depot. And *none* of the three feedstock suppliers, Columbia, Centennial, and Grease Depot, *collected directly from the generators*; Genscape never determined where Columbia, Centennial, or Grease Depot sourced its feedstock. Therefore, it failed to meet the SFWP related QAP requirement in (1)(i)(B)(c).

Section 80.1426(f)(5)(ii), incorporated into Genscape's Final QAP at section (1)(i)(B)(f), requires Genscape "For a Facility not self-collecting feedstock [which SRAC did not do], perform a Third Party Confirmation for each unique counterparty [here, Columbia, Centennial, and Grease Depot] providing separated waste that has not been confirmed prior."⁹⁶ The Final QAP defines Third Party Confirmation as a process where Genscape "documents the business existence and typical activities of the third party."⁹⁷ Genscape failed to meet this requirement because it did not determine that Centennial, Grease Depot, and Columbia were feedstock marketers/brokers until well after completion of the retrospective audit.

⁹³ Final QAP (1)(i)(A)(f). See Genscape_Tab29_0000008-9.

⁹⁴ *United States v. Scott Carl Johnson*, No. 4:15-CR-6042-SMJ, at 1 (E.D. Wash. Nov. 24, 2015).

⁹⁵ Genscape_Tab06-QAP Audit\QAP-A SRAC\Engineering Review & Reg. Docs\Separated Food Waste Plan.

⁹⁶ Final QAP (1)(i)(B)(f). See Genscape_Tab29_0000010.

⁹⁷ Final QAP Definitions, at 2. See Genscape_Tab29_0000002.

4. Renewable fuel must be intended and sold for qualifying purposes.

Genscape incorporated the ongoing regulatory requirement that “[r]enewable fuel was intended and sold for qualifying uses as transportation fuel, heating oil, or jet fuel”⁹⁸ into its Final QAP at (3)(i)(G). This section requires that Genscape perform a Third Party Confirmation of each fuel recipient.⁹⁹ As explained in more detail in Section IV, Genscape failed to meet the Third Party Confirmation requirements regarding SRAC’s only two fuel purchasers, Advanced Development International (ADI) and Trooper Recycling (Trooper).

B. EPA is revoking Genscape’s QAP A which was inadequate in practice.

Section 80.1469(e)(4) states: “[t]he EPA may revoke its approval of a QAP for cause, including, but not limited to, an EPA determination that the approved QAP has proven to be inadequate in practice.” EPA is revoking Genscape’s QAP A because EPA has determined that Genscape’s QAP A has proven inadequate in practice since Genscape verified 71,394,322 invalid Gen-X and SRAC A-RINs¹⁰⁰ while implementing its QAP A. As described in detail in Section IV, there was overwhelming evidence of a fuel-to-feedstock cycle before Genscape. The fact that Genscape assembled such extensive documentation and still verified the RINs speaks to the inadequacy of its QAP A plan in practice.

C. EPA deems all of Gen-X and SRAC’s RINs invalid.

Genscape has argued that under 40 C.F.R. § 80.1474, EPA must make “an express finding that a given RIN is indeed ‘invalid’—not just ‘potentially invalid’—prior to directing a party to replace such RIN.”¹⁰¹ EPA flatly disagrees with that reading of the regulation. Section 80.1474(b)(4)(i) lays out three options for a RIN generator, in this case Gen-X and SRAC, after EPA has notified that RIN generator, as EPA did here on December 24, 2015, that a RIN is potentially invalid: (A) retire the potentially invalid RIN, (B) retire a valid RIN, or (C) submit a demonstration in writing that the RIN is valid. It is only if the RIN generator chooses the third option, (C), that EPA must take any further action (determine the demonstration is not satisfactory which means the “[Potentially Invalid RIN] will be deemed invalid”) before requiring a QAP auditor to replace the RINs under 40 C.F.R. § 80.1474(b)(5)(i). The RIN generators in this case did not do (A), (B) or (C) in response to EPA’s notification of potentially invalid RINs—they retired no RINs and attempted no demonstration that the RINs at issue were in fact valid. Thus, the RIN generator “failed to perform a corrective action” under 40 C.F.R. § 80.1474(b)(4)(i). Accordingly, EPA had no requirement to make any additional findings or determinations before notifying Genscape that it must retire valid RINs under 40 C.F.R. § 80.1474(b)(5)(i). Regardless, even though it is an unnecessary step, this final action expressly finds that the 71,394,322 Gen-X and SRAC RINs that Genscape verified during the interim period are invalid for all the reasons described in Section IV below.

⁹⁸ 40 C.F.R. § 80.1469(a)(3)(i)(G).

⁹⁹ Final QAP (3)(i)(G)(b). *See* Genscape_Tab29_0000030.

¹⁰⁰ Note, Genscape also verified approximately 28 million A-RINs and 88 thousand Q-RINs generated by Triton Energy, LLC, which are invalid. *See United States v. Witmer*, Case No. 1:16-cr-64, Document 3, United States District Court, Northern District of Indiana, Fort Wayne Division (Sept. 19, 2016) at 8.

¹⁰¹ Genscape_0037-38.

D. EPA is requiring Genscape replace the Gen-X and SRAC RINs it verified.

EPA is requiring Genscape replace the Gen-X and SRAC RINs. Specifically, Genscape verified 71,394,322 fraudulently generated Gen-X and SRAC RINs as A-RINs. Of those, 70,596,087 were used for compliance purposes. On April 17, 2017, Genscape retired (with reservations) 1,427,886 RINs (two percent of 71,347,409¹⁰²). Under 40 C.F.R. § 80.1470(c), a two percent cap is normally placed on the number of RINs a QAP auditor is required to replace or retire. However, the regulations also provide that “[t]he cap on RIN replacement does not apply when invalid verified RINs are a result of auditor error, omission, negligence, fraud, collusion with the renewable fuel producer, or a failure to implement the QAP properly or fully.”¹⁰³ EPA finds, for the reasons described in Section IV, that Genscape verified the Gen-X and SRAC RINs as a result of failing to implement its QAP properly or fully, auditor error, or negligence. These failures provide the basis for EPA requiring Genscape to retire valid RINs for the remaining 69,168,201 invalid Gen-X and SRAC A-RINs used for compliance purposes that Genscape audited and verified.¹⁰⁴

For the D5 RINs it must replace, Genscape must retire valid current or prior year D3, D4, D5, or D7 RINs to comply with this RIN replacement requirement. EPA also recognizes that Genscape will still have annual reports to submit to EPA through its QAP registration; as such, EPA will allow Genscape to submit those reports using its RIN owner registration, which will continue to be active until Genscape replaces the remaining invalid RINs and submits the related reports.

The following pages provide a detailed explanation for EPA’s actions, which are based on EPA’s evaluation of Genscape’s submittals of information, including, but not limited to, Genscape’s June 2016 Submittal, April 2017 Response, and May 2018 Response. EPA’s actions are consistent with the CAA and the regulations promulgated thereunder.

IV. Information supporting EPA’s decision to revoke Genscape’s registration, QAP A, and require RIN replacement.

EPA has conducted a careful and exhaustive review of the information that Genscape has provided. EPA finds that the information in the sections that follow demonstrate Genscape’s failure to meet the applicable regulatory requirements and necessitates EPA’s actions described in Section III to uphold the integrity of the QAP Program. As Genscape itself said, at the end of auditing Gen-X and SRAC for over 90 days, it was “unable to positively verify the origination of feedstock at SRAC back to the grease source...[or] the downstream end use of the fuel. Gen-X

¹⁰² Gen-X and SRAC had generated, and Genscape verified, 71,394,322 A-RINs during the interim period, however Genscape is not responsible for replacing the 46,913 A-RINs that Gen-X and SRAC had already replaced or had not transferred. Thus, Genscape was required to replace two percent of the total less what was already replaced or never transferred, $71,394,322 - 46,913 = 71,347,409$. See also *supra*, note 74.

¹⁰³ 40 C.F.R. § 80.1470(d).

¹⁰⁴ Of the 71,347,409 invalid RINs Genscape is responsible for, Genscape must replace all the 70,596,087 invalid Gen-X and SRAC A-RINs that were retired for compliance purposes. Genscape already retired 1,427,886 RINs, thus leaving 69,168,201 RINs EPA is requiring it replace. See also *supra*, note 74.

has not been able to provide information about its supply chain to dispel concerns about fuel to feedstock use.”¹⁰⁵

A. Field Inquiry (November 11-December 5, 2013) - Genscape’s Field Inquiry findings did not support RIN verification.

As Genscape was performing routine remote monitoring at SRAC, it “noticed anomalous transportation characteristics surrounding [SRAC]....”¹⁰⁶ Genscape stated that “[m]arket feedback¹⁰⁷ along with these observations raised concerns about the possibility of fuel re-entering the feedstock supply chain at SRAC.”¹⁰⁸ In an attempt to resolve these concerns, Genscape performed a “Field Inquiry,”¹⁰⁹ which consisted of “on-the-ground observations of logistics patterns, expected fuel delivery locations and feedstock pick-up locations.”¹¹⁰ In Genscape’s own words, its Field Inquiry findings “did not alleviate [its] supply chain concerns....”

1. Fuel Purchasers: ADI and Trooper.

Genscape performed a Field Inquiry during November and December 2013.¹¹¹ Genscape’s Field Inquiry findings identified the following issues regarding the fuel delivery locations:

- “The infrastructure at the expected fuel delivery locations did not appear consistent with fuel unloading, transloading, or storage sites.”¹¹²
- “During the observation periods, most deliveries from SRAC arrived at locations other than the expected fuel delivery locations.”¹¹³
- “At two of the intermediate locations [e.g., Pawn Shop Storage], trailers leaving SRAC were observed entering the intermediate locations, and trailers leaving these locations were observed traveling back to SRAC.”¹¹⁴

¹⁰⁵ Genscape_Tab02_0000015.

¹⁰⁶ Genscape_Tab02_0000009.

¹⁰⁷ Genscape does not define “market feedback,” but it appears to have relied on this information when initiating the Field Inquiry.

¹⁰⁸ Genscape_Tab02_0000009.

¹⁰⁹ The Field Inquiry was led by Creed Gann of Genscape, who had multiple titles at Genscape, at this time he was the Genscape Ag. & Biofuels Director of Operations.

¹¹⁰ Genscape_Tab02_0000009. Creed Gann and Justin Stenger, Genscape Ag & Biofuels Field Technician (who only went to the SRAC production facility and Centennial Transload observations during one part of the Field Inquiry), 12/2/2013 to 12/5/2013.

¹¹¹ Genscape_Tab02_0000017.

¹¹² Genscape_Tab02_0000010.

¹¹³ *Id.* It is of note that on 12/2/13 and 12/3/13, Genscape observed no activity relating to fuel deliveries or transloading at ADI despite the fact that SRAC provided Genscape records that a total of 35 fuel truckloads were shipped from SRAC to ADI on 12/2/13 and 12/3/13.

¹¹⁴ Genscape_Tab02_0000010.

- “Over multiple days of observation, only one trailer leaving SRAC was able to be confirmed arriving at an expected delivery destination.”¹¹⁵
- “[P]eople at businesses nearby one delivery location and one receipt location...” reported in interviews with Genscape representatives that they observed no trailer or truck traffic near those locations.¹¹⁶

2. Genscape’s auditor was aggressively followed during its Field Inquiry.

During the timeframe of Genscape’s Field Inquiry, a Genscape auditor was following an SRAC fuel delivery truck “to establish delivery routes from the Pawn Shop Storage location.”¹¹⁷ Genscape documented in its Field Inquiry and For-Cause Audit Findings Report that “[w]hile driving, the auditor noted that he was ‘aggressively followed by a Chevy/GMC SUV.’ The auditor called Greg Vierra at SRAC during the incident and 5 minutes later the SUV stopped following the auditor.”¹¹⁸ This is a very strange occurrence, and that the auditor thought to call SRAC because of an “aggressive[] follow[er]” is further indication of SRAC circumstances that a Genscape auditor, rightly, found suspicious.

3. Feedstock Suppliers: Columbia, Centennial, and Grease Depot

During the Field Inquiry timeframe, SRAC contracted with only three feedstock suppliers: Columbia Industrial Products (Columbia), Centennial Transload Inc. (Centennial), and Grease Depot. Genscape could not locate delivery or transloading infrastructure at Columbia.¹¹⁹ It also could not locate infrastructure for feedstock handling or storage at the original address provided for Centennial.¹²⁰ Then, SRAC provided a second address for Centennial’s operations.¹²¹ At the second Centennial location, Genscape again documented the absence of signs, equipment, and truck or trailer traffic, and that no person employed at nearby businesses had observed such activity at that location.¹²² Lastly, Genscape observed that only one of the three feedstock suppliers, Grease Depot, maintained infrastructure consistent with a waste grease collection operation.¹²³

¹²³ *Id.*

Genscape was unable to resolve its fuel-to-feedstock cycle concerns through its Field Inquiry and initiated a For-Cause Audit.¹²⁴ On December 18, 2013, Genscape notified Scott Johnson that it was initiating a For-Cause Audit, pursuant to its QAP.¹²⁵ Genscape stated that:

“...Genscape was *unable* to perform Third Party Confirmation(s) of Southern Resources and Commodities LLC fuel recipients to confirm that the business activities were consistent with the product received. Genscape was unable to determine a location where fuel was received by one or more Third Party(ies), and Genscape was unable to locate the named fuel recipient(s) or the unloading infrastructure, such as personnel or pumping and/or storage facilities, at the fuel receipt point(s) named in the documentation and conversations provided by Southern Resources and Commodities LLC and/or named customer(s). Based on the [sic] Genscape’s EPA approved QAP plan, the inability to perform Third Party Confirmation(s) triggers a For-Cause Audit.”¹²⁶ (emphasis in original).

Genscape performed the formal For-Cause Audit from January to September of 2014.¹²⁷

B. Genscape failed to account for the substantial drop in Gen-X and SRAC RIN production in December 2013 following issuance of its For-Cause Audit.

After Genscape issued the notice of a For-Cause Audit to Gen-X regarding its SRAC subsidiary facility on December 18, 2013, the QAP and EPA moderated transaction system (EMTS) data indicated that both the SRAC and Gen-X facilities generated substantially fewer RINs.¹²⁸ In fact, between May and November 2013, the monthly RIN production for SRAC generally increased month after month, peaking at more than 8.5 million RINs in October 2013.¹²⁹ The same general month after month increase occurred at Gen-X, with a peak around 5 million RINs in October 2013.¹³⁰ In December 2013, RIN generation at SRAC plummeted to almost nothing, and after the For-Cause Audit notice, between mid-December 2013 and June 2014, the monthly RIN production remained relatively low.¹³¹ These RIN generation statistics were readily available to Genscape via EMTS, before they verified the RINs at issue in September 2014.

In its April 2017 Response, Genscape claims that one of the reasons that Gen-X and SRAC’s RIN generation numbers plummeted was because the For-Cause Audit made business challenging for them due to the “highly competitive feedstock market.”¹³² However, this argument is unsupported by Genscape’s own April 2017 Response, in which it lists all of the

¹³² Genscape_0021.

new feedstock suppliers that SRAC worked with during and following the For-Cause Audit.¹³³ For certain months (e.g., March and April 2014), SRAC listed significantly more feedstock suppliers than it had worked with prior to the For-Cause Audit.¹³⁴

Genscape also asserts “a steep, industry-wide decline in biodiesel production” as a reason for the depressed production levels.¹³⁵ To start, the reference to biodiesel is confusing, since the fuel at issue is renewable diesel, not biodiesel.¹³⁶ More importantly, the claim is unsubstantiated because SRAC had entered into contracts to sell D5 RINs to Murex at fixed prices, that were above market prices through the end of 2013, so that a drop of RIN prices would not have caused such an abrupt drop in production on December 3, 2013, prior to the termination date of these contracts.¹³⁷

C. For-Cause Audit Part 1 (January 28-30, 2014) – Genscape’s For-Cause Audit findings of fuel purchasers did not support RIN verification.

The For-Cause Audit was conducted in three parts.¹³⁸ In Part 1, Genscape focused on SRAC’s two fuel purchasers, ADI and Trooper, and feedstock supplier Centennial’s facility and Columbia, which refused to participate in the For-Cause Audit.¹³⁹ In Part 2, Genscape focused its For-Cause Audit on its three feedstock suppliers Columbia, Centennial’s office location, and Grease Depot.¹⁴⁰ In Part 3, when it was still unable to resolve its concerns about finished fuel being reused as feedstock at SRAC, Genscape’s For-Cause Audit focused on additional analysis procedures.¹⁴¹

1. ADI (fuel purchaser).

Genscape’s auditor, Creed Gann, who had previously conducted the Field Inquiry at ADI, recorded unanticipated activities at, and modifications to, ADI’s location between what appears as an unannounced December 2013 Field inquiry and the prearranged January 2014 For-Cause Audit.¹⁴² The changes included new signage posted¹⁴³ and the presence of portable pumps that may have been rented.¹⁴⁴ Additionally, the hoses connected to some of the equipment appeared

lightly used or unused,¹⁴⁵ and there was no metering equipment, weigh scales, or storage level meters.¹⁴⁶ Genscape observed trailers and trucks unloading at ADI whose appearance matched those seen at SRAC, but this was unexpected, because based on QAP documentation, Genscape understood that SRAC would not be producing fuel during the For-Cause Audit.¹⁴⁷ ADI employees would not answer auditor questions or fulfill auditor requests for fuel receipts.¹⁴⁸ At the end of the For-Cause Audit site visit, Genscape had identified ongoing issues at the ADI facility and made the ultimate decision that “the site visits did not close the For-Cause Audit.”¹⁴⁹

a. Genscape’s defenses relating to ADI and EPA’s responses.

Despite these documented findings, and Genscape’s own 2014 PIR Notice, issued *after* the culmination of the Field Inquiry and For-Cause Audit, Genscape now makes the following arguments to explain how its concerns regarding ADI were addressed¹⁵⁰:

i. G: Genscape now asserts there is nothing inherently suspect about the facility changes, i.e., signage, that Genscape previously identified as suspect in its Field Inquiry and For-Cause Audit Findings Report.¹⁵¹

EPA: Genscape’s current argument is inconsistent with the findings its own auditors documented in 2014.¹⁵² Specifically, Genscape wrote: “the [For-Cause Audit] visits raised additional questions and concerns about the legitimacy of the fuel end users. Namely: 1. Apparent changes occurred to the infrastructure at each delivery site in December and the For-Cause Audit visit in late January.”¹⁵³ Furthermore, Genscape’s own actions subsequent to the Field Inquiry and For-Cause Audit (i.e. issuing the 2014 PIR Notice and requiring ongoing assurance measures)¹⁵⁴ do not align with its current proposition that the infrastructure changes “...did not present concerns...”¹⁵⁵

ii. G: Genscape asserts that SRAC explanations resolved its auditor(s)’ findings¹⁵⁶ (for example: “[i]nformation from SRAC indicated that Genscape’s concerns about lack of metering equipment, weigh scales, and storage level meters at fuel delivery locations

¹⁵⁵ Genscape_Tab08_0000010.

¹⁵⁶ *Id.*

were misplaced. SRAC had not noted abnormalities during visits to supply chain locations...”¹⁵⁷).

EPA: Genscape was required by its Final QAP section (3)(i)(G)(b) to make Third Party Confirmations of each unique fuel recipient. It was unable to do so, and instead used documentation from the very producer (SRAC) it was auditing; such documentation clearly does not satisfy the Third Party Confirmation requirements which is also a failure to comply with the requirements of 40 C.F.R. § 80.1469(a)(3)(i)(G) that renewable fuel was intended and sold for qualifying uses as transportation fuel, jet fuel, or heating oil.¹⁵⁸

- iii. G: Genscape claims that ADI gave it records of transactions with SRAC that “matched identically with records provided by SRAC to Genscape for the same transactions.”¹⁵⁹

EPA: The documents referenced by Genscape (Tab 16) contain SRAC logo/heading and appear to be generated by SRAC.¹⁶⁰ The comparison of two sets of the same records does not constitute independent verification of the same transactions.¹⁶¹

- iv. G: Genscape currently argues that during its January 28, 2014, visit to ADI, SRAC was not delivering fuel to ADI, but other suppliers were transloading fuel, indicating a functioning business.¹⁶² Genscape also claims that ADI was using intermediate transloading locations.¹⁶³ In addition, Genscape pointed to “[b]ills of lading, weigh scale tickets, invoices and receipts related to ADI indicated that timing of some trucks arriving at and departing from SRAC were consistent with transloading and the use of intermediate locations.”¹⁶⁴

EPA: Returning to its Field Inquiry and For-Cause Audit Findings Report, written in 2014, Genscape documents that during its January 28, 2014 visit to ADI “[a] fuel hose was connected to at least one truck. Pumps were active, appearing to be unloading one or more trucks. The trucks and trailers matched the description of the trucks and trailers observed at SRAC. Based on QAP documentation, the auditor did not expect SRAC to be producing fuel during the For-Cause Audit.”¹⁶⁵ Currently, Genscape has arrived at a finding that it was not SRAC, but another company delivering fuel, without any explanation supporting its changed position.¹⁶⁶ Even, assuming *arguendo* that other suppliers were transloading fuel at ADI on that day, this does not address whether SRAC delivered qualifying fuel to ADI. In addition, Genscape has not provided EPA with any evidence that transloading equipment or infrastructure was present at any intermediate

location. Also, there are no documents showing delivery of material to/from any intermediate location. The address of the intermediate location is not listed on any bill of lading, invoice, product transfer document, or transportation records.

- v. G: Genscape offers that its findings of infrastructure anomalies at ADI were assuaged by its understanding of purportedly comparable infrastructure in the oil and gas industry. For example, Genscape provides that: “[t]he use of rented or portable tankers were not a concern because Genscape in its knowledge of the oil and gas industry was aware of the type of pumps and tanks used for commercial operations in oil and gas E[xploration] & P[roduction]. Members of the QAP team had knowledge of these kinds of pumps and tanks from previous operational involvement in the gas information business, and determined there was nothing suspect with regard to ADI’s use of similar equipment.”¹⁶⁷

EPA: Although Genscape equates familiarity with the oil and gas industry to the renewable fuel industry, they are not the same industries. Familiarity with one does not equate to common practice in the other. Assuming *arguendo* that the auditors’ knowledge of the oil and gas industry was relevant, that does not resolve the discrepancy between Genscape’s initial finding in its Field Inquiry and For-Cause Audit Findings Report of the ADI infrastructure irregularities, written at the time and with no explanation of the practice being commonplace in the oil and gas industry, and Genscape’s post hoc explanations. Based on the collective experience of EPA’s own inspectors who have been intimately involved in the RFS program since its inception, it is not common practice for renewable fuel facilities to utilize temporary, rented equipment.

- vi. G: Genscape also appears to now claim that ADI was or had the capacity to be a fuel broker.¹⁶⁸

EPA: Genscape takes EPA on a journey regarding ADI, where it attempts to dismiss the anomalies that it witnessed at ADI’s facility and the documents it reviewed regarding that same facility using the various explanations laid out above. Genscape offers conflicting views of what type of facility ADI was, describing it as a fuel purchaser¹⁶⁹ and a fuel broker.¹⁷⁰ Regardless, Genscape was required to know what kind of business ADI was conducting since Final QAP section (3)(i)(G) requires that Genscape perform a Third Party Confirmation of each fuel recipient, and a Third Party Confirmation requires that Genscape “documents the business existence and typical activities of the third party.” Clearly, Genscape not knowing the type of entity ADI was demonstrates that Genscape did not confirm ADI’s type of business or activities through its required Third Party Confirmation, thus, at a minimum, failing to meet QAP section (3)(i)(G).

¹⁶⁷ Genscape_Tab08_0000011-12.

¹⁶⁸ Genscape_0019, Genscape_Tab08_0000012.

¹⁶⁹ Genscape_0019, Genscape_Tab08_0000012.

¹⁷⁰ See, Genscape_0018-0019; Genscape_Tab08_0000010-12.

- vii. G: Genscape makes general statements about marketers' and brokers' need for confidentiality to support its argument that ADI's lack of cooperation during the For-Cause Audit was reasonable. It states, for example, that "SRAC's vendors and brokers repeatedly voiced concerns about keeping the supply chain confidential."¹⁷¹

EPA: Genscape's present day claim that it was reasonable that ADI was uncooperative with its For-Cause Audit due to its need for supply chain confidentiality is unsupported by the record. To start, there did not appear to be any efforts to maintain supply chain confidentiality during the time at issue by ADI (nor by Centennial, Columbia, or Trooper). EPA determined this through its analysis of the November 7, 2013, and November 20, 2013, weigh tickets in which two of SRAC's three feedstock suppliers appeared to be sharing Trailers 800360 and 800145, and Dion and Kevin as drivers.¹⁷² Both drivers, their trucks, and the trailers made feedstock pick-ups from Centennial and Columbia and fuel deliveries to ADI and Trooper.¹⁷³ In addition, Genscape clearly articulated to Gen-X that it would likely need to interview fuel purchaser employees as a component of the For-Cause Audit.¹⁷⁴ In Genscape's December 18, 2013 letter to Scott Johnson, notifying him of the For-Cause Audit, Genscape wrote it "...will likely need to interview employees at each off load facility to validate the fuel receipts as part of the For-Cause Audit."¹⁷⁵

Genscape was obligated under the regulations to verify that the renewable fuel, from which RINs were generated, was used for a qualifying purpose.¹⁷⁶ If Genscape could not obtain the information required for verification, it should not have verified the RINs generated from that fuel. Genscape was not obligated to grant A-RIN status SRAC's RINs, in the absence of necessary information. Thus, Genscape's present day argument to dismiss the need for those interviews as a part of its For-Cause Audit, particularly based on a dubious confidentiality argument, is unconvincing.

2. Trooper (fuel purchaser).

When Genscape's auditor traveled back to the Trooper address it visited in late 2013 during the Field Inquiry, there were new signs added to that location.¹⁷⁷ The Trooper representative then sent the Genscape auditor to a different location where Trooper claimed to receive, store, and transfer SRAC fuel.¹⁷⁸ At Trooper's second location, Genscape made various observations including trailer activity,¹⁷⁹ that integral pumping and storage infrastructure seemed portable and possibly rented, hoses appeared unused or lightly used, and there were not any weigh scales,

¹⁷¹ Genscape_Tab08_0000012.

¹⁷⁷ Genscape_Tab02_0000011, 38.

¹⁷⁸ Genscape_Tab02_0000012, 38.

¹⁷⁹ Genscape_Tab02_0000039.

storage level meters, or metering equipment.¹⁸⁰ It also observed that the storage tanks at Trooper were not large enough to hold the volume of even one liquid tanker truck observed at the site.¹⁸¹ Trooper's employees would not answer auditor questions,¹⁸² provide requested documents,¹⁸³ or allow the Genscape auditor to take photos of the location.¹⁸⁴ Thus, Genscape's auditor identified continued issues at the second Trooper facility as well, and Genscape determined that "the site visits did not close the For-Cause Audit."¹⁸⁵

a. Genscape's defenses relating to Trooper and EPA's responses.

Similar to ADI, despite these documented findings, and Genscape's own 2014 PIR Notice, issued *after* the culmination of the Field Inquiry and For-Cause Audit, Genscape now makes various arguments, many of which are not supported by its own documentation at the time, of how its concerns regarding Trooper were addressed including:

i. G: Genscape now describes the first address it went to for Trooper Recycling during its 2013 Field Inquiry as the "contact/invoicing address" and "...not a primary fuel unloading facility."¹⁸⁶ Genscape provides that during its 2014 For-Cause Audit visit to Trooper that its representatives directed Genscape to a different address where its "...primary fuel unloading operations" were located.¹⁸⁷

EPA: As Genscape documented in its Field Inquiry and For-Cause Audit Findings Report, "[n]o signs of trucks, storage tanks or signs of trucking activity were noted at the location...[a]ccording to SRAC records provided to Genscape, eight (8) trucks were shipped to Trooper Recycling" on the day of its 2013 Field Inquiry visit to Trooper Recycling, and "[n]o other information was available to determine if the deliveries were scheduled to arrive in an alternate location than the address provided."¹⁸⁸ Genscape now appears to explain the lack of infrastructure and other anomalies it identified at the initial Trooper Recycling address based on its conclusion that it was a "contact/invoicing" address.¹⁸⁹ Yet, there is no explanation of where those eight trucks of fuel went, which according to SRAC records, were supposed to be delivered, during the day of Genscape's 2013 Field Inquiry visit, to what Genscape now describes as a "contact/invoicing" address.¹⁹⁰ Furthermore, Genscape determined, as documented in its Field Inquiry and For-Cause Audit Findings Report and summarized above, that the second address for

¹⁸⁹ *See* Genscape_0020.

¹⁹⁰ *See* Genscape_Tab02_0000019.

Trooper Recycling, which its “primary fuel unloading operations”¹⁹¹ took place was also riddled with infrastructure problems and other anomalies.¹⁹²

- ii. G: Genscape currently presents the Trooper Recycling infrastructure irregularities it documented at the second address it was given for Trooper Recycling as not presenting concerns.¹⁹³ Genscape makes various arguments including that the very presence of certain equipment it saw was indicative of a legitimate business.¹⁹⁴ It also states that rented or portable equipment is common, “particularly for brokers.”¹⁹⁵

EPA: These present-day arguments by Genscape are again in direct conflict with its own Field Inquiry and For-Cause Audit Findings Report. Specifically, in 2014, Genscape wrote “...the [For-Cause Audit] visits raised additional questions and concerns about the legitimacy of the fuel end users. Namely: 1. Apparent changes occurred to the infrastructure at each delivery site in December and the For-Cause Audit visit in late January....c. Trooper indicated that it was using a new site for unloading (receiving and delivery of G-force) that was previously unknown to Genscape before the visit...”¹⁹⁶ It also listed Trooper’s fuel delivery infrastructure issues (described above) and its representatives’ failure to answer questions as reasons for continuing the For-Cause Audit.¹⁹⁷ Now, Genscape is contending that EPA should ignore that contemporaneous documentation. Furthermore, Genscape’s own actions subsequent to the Field Inquiry and For-Cause Audit (i.e. issuing the PIR notice and requiring ongoing assurance measures) do not align with its current proposition that the infrastructure changes “...did not present concerns...”¹⁹⁸

- iii. G: Again, Genscape references its knowledge of the oil and gas industry to attempt to reconcile certain anomalous infrastructure issues that it witnessed and documented at Trooper.¹⁹⁹

EPA: Genscape’s arguments about its knowledge of the oil and gas industry is no more relevant or compelling for Trooper than it was for ADI, and directly contradicts Genscape’s later actions (issuing the 2014 PIR Notice and requiring ongoing assurance measures).

¹⁹⁸ Genscape_Tab02_0000003-7. See also letter from Susan Olson, Genscape VP of Products, Ag & Biofuels, to Scott Johnson, President & CEO, Gen-X Energy Group, on April 24, 2014.

¹⁹⁹ Genscape_Tab08_0000014.

- iv. G: Genscape relies upon SRAC to justify dismissing the infrastructure failings it identified at Trooper. Genscape states that SRAC told it that “SRAC had not noted abnormalities during visits to supply chain locations” and that SRAC had pointed to other establishments with similar designs to Trooper’s.²⁰⁰

EPA: Genscape was required by its Final QAP section (3)(i)(G)(b) to make Third Party Confirmations of each unique fuel recipient. It was unable to do so, and instead used documentation from the very producer (SRAC) it was auditing; such documentation clearly does not satisfy the Third Party Confirmation QAP requirements and shows that Genscape failed to comply with the requirements of 40 C.F.R. § 80.1469(a)(3)(i)(G) that renewable fuel was intended and sold for qualifying uses as transportation fuel, jet fuel, or heating oil.²⁰¹

- v. G: Genscape states that “Trooper independently provided records of transactions with SRAC to Genscape which match identically with records provided by SRAC to Genscape for the same transactions.”²⁰²

EPA: The documents Genscape cited for this assertion were generated by SRAC and are on SRAC letterhead.²⁰³ Additionally, the Excel documents in the tab Genscape cited in its April 2017 Response were generated by Gen-X personnel.²⁰⁴ There is no evidence that Trooper Recycling independently provided any records of transactions with SRAC. Thus, Genscape did not meet its applicable Third Party Confirmation requirements in Final QAP section (3)(i)(G) or its regulatory requirements at 40 C.F.R. § 80.1469(a)(3)(i)(G).

- vi. G: Genscape also appears to now claim that Trooper may have been a fuel broker.²⁰⁵

EPA: Genscape takes EPA on a journey regarding Trooper, where it attempts to dismiss the anomalies that it witnessed at Trooper’s initial facility address and second facility address. Genscape offers conflicting views of what type of facility Trooper Recycling was, describing it as a fuel purchaser²⁰⁶ and a fuel broker.²⁰⁷ Regardless, Genscape was required to know what kind of business Trooper Recycling was conducting since Final QAP section (3)(i)(G) requires that Genscape perform a Third Party Confirmation of each fuel recipient, and a Third Party Confirmation requires that Genscape “documents the business existence and typical activities of the third party.” Clearly, Genscape not knowing the type of entity Trooper Recycling was demonstrates that Genscape did not confirm Trooper’s type of business or activities, thus, at a minimum, failing to meet QAP section (3)(i)(G).

²⁰⁵ Genscape_Tab08_0000014-15.

²⁰⁶ Genscape_0020; Genscape_Tab08_0000014.

²⁰⁷ Genscape_Tab08_0000014-15.

- vii. G: Genscape makes various statements about marketers and brokers need for confidentiality to support its argument that Trooper Recycling's lack of cooperation was reasonable. It states that "[u]nwillingness of a feedstock buyer, who is a broker or marketer, to respond to audit inquiries is expected in the highly competitive industry."²⁰⁸ It also argues that "SRAC's vendors and brokers repeatedly voiced concerns about keeping the supply chain confidential."²⁰⁹

EPA: Genscape's present day claim that it was reasonable that Trooper Recycling was uncooperative with its For-Cause Audit due to its need for supply chain confidentiality is unsupported by the record. To start, Trooper is a fuel purchaser, not a feedstock buyer, as Genscape purports. Therefore, Genscape's arguments relating to the "unwillingness of a feedstock buyer...to respond to audit inquiries" and its related feedstock buyer arguments are irrelevant.²¹⁰ Regarding Genscape's next argument, there did not appear to be any efforts to maintain supply chain confidentiality during the time at issue by Trooper Recycling (nor by Centennial, Columbia, or ADI). EPA determined this through its analysis of the November 7, 2013, and November 20, 2013, weigh tickets in which two of SRAC's three feedstock suppliers appeared to be sharing Trailers 800360 and 800145, and Dion and Kevin as drivers.²¹¹ Both drivers, their trucks, and the trailers made feedstock pick-ups from Centennial and Columbia and fuel deliveries to ADI and Trooper.²¹² In addition, Genscape expressed to Gen-X its likely need to interview fuel purchaser employees as a component of the For-Cause Audit.²¹³ In Genscape's December 18, 2013 letter to Scott Johnson, notifying him of the For-Cause Audit, Genscape wrote it "...will likely need to interview employees at each off load facility to validate the fuel receipts as part of the For-Cause Audit."²¹⁴

Genscape was obligated under the regulations to verify that the renewable fuel, from which RINs were generated, was used for a qualifying purpose.²¹⁵ If Genscape could not obtain the information required for verification, it should not have verified the RINs generated from that fuel. Genscape was not obligated to grant A-RIN status SRAC's RINs, in the absence of necessary information. Thus, Genscape's present day argument to dismiss the need for those interviews as a part of its For-Cause Audit, particularly based on a dubious confidentiality argument, is unconvincing.

3. Centennial (feedstock supplier).

²¹⁴ Genscape_Tab02_0000084.

²¹⁵ 40 C.F.R. § 80.1469(a)(3)(i)(G).

a. Genscape's audit of Centennial's feedstock operations locations.

Genscape's auditor documented unusual conditions and activities at Centennial's facilities. As mentioned above, during the Field Inquiry, SRAC gave Genscape one address for a Centennial facility that did not align with the infrastructure of a feedstock supplier, then SRAC supplied a second address for a Centennial facility which also did not comport with a feedstock supplier. During the For-Cause Audit when Genscape visited the second address supplied by SRAC for a Centennial facility, Genscape observed modifications made to Centennial's operations between its unannounced December 2013 Field Inquiry and the prearranged January 2014 For-Cause Audit site visits.²¹⁶ The changes included new signage posted at the facility.²¹⁷ Genscape's auditor also observed lab equipment that appeared to be covered in dust and not in current use.²¹⁸ Then, Centennial personnel refused to answer auditor questions, provide requested documents, or allow the auditor to take photographs.²¹⁹ Genscape's auditor identified ongoing issues at the Centennial facility and made the ultimate decision that "the site visits did not close the For-Cause Audit."²²⁰ In addition, Genscape stated in a feedstock vendor confirmation tracking document that Centennial "failed the external and internal site visit" with Susan Olson's and Creed Gann's names next to this statement.²²¹

Note that Genscape later investigated a Centennial office location in Part 2 of its For-Cause Audit, described below. EPA lays out Genscape's explanations regarding its findings at Centennial's operations and office locations, and EPA's responses to such explanations, in Section IV.E.2. below.

4. Columbia (feedstock supplier).

During Part 1 of Genscape's For-Cause Audit, Columbia refused to allow Genscape to conduct a visit to Columbia.²²² Note that Columbia also later refused to cooperate with Genscape's request to do a "feedstock audit", during Part 2 of Genscape's For-Cause Audit, described below.²²³ EPA lays out Genscape's related explanations regarding Columbia, and EPA's responses to such explanations, in Section IV.E.1. below.

D. During Part 1 of the For-Cause Audit, Genscape failed to scrutinize the Gen-X facility in Moses, WA, despite its known business relationship with SRAC.

In a letter from Susan Olson to Scott Johnson, sent January 31, 2014, (January 2014 Letter) Genscape requested:

²¹⁶ Genscape_Tab02_0000039-40.

²¹⁷ Genscape_Tab02_0000031.

²¹⁸ *Id.*

²¹⁹ Genscape_Tab02_0000032.

²²⁰ Genscape_Tab02_0000039.

²²¹ Genscape_Tab05_0001406. Note that this document states that Centennial Transload, "a. Passed its 3rd party confirmation (Susan)...c. Mass balance audit passed (Susan), d. Suppliers confirmed (Susan)." Yet, despite passing the paperwork requirements, Centennial Transload "Failed external and internal site visit (Susan and Creed)."

²²² Genscape_Tab02_0000037.

²²³ Genscape_Tab02_0000064.

[b]ecause of the business relationship between Gen-X Energy and Southern Resources and Commodities, Genscape need[s] the following additional information *before assuring RINs* generated by the Gen-X Energy Group facility in Moses Lake, WA, as QAP RINs: 1) Affidavits from each fuel buyer from Gen-X Energy Resources that is planned for 2014 attesting to end use for transportation purposes. 2) Identification of and site access to planned 2014 delivery points for the fuel delivered from Gen-X Energy Resources. 3) Receipts of sale demonstrating the transaction path from the feedstock supplier to Gen-X Energy Resources. If RINs are generated by Gen-X prior to providing this information, the facility status for Gen-X may be changed to “Out of Tolerance” on the Genscape Platform (emphasis added).²²⁴

To date, Genscape has not provided any evidence to EPA that it obtained any of the information it requested in its January 2014 Letter (affidavits, identification of fuel delivery locations, and feedstock receipts) from Gen-X.

In EPA’s May 16, 2016, in-person meeting with Genscape, EPA asked if Gen-X provided the information Genscape requested in its January 2014 Letter, and if so, what the results were. Following that meeting, Genscape did not provide a response to EPA’s request for that information. EPA identified Genscape’s failure to obtain this information from Gen-X in its January 2017 Notice. Then, in its April 2017 Response, Genscape again failed to produce evidence that it ever obtained this information.²²⁵ In fact, Genscape did not submit any documentation demonstrating its efforts to investigate Gen-X’s planned fuel delivery sites for 2014, unlike the detailed investigation performed on SRAC’s feedstock suppliers and fuel purchasers. Genscape conducted 17 site visits at SRAC.²²⁶ On the other hand, the documentation Genscape submitted to EPA indicates that it visited Gen-X in Washington only in June and August 2013 for the retrospective audit site visits.²²⁷

Genscape now dismisses these failures by arguing that Gen-X did not produce fuel at the time of Susan Olson’s January 2014 Letter, and did not produce fuel again during the For-Cause Audit period, making her request essentially moot.²²⁸ Gen-X was idle for the majority of 2014, covering much of the time that SRAC was being investigated.²²⁹ However, Genscape made no attempt to investigate Gen-X when it suddenly began generating RINs again on December 17, 2014. In fact, within the short two-week time period between December 17 - 31, 2014, Gen-X produced more than 300,000 gallons of fuel, a large amount for such a short period of time, and generated RINs for that amount.²³⁰ However, Genscape chose to verify Gen-X’s RINs, despite

²²⁴ Genscape_Tab02_0000088.

²²⁵ EPA did review several Microsoft Excel spreadsheets documenting feedstock deliveries on a minimal number of days in July-September 2014 made to Gen-X at its Moses Lake, WA, facility; however, these spreadsheets are not the “receipts of sale” required by Genscape in order to verify Gen-X’s RINs.

never resolving the concerns Susan Olson raised in her January 2014 Letter, which Genscape described as being necessary for RIN verification.²³¹

E. For-Cause Audit Part 2 (February 19-April 9, 2014) – Genscape’s For-Cause Audit findings of feedstock suppliers did not support RIN verification.

Having failed to resolve its fuel-to-feedstock cycle concerns in Part 1 of the For-Cause Audit, Genscape proceeded to create “... an alternative methodology in an attempt to resolve the For-Cause Audit by verifying the feedstock supply chain to SRAC.”²³² Genscape explained that its objective of Part 2 of the For-Cause Audit was to “...trace the feedstock supply to SRAC back to the source of separated food waste for November and December 2013.”²³³ As shown below, Genscape failed to meet this objective for any of SRAC’s three feedstock suppliers. Furthermore, regarding this part of the For-Cause Audit, Genscape documented that SRAC purchased feedstock at a price higher than the price at which they sold the renewable fuel, which induced fuel buyers to sell feedstock back into the supply chain.²³⁴

1. Columbia (feedstock supplier).

Genscape was unable to verify that SRAC was purchasing qualifying feedstock from Columbia during the For-Cause Audit. In fact, Columbia entirely refused to cooperate with Genscape’s For-Cause Audit concerning feedstock suppliers.²³⁵ This refusal is especially significant because Columbia allegedly *provided* approximately 44 percent of the feedstock to SRAC during the specific audit month of November 2013.²³⁶ In addition, Columbia apparently *delivered* 44 percent of the finished fuel to ADI, again indicating the existence of a fuel-to-feedstock cycle.²³⁷

Genscape’s decision to verify SRAC’s RINs, despite Columbia’s failure to cooperate with Genscape’s For-Cause Audit, resulted in Genscape’s failure to fulfill its regulatory requirement to verify that “[f]eedstock is not renewable fuel for which RINs were previously generated” and the related QAP requirements in section (1)(i)(G)(d)(i) – (iii).²³⁸ Genscape also failed to fulfill its regulatory requirement to verify that “[f]eedstocks are renewable biomass as defined in § 80.1401.”²³⁹ Its Final QAP states that “[d]uring a For-Cause Audit, feedstock purchases *will* be examined over a period of at least 30 days before the trigger event. *Third Party Confirmations* of feedstock purchase(s) for the audit period *will* be used to assure the feedstock type and if a feedstock change occurred” (emphasis added).²⁴⁰ As explained above, Columbia refused to

cooperate with Genscape's feedstock supplier audit; thus, Genscape failed to complete Third Party Confirmations of SRAC feedstock purchases in QAP section (1)(i)(A)(f).

a. Genscape Defenses Regarding Columbia and EPA's Responses.

Despite Genscape's documentation that Columbia failed to cooperate with its For-Cause Audit, and Genscape's own 2014 PIR Notice, issued *after* the culmination of the Field Inquiry and For-Cause Audit, Genscape now makes various arguments, many of which are not supported by its own documentation at the time, of how its concerns regarding Columbia were addressed including:

- i. G: Columbia refused to cooperate with Genscape because of concerns regarding the confidentiality of its feedstock sources.²⁴¹

EPA: This assertion about feedstock source confidentiality is dubious, and, in any case, is not grounds for failing to meet requirements of the QAP. Genscape not only offered confidential treatment of information when performing third-party verification, but also entered into non-disclosure agreements with Centennial²⁴² and Grease Depot;²⁴³ it could easily have done the same for Columbia. Furthermore, Genscape was obligated under the regulations to verify that the feedstock being used met the requirements under the regulations.²⁴⁴ If Genscape could not obtain the information required for feedstock verification, it should not have grants A-RIN status to SRAC's RINs. This failure to obtain information from the feedstock suppliers also demonstrates Genscape's failure to fully or properly implement its QAP A, as a failure to complete Third Party Confirmations at the three feedstock suppliers.²⁴⁵

- ii. G: Genscape accepted "...documentation from SRAC pertaining to Columbia in response to Genscape's For-Cause Audit."²⁴⁶ Genscape points to a 2013 contract between SRAC and Columbia and an enclosed Columbia affidavit attesting to the legitimacy of its feedstock for RFS compliance purposes.²⁴⁷

EPA: Genscape cannot meet the requirements of Final QAP section (1)(i)(A)(f) to conduct a Third Party Confirmation of Columbia by relying on information obtained from SRAC, the very producer it was auditing. Genscape also points to a 2013 Columbia affidavit which it claims "alone supported verification" of the RINs at issue.²⁴⁸ This affidavit (along with the two similar affidavits from Centennial and Grease Depot) provide that "NO-RINS HAVE BEEN GENERATED, SEPARATED, OR ASSIGNED

²⁴¹ Genscape_Tab02_0000108.

²⁴⁶ Genscape_0012.

²⁴⁷ *Id.*

²⁴⁸ *Id.*

TO THE PRODUCTS WE HAVE SOLD FOR THE YEAR ____ THAT MAY BE USED FOR THE PRODUCTION OF A RENEWABLE FUEL AND RINS GENERATION.”²⁴⁹ As explained in further detail later in this decision document, the year category was whited out in the Columbia (and Centennial and Grease Depot) affidavits, so Genscape would not have known from these documents what year the feedstock providers’ attestations applied to.²⁵⁰ Also, the purchase contract and attached affidavit were notarized in 2013 and available for Genscape’s review during the 2013 onboarding process and retrospective audit.²⁵¹ If Genscape believed these documents to be both valid and sufficient, the additional steps Genscape took, including the Field Inquiry and For-Cause Audit, would arguably not have been necessary. Therefore, Genscape’s current reliance on these documents is inconsistent with its real time actions and statements including conducting a Field Inquiry, For-Cause Audit, and issuing the 2014 PIR Notice.

- iii. G: Genscape collected “...additional, detailed records...”²⁵² to evaluate logistical operations concerning SRAC and Columbia.

EPA: The “additional, detailed records”²⁵³ for Columbia were in fact supplied by SRAC. Genscape cannot meet the requirements of Final QAP section (1)(i)(A)(f) to conduct a Third Party Confirmation of Columbia by relying on information obtained from SRAC, the very producer it was auditing.²⁵⁴

- iv. G: Genscape’s failure to perform a Third Party Confirmation at Columbia was not a failure to comply with its regulatory requirements because it was only required to verify a representative sample of the feedstock suppliers.²⁵⁵

EPA: This “representative sample” requirement does not apply to Genscape. Genscape points to language used in the preamble to the QAP Final Rule where EPA discusses the comments received on the proposed requirement that QAP auditors contact all feedstock suppliers and fuel purchasers.²⁵⁶ Commenters on the rule expressed that such a requirement would create difficulty for the auditors, due to these third-parties not being regulated entities and “under no obligation to provide...information.”²⁵⁷ Genscape misconstrues this sentence as being EPA’s own opinion, rather than a description of comments received.²⁵⁸ The comment was “from biodiesel producers who collect used

²⁵⁷ *Id.*

²⁵⁸ Genscape_0011-12.

cooking oil from *thousands* of restaurants.”²⁵⁹ Thus, it was within the context of having thousands of suppliers to contact that EPA chose to only require “a representative sample of contacts” of the feedstock suppliers and fuel purchasers.²⁶⁰ The goal of this requirement remained to achieve “an appropriate method for feedstock verification” which “gives high confidence that the producer was in fact purchasing renewable biomass as feedstock.”²⁶¹ Additionally, EPA had already promulgated a method for determining a representative sample based on the total population at 40 C.F.R. § 80.127. This section states that for an overall population size of 0-25 units, the representative sample would be the smaller of either the full population size or 19.²⁶² In Genscape’s case, there were three feedstock suppliers it was required to verify. Accordingly, a representative sample of an overall population size of three is three. Thus, the guidance in the preamble to the Final QAP rule does not apply to Genscape.

- v. G: Genscape asserts that Columbia used intermediate locations to conduct transloading. It also explains that the lack of transloading or delivery infrastructure at the Columbia facility itself was due to it being a marketer/broker. Genscape then argues that since Columbia was a marketer/broker, Genscape did not have to verify the upstream suppliers of feedstock to the marketer/broker.²⁶³ Genscape claims that “[c]ontacts outside of direct vendors to a producer or buyers from a producer were never envisaged as a requirement of the QAP program.”²⁶⁴

EPA: Genscape failed to provide evidence of transloading equipment or infrastructure at any intermediate location. Furthermore, 40 C.F.R. § 80.1426(f)(5)(ii), incorporated into Genscape’s Final QAP at section (1)(i)(B)(f), requires Genscape perform a Third Party Confirmation for each “unique counterparty,”²⁶⁵ including Columbia, providing separated food waste as a feedstock. The interim QAP defines Third Party Confirmation as a process where Genscape “documents the business existence and typical activities of the third party” (emphasis added). Genscape failed to meet this QAP requirement as it did not know that Columbia was a marketer or broker until the For-Cause Audit. In addition, Final QAP Section (1)(i)(B)(c) requires that Genscape assure, during an initial site visit, that the procedures for separating the food waste are in accordance with the SFWP. SRAC’s SFWP states the feedstocks “come from two primary supply chains: 1. Fats, oils, and grease components *collected directly from the generators*, [and] 2. Third-Party Suppliers or Brokers of fats, oils, and grease components who *collect directly from the generators*” (emphasis added). Genscape failed to meet Final QAP section (1)(i)(B)(c) because it failed to assure that the procedures for separating the food waste were in accordance with the SFWP. SRAC’s feedstock did not come directly from a generator like Columbia. Genscape never determined where Columbia sourced its feedstock. Therefore, it was unable to meet the SFWP related Final QAP requirement in section

²⁵⁹ 79 FR at 42100 (emphasis added).

(1)(i)(B)(c), which means Genscape did not meet its related regulatory requirement in 40 C.F.R. § 80.1426(f)(5)(ii).”²⁶⁶ Furthermore, Genscape’s claim that “[c]ontacts outside of direct vendors to a producer or buyers from a producer were never envisaged as a requirement of the QAP program” does not align with its understanding of this requirement documented in the Field Inquiry and For-Cause Audit Findings Report. In Part 1 of Genscape’s For-Cause Audit, it investigated SRAC’s fuel buyers.²⁶⁷ Its concerns of fuel reentering the feedstock supply chain were not resolved and it continued the For-Cause Audit.²⁶⁸ In Part 2 of Genscape’s For-Cause Audit, it then investigated the feedstock suppliers.²⁶⁹ In its own words, Genscape wrote that: “[t]he objective of the inquiry into feedstock suppliers was to trace the feedstock supply to SRAC *back to the source of separated food waste* for November and December 2013” (emphasis added).²⁷⁰ Genscape recognized at the time at issue that examining the source of the separated food waste was a means to resolve its QAP required For-Cause Audit. To argue now that it is not a QAP requirement is another instance of Genscape making a present-day argument that is in direct conflict with its own documentation of its understanding of the QAP requirements at the time at issue.

b. Additional EPA response to Genscape’s defenses regarding Columbia.

Elsewhere Genscape again recognized, and acknowledged in writing, that it was obligated to determine the “source facility” of the feedstock.²⁷¹ Susan Olson informed Scott Johnson in an email that, in order to verify Columbia and Centennial as feedstock suppliers and complete the For-Cause Audit, Genscape was required to “determine the source of waste grease and the chain of custody *to* the feedstock supplier.” (emphasis added).²⁷² Susan Olson reiterated this the next day in another email to Scott Johnson explaining the documentation Genscape needed to verify the feedstock supply chain: “collection logs and receipts for all materials supplied to the feedstock supplier for product sold by the feedstock supplier in November 2013 and December 2013. The receipts should reflect...the source of the material”²⁷³ Thus, it is clear Genscape understood that it needed to verify the source of the feedstock beyond the direct suppliers to SRAC, and it failed to do so. Furthermore, the idea that a QAP auditor may verify RINs without independently verifying the source of the feedstock, simply because the RIN producer purchased that feedstock from a marketer or broker, is not in compliance with EPA regulations. The regulations require that an auditor operating under an EPA approved QAP A confirm the feedstock used is qualifying “renewable biomass as defined in §80.1401”²⁷⁴ and that “feedstock is not renewable fuel for which RINs were previously generated,”²⁷⁵ which requires that the source of the feedstock be verified.

²⁷⁵ 40 C.F.R. § 80.1469(a)(1)(i)(G).

2. Centennial (feedstock supplier).
 - a. Genscape's audit of Centennial's office location.

In February 2014, Genscape performed an on-site record audit of a Centennial facility, which revealed a discrepancy in the number of shipments received by SRAC from Centennial and the number of invoices provided by Centennial to Genscape.²⁷⁶ The difference in the total feedstock weight was 1,226,660 pounds.²⁷⁷ To resolve this discrepancy, Genscape relied on additional records supplied by SRAC.²⁷⁸ By doing so, Genscape failed to meet the Third Party Confirmation required in its Final QAP because information obtained from SRAC is not information obtained from a third-party.²⁷⁹ Genscape stated it relied on documentation from SRAC because Monte Malone of Centennial was hospitalized; however, Genscape was in contact with Centennial employee Sue Henley at that time,²⁸⁰ and she was present at the February 2014 audit.²⁸¹ Genscape has not submitted any documentation to indicate that it had attempted to contact Sue Henley while Monte Malone was hospitalized in regard to this issue. Genscape's failure to complete the Third Party Confirmations of SRAC's feedstock suppliers resulted in Genscape's failure to fulfill its regulatory requirement to verify that "[f]eedstocks are renewable biomass as defined in § 80.1401."²⁸² Additionally, in its Final QAP, Genscape stated that "[d]uring a For-Cause Audit, feedstock purchases *will* be examined over a period of at least 30 days before the trigger event. *Third Party Confirmations* of feedstock purchase(s) for the audit period *will* be used to assure the feedstock type and if a feedstock change occurred (emphasis added)."²⁸³ Genscape, therefore, failed to comply with its own QAP and regulatory requirements by failing to address the 1,226,660-pound feedstock discrepancy using a Third Party Confirmation.²⁸⁴

- b. Genscape's defenses concerning Centennial and EPA's responses.

Genscape now claims that it "performed successful verification of Centennial's suppliers during the For-Cause Audit period."²⁸⁵ To support this assertion it makes the following arguments:

- i. G: Centennial was a marketer or broker, thus Genscape's observations of irregularities at Centennial's feedstock processing plant were immaterial to the feedstock it supplied SRAC.

²⁷⁶ Genscape_Tab02_0000174-75. *See also*, Genscape_Tab02_0000062

²⁷⁷ Genscape_Tab02_0000062.

²⁷⁸ Genscape_0014.

²⁷⁹ Final QAP (1)(i)(A)(f).

²⁸⁰ Emails from Susan Olson, Genscape Managing Director of Ag & Biofuels, to Sue Henley of Centennial (Apr. 16, 2014, 6:03 PM and 10:04 PM EST).

²⁸¹ Genscape_Tab02_0000059. *See also* Genscape_0014.

²⁸² 40 C.F.R. § 80.1469(a)(1)(i)(A).

²⁸³ Final QAP (1)(i)(A)(f) (emphasis added).

²⁸⁴ Genscape claims that this discrepancy was resolved but provides no supporting documentation or evidence of this conclusion. *See* Genscape_0015.

²⁸⁵ Genscape_0013.

EPA: Section 80.1426(f)(5)(ii), incorporated into Genscape's Final QAP at section (1)(i)(B)(f), requires Genscape perform a Third Party Confirmation for each unique counterparty, including Centennial, providing separated food waste as a feedstock. The interim QAP defines Third Party Confirmation as a process where Genscape "documents the business existence and *typical activities* of the third party" (emphasis added). Genscape failed to meet this QAP requirement as it did not know that Centennial was a marketer or broker until the For-Cause Audit. This is evidenced by Genscape visiting Centennial's feedstock processing plant twice for audit purposes but now claiming its documentation of anomalous operations there are immaterial because Centennial was actually a marketer or broker, and the feedstock it supplied to SRAC came, allegedly, from somewhere else.

- ii. G: Genscape was unable to identify the feedstock supply source but claims that it was not required to under the regulations or its QAP.

EPA: Final QAP section (1)(i)(B)(c) requires that Genscape assure, during an initial site visit, that the requirements for separating the food waste are in accordance with the SFWP. SRAC's SFWP states the feedstocks "come from two primary supply chains: 1. Fats, oils, and grease components *collected directly from the generators*, [and] 2. Third-Party Suppliers or Brokers of fats, oils, and grease components who *collect directly from the generators*." (emphasis added). Genscape failed to meet Final QAP section (1)(i)(B)(c) because it failed to assure that these requirements for separating the food waste were in accordance with the SFWP. SRAC's feedstock did not come directly from a generator. Genscape never determined where Centennial sourced its feedstock. Therefore, it was unable to meet the SFWP related Final QAP requirement in section (1)(i)(B)(c), which means Genscape did not meet its regulatory requirement in 40 C.F.R. 80.1426(f)(5)(ii).²⁸⁶

- iii. G: Genscape cites on-the-ground observations of SRAC trucks at the ARC terminal in Mobile, Alabama, in March 2014 as evidence for its assertion that "Grease Depot and Centennial were both feedstock suppliers to SRAC in March 2014."²⁸⁷

EPA: These observations at the ARC terminal are irrelevant to Genscape's Third Party Confirmation requirements of Centennial feedstock suppliers because the ARC terminal was used to deliver finished fuel sold to a company called GRC Fuels whose owner is currently in prison for RIN fraud and other crimes. As such, these alleged observations have no relation to Third Party Confirmations of feedstock suppliers and cannot substitute for Genscape's failure to fulfill these requirements.²⁸⁸

²⁸⁶ 40 C.F.R. § 80.1469(a)(1)(i)(A).

²⁸⁷ Genscape May 2018 Response, at 16.

²⁸⁸ Genscape_Tab02_0000190, *see also* Genscape Tab 06-QAP Audit\QAP-A SRAC\Site Visits\2013-2014 SRAC Site Visit Summary.xlsx; "According to information disclosed during the court proceedings, Schnabel, owner of GRC Fuels of Oneonta, New York, engaged in a scheme with other co-conspirators to fraudulently claim EPA renewable fuels credits (also known as "RIN" credits) and tax credits on fuel that did not qualify for the credits, on fuel that had already been used to generate credits, and on fuel that was exported or otherwise used contrary to EPA

c. Additional EPA responses to Genscape's defenses regarding Centennial.

Genscape's current claim that it "performed successful verification of Centennial's suppliers during the For-Cause Audit period"²⁸⁹ contradicts earlier statements Genscape made in an email to EPA subsequent to its For-Cause Audit of Centennial. In that email, Genscape stated that the "upstream and downstream supply chain complexity creates the risk of processed fuel reentering the supply chain, especially where fuel is chemically similar to the original feedstock;" as such, Genscape could not "eliminate the possibility that renewable fuel has entered the feedstock supply chain."²⁹⁰

Genscape's current claim that it "performed successful verification of Centennial's suppliers during the For-Cause Audit period"²⁹¹ also contradicts Genscape's action of issuing the 2014 PIR Notice to SRAC in April 2014 after its For-Cause Audit of Centennial.

3. Grease Depot (feedstock supplier).

Genscape documented that Grease Depot did maintain infrastructure and records consistent with a waste grease collection operation.²⁹² However, Grease Depot did not supply SRAC with feedstock it produced.²⁹³ Instead, Grease Depot purchased feedstock from another party, which it then sold to SRAC.²⁹⁴ Genscape contacted the other feedstock supplier's area manager, who confirmed the quantity of feedstock it supplied to Grease Depot; however, Genscape was unable to locate the physical location where Grease Depot collected the feedstock from that supplier.²⁹⁵ In addition, similar to the other feedstock providers, Genscape was unable to trace the feedstock SRAC purchased from Grease Depot back to the ultimate source of the separated food waste.²⁹⁶ This is a violation of Final QAP requirement (1)(i)(B)(f).

a. Genscape's Defenses Regarding Grease Depot and EPA's Responses.

i. G: For Grease Depot, Genscape again attempts to use on-the-ground observations of SRAC trucks at the ARC terminal in Mobile, Alabama, in March 2014, as well as observations of SRAC trucks at the EPIC Midstream Terminal in Savannah, Georgia, in June and July 2014, as evidence of the validity of Grease Depot's operations.²⁹⁷ Genscape also offers these observations as evidence to support its assertion that "Grease Depot and

and IRS regulations." See <https://www.justice.gov/opa/pr/ohio-man-sentenced-63-months-prison-renewable-fuel-fraud>.

²⁸⁹ Genscape_0013.

²⁹³ *Id.*

²⁹⁴ *Id.*

²⁹⁵ Genscape_Tab02_0000049-50.

²⁹⁶ Genscape_Tab02_0000050.

²⁹⁷ Genscape May 2018 Response, at 16.

Centennial were both feedstock suppliers to SRAC in March 2014, and Grease Depot also remained a supplier in July 2014.”

EPA: As with Centennial above, Genscape’s observations regarding SRAC trucks at finished fuel terminals are not relevant and in no way satisfy Genscape’s Third Party Confirmation requirements for the feedstock suppliers to Grease Depot.²⁹⁸ The ARC terminal was used to deliver fuel sold to GRC Fuels while the EPIC Midstream Terminal was used to deliver and hold fuel sold to Gen-X and was built to “accommodate the large volume of SRAC product.”²⁹⁹ Genscape could not verify, through Third Party Confirmations, the sources of feedstock to Grease Depot.³⁰⁰ Therefore, Genscape failed to comply with the regulation at 40 C.F.R. § 80.1426(f)(5)(ii), incorporated into Genscape’s final QAP at section (1)(i)(B)(f), that required Genscape to perform a Third-Party Confirmation for each unique counterparty, including Grease Depot, providing separated food waste as a feedstock.³⁰¹

- ii. G: Genscape was unable to identify the feedstock supply source but claims that it was not required to under the regulations or its QAP.

EPA: Final QAP section (1)(i)(B)(c) requires that Genscape assure, during an initial site visit, that the procedures for separating the food waste are in accordance with the SFWP. SRAC’s SFWP states the feedstocks “come from two primary supply chains: 1. Fats, oils, and grease components *collected directly from the generators*, [and] 2. Third-Party Suppliers or Brokers of fats, oils, and grease components who *collect directly from the generators*.” (emphasis added). Genscape failed to meet Final QAP section (1)(i)(B)(c) because it failed to assure that the procedures for separating the food waste were in accordance with the SFWP. SRAC’s feedstock *did not come directly from a generator*, here Grease Depot. And *none* of SRAC’s three feedstock suppliers *collected directly from the generators*. Genscape never determined where Grease Depot sourced its feedstock. Therefore, it was unable to meet the SFWP related QAP requirement in Final QAP section (1)(i)(B)(c), which means Genscape did not meet its regulatory requirement in 40 C.F.R. § 80.1426(f)(5)(ii).³⁰²

F. For-Cause Audit Part 3 (February 19-April 9, 2014) – Genscape’s For-Cause Audit findings from its Extended Analysis do not support RIN verification.

After Genscape was unable to resolve its concerns during its investigation of the fuel purchasers in Part 1 of the For-Cause Audit or its investigation of the feedstock suppliers in Part 2 of the For-Cause Audit, Genscape created what it called an “Extended Analysis” or a Part 3 of its For-Cause Audit which it conducted between February 19, 2014 and April 9, 2014.³⁰³ Genscape’s

²⁹⁸ Genscape_Tab02_0000182. SRAC did not begin selling fuel to GRC Fuel until February 2014.

²⁹⁹ Genscape_Tab02_0000190-192, Genscape_Tab06-QAP Audit\QAP A SRAC\Site Visits\2013-2014 SRAC Site Visit Summary.

³⁰⁰ Final QAP (1)(i)(B)(c).

³⁰¹ See also *Id.*

³⁰² 40 C.F.R. § 80.1469(a)(1)(i)(A).

³⁰³ Genscape_Tab02_0000013, 65-73.

Part 3 objective was to use the information it had previously gathered during the For-Cause Audit and conduct additional analysis procedures to resolve the For-Cause Audit.³⁰⁴

1. Genscape's investigation of the relationship between fuel buyer ADI and feedstock supplier Columbia.

During its investigation in Part 3 of the For-Cause Audit, Genscape determined Columbia and ADI were both registered by the same agent with the Florida Department of State, Division of Corporations, and both companies were registered with the same address in Colorado.³⁰⁵ Columbia is a feedstock supplier and ADI is a fuel buyer. Genscape asked Scott Johnson about this relationship and Mr. Johnson said he was unaware of any ownership relationship between the two companies.³⁰⁶ Mr. Johnson claimed to contact Columbia's owner, Donald Zigler, who said that he did not own ADI, but that the companies shared the same lawyer and registering agent who lived at the same address listed for ADI and Columbia.³⁰⁷ Genscape discovered and documented in its For-Cause Audit that the owner of the residence at the Colorado address, Robert T. McAllister, was a former Colorado attorney who was disbarred in 2012, convicted of crimes for financial fraud, and sentenced to 78 months in federal prison.³⁰⁸

2. Truck delivery timing irregularities.

a. Genscape's identification of truck transportation timing irregularities.

During its investigation in Part 3 of the For-Cause Audit, Genscape also discovered that the backhaul loop³⁰⁹ through which SRAC would purportedly ship fuel to Trooper, unload it there, drive to Centennial to load feedstock, and return to SRAC, occurred in significantly less time than expected.³¹⁰ Genscape estimated that "[t]he absolute minimum expected time to complete the loop is a little more than 300 minutes."³¹¹ Then Genscape identified "several occasions" where the delivery trucks were completing this loop in far less time,³¹² listing two specific trucks that made the trip in 211 minutes and 174 minutes.³¹³ The next sections include EPA's analysis of the truck transportation records that Genscape assembled.

b. EPA's analysis of truck transportation records.

As noted above, during Part 3 of the For-Cause Audit, Genscape identified that the backhaul loop from SRAC to Trooper to Centennial and back to SRAC occurred in much less time than

³⁰⁴ Genscape_Tab02_0000065.

³⁰⁵ Genscape_Tab02_0000066.

³⁰⁶ *Id.*

³⁰⁷ *Id.*

³⁰⁸ *Id.*

³⁰⁹ The backhaul loop method involves a truck leaving with product at Location A, unloading at Location B, picking up other product at or near Location B, and returning with its load to Location A.

³¹⁰ Genscape_Tab02_0000074, 82.

³¹¹ Genscape_Tab02_0000074.

³¹² Genscape_Tab02_0000074, 82.

³¹³ Genscape_Tab02_0000074.

expected. EPA closely examined the truck transportation records that Genscape had before it when it verified SRAC's RINs to determine whether such records confirmed or disproved Genscape's 2014 PIR Notice.³¹⁴ EPA's analysis is laid out below.

i. EPA's analysis of Genscape's June 2016 Submittal of truck transportation records.

On June 30, 2016, Genscape submitted documentation to EPA to illustrate its method of retrospective verification of interim QAP A-RINs generated by SRAC, and stated: "[t]his information is provided to give a more thorough picture of the activities and evaluations Genscape performed leading up to its decision in September 2014 to support its prior assurance activities."³¹⁵ However, Genscape provided complete records for only a single day of feedstock and fuel deliveries, November 20, 2013. EPA staff reviewed this documentation to determine if the records Genscape relied upon at the time it verified the RINs would confirm or disprove Genscape's 2014 PIR Notice that all of the RINs generated between November 1 and December 3, 2013 were potentially invalid. For the November 20, 2013, assessment, there were transportation and product documents for Trailers 800364 and 800363 that demonstrate a potential fuel-to-feedstock cycle. Specifically, Trailers 800364 and 800363 made several trips from feedstock suppliers to SRAC, back to a feedstock supplier, and then back to SRAC faster than physically possible.³¹⁶ No intermediate facilities were identified for feedstock deliveries and nothing supports the capability for these trailers to physically travel the routes in the times identified in the documents. For example, Trailer 800364 was loaded with 78,960 lbs. of finished fuel (GForce) from SRAC, delivered to a finished fuel purchaser, then Trailer 800364 was allegedly loaded with the exact same amount of feedstock, 78,960 lbs., by a feedstock supplier, and delivered to SRAC in under two hours when the trip should have taken over 15 hours. The deliveries identified in these documents clearly demonstrate a fuel-to-feedstock cycle.³¹⁷

Additionally, the June 2016 Submittal contained Excel spreadsheets documenting inbound and outbound shipments to and from SRAC for November 2013. These spreadsheets showed that the transport company for shipments from SRAC to ADI (a fuel purchaser) was Columbia (a feedstock supplier), and the transport company for shipments from SRAC to Trooper (a fuel purchaser) was Centennial (a feedstock supplier).³¹⁸ This circular shipping arrangement, which Genscape documented, is indicative of a fuel-to-feedstock cycle.³¹⁹

ii. EPA's analysis of truck transportation records in Genscape's April 2017 Response.

³¹⁴ See Memorandum from Anthony Miller, Chemical Engineer, Fuels Enforcement Branch, Air Enforcement Division and Ariel Hou, Chemical Engineer, Eastern Research Group (ERG), to Genscape Inc. (Genscape) Project File, *Evaluating Southern Resources and Commodities (SRAC) feedstock suppliers and fuel delivery documentation as it relates to Genscape's verification of SRAC generated Renewable Identification Numbers (RINs) based on Genscape's submission dated April 17, 2017* (May 21, 2019) (on file with EPA's Office of Transportation and Air Quality) (hereinafter EPA, Weigh Tickets Memo).

³¹⁵ Genscape_Tab02_0000166.

³¹⁶ *Id.* See also Genscape, Submittal to EPA, June 30, 2016, Exhibit 3, Attachment A (inbound/outbound spreadsheets).

³¹⁷ Genscape_Tab02_0000166.

³¹⁸ Genscape, Submittal to EPA, June 30, 2016, Exhibit 3, Attachment A (inbound/outbound spreadsheets).

³¹⁹ This information also refutes Genscape's previous supply chain confidentiality claims since using the same trailers and drivers does not demonstrate a confidentiality concern among the parties.

In its April 2017 Response, Genscape provided weigh tickets (scale tickets) of truck deliveries related to SRAC operations. The weigh tickets provide information about truck activity related to transportation of feedstock and finished fuels, including time stamped information. EPA conducted a detailed review of the weigh tickets for November 7, 2013, and November 20, 2013, because Genscape's submission only contained weigh tickets for deliveries to/from all applicable third parties on these two dates. EPA pointed out to Genscape, in its February 2018 in person meeting with the company, that it had only submitted two days of complete data to EPA in its April 2017 Response; Genscape never supplemented its submittal. Genscape also provided weigh tickets for deliveries to/from all third parties on November 15, 2013, but there is an insufficient number of deliveries on this day to allow evaluation of the trucking pattern for any given truck or trailer. The purpose of EPA's analysis was to evaluate truck activities relating to transportation of feedstocks and finished fuels and to understand the information available to Genscape at the time Genscape verified SRAC RINs.

As part of the analysis, EPA considered Genscape's claims with respect to intermediate and final delivery locations, as well as the types of delivery method that may be used in the industry and that were identified by Genscape. The delivery types considered included the backhaul loop method, the drop and hook method, and the transload method. The backhaul loop method, as noted above, involves a truck leaving with product at Location A, unloading at Location B, picking up other product at or near Location B, and returning with its load to Location A. Genscape's PIR Notice to Scott Johnson identified that the backhaul loop method was impossible based upon its findings.³²⁰ In its response, SRAC raised other shipping methods used in the industry, such as drop and hook and transloading. Drop and hook involves trucks arriving and exchanging their tank trailers of fuel and feedstock in a central yard.³²¹ Transloading, as described by SRAC, is "a common practice in the industry where instead of two trucks exchanging their entire loads at the central yard, the loads (fuel or feedstock) can be 'transloaded' into other tankers or yard tanks, for further delivery."³²² Genscape claims this explanation of the transportation pattern was "the substantive focus of Genscape and its management"³²³ when it verified SRAC RINs. As such, EPA considered the feasibility of all three delivery methods by evaluating the weigh tickets for the only dates for which complete information was provided by Genscape, November 7, 2013, and November 20, 2013. EPA applied reasonable assumptions to its analysis, considering the distance and driving time between locations utilizing Google Maps. EPA also assumed that a trailer takes 30 minutes to load, and 30 minutes to unload, based upon the weight ticket weight-in and weight-out times at SRAC for most loads.

In addition to considering delivery methods, EPA's analysis considered feedstock, fuel, and intermediate transport locations related to SRAC's operations. Some of these facilities were visited by Genscape auditors, and these auditors raised various concerns regarding the unsuitability of infrastructure or a lack of observable loading or transloading activity consistent

³²⁰ Genscape_Tab02_0000014

³²¹ No delivery method (backhaul loop, transloading, or drop and hook) would have been possible for at least 12 deliveries on November 7, 2013, and November 20, 2013, due to timing constraints.

³²² Genscape_Tab17_0000002

³²³ Genscape May 2018 Response, at 9.

with what would be reasonably expected. EPA also considered storage locations and storage adequacy.

Reviewing the weigh tickets and considering site visit documentation and additional information submitted by Genscape, EPA was able to generate several observations and conclusions.

EPA's weigh ticket analysis leads to the following key observations:³²⁴

- Most, if not all, trailers were used interchangeably for transporting both feedstock and finished fuel. Time stamps in the truck/trailer weigh tickets show that once feedstock is unloaded, the same trailer is often immediately loaded with finished fuel. Trucks and trailers departing SRAC with finished fuel also often return to SRAC several hours later in the day carrying a load of feedstock.
- For November 7, 2013, and November 20, 2013, none of the feedstocks were transported directly from the feedstock supplier location to SRAC. Similarly, none of the finished fuels were transported directly from SRAC to the customer location because the trucks and/or trailers returned sooner than the time required to transport the materials to the physical address listed on the bills of lading.
- There are no documents showing delivery of material to/from any intermediate location. The address of the intermediate location is not listed on any bill of lading, invoice, product transfer document, or transportation records. Thus, Genscape has not provided EPA any documentation that would show how the drivers knew where the intermediate and delivery destinations were located.³²⁵ Furthermore, the origin point and final destination are required elements of a bill of lading under Department of Transportation regulations,³²⁶ and where the freight is transferred at one or more intermediate locations, the addresses of those "transfer point(s) through which shipment is moved" must also be on the bill of lading.³²⁷

EPA's weigh ticket analysis leads to the following conclusions:³²⁸

- The backhaul loop method could not have been used for any deliveries of feedstock or finished fuel occurring on November 7, 2013, and November 20, 2013. Based on time stamps on the weigh tickets, the trucks and/or trailers returned to SRAC sooner than the minimum time required to complete a full backhaul loop. These facts contradict Scott Johnson's own statement that Columbia is "a huge vendor for [SRAC] with a great back haul route for our haulers."³²⁹

³²⁴ EPA, Weigh Tickets Memo, *supra* note 314, at 7-8.

³²⁵ It is very uncommon in the industry for the addresses of intermediate and final delivery locations to be omitted from these documents, because these documents are used by the delivery drivers to establish the product's destination, and because these addresses are required elements of a bill of lading under Department of Transportation regulations (49 C.F.R §§ 373.101, 373.103).

³²⁶ 49 C.F.R. § 373.101(a).

³²⁷ 49 C.F.R. § 373.103(a)(1)(x).

³²⁸ EPA, Weigh Tickets Memo, *supra* note 314, at 8-9.

³²⁹ Genscape_Tab30_0000001.

- Genscape attempts to point to a number of intermediate locations and different types of delivery methods as verification for feedstock and finished fuel deliveries. However, no delivery method would have been possible for at least 12 deliveries on November 7, 2013, and November 20, 2013, due to timing constraints.
- Genscape has not provided evidence that transloading equipment or infrastructure was present at any intermediate location. While Genscape makes brief references to two intermediate transloading locations in Soperton and Swainsboro, GA, Genscape never provided actual addresses of these locations, other than stating both intermediate locations are “in the proximity of the ‘Pawn Shop Storage’ location.”³³⁰ Further, Genscape never provided evidence demonstrating that it visited these physical locations,³³¹ and instead relied on a vague statement from Centennial regarding the existence of these two locations.³³² Genscape also relied on its observations that trailers were entering and leaving the Pawn Shop during the Field Inquiry to now conclude that the “Pawn Shop Storage was operational as an intermediate location.” Yet, Genscape’s present day argument is in direct conflict with its photograph of the Pawn Shop taken during the Field Inquiry and with statements included in the Field Inquiry Report, created at that time, that stated, “[n]o equipment or infrastructure to pump or store liquids to or from trucks was noted during the observation period.”³³³
- Despite SRAC’s purported use of transloading as a method for feedstock and fuel deliveries, Genscape continued to question operational logistics given a transloading scenario, as demonstrated in its letter to Centennial on April 16, 2014.³³⁴ However, in its May 2018 Response, Genscape stated that it considered Monte Malone’s statement dated May 29, 2014, in which Mr. Malone stated that Centennial “never purchased anything from Trooper,”³³⁵ to have “addressed the central issue highlighted in the [April 16, 2014] letter, namely, the role of Trooper Recycling in the logistics operation.”³³⁶ Genscape further re-iterated that it “did not consider Centennial’s failure to respond to be evidence of fraud.”³³⁷ But Centennial never responded to the key issues raised in Genscape’s April 16, 2014, letter to Centennial, such as providing “an explanation of the process for scheduling and controlling the logistics between SRAC, Trooper and Centennial,”³³⁸ “the types of infrastructure present at [the transloading] locations, including pumping and storage”³³⁹ and “a statement from the operator of these intermediate pumping locations.”³⁴⁰ Without this information, Genscape could not have resolved its concerns

³³⁰ Genscape May 2018 Response, at 12.

³³⁹ *Id.*

³⁴⁰ *Id.*

regarding SRAC's transportation logistics and verified that a transloading scenario was in fact occurring.

- The purported storage operations at any of the intermediate locations were never verified by any inspector notes, interviews, or pictures. The information Genscape has provided to EPA shows that a single tank is seen in a picture outside the fence line at the Dublin Warehouse location without any corroboration that the tank is being utilized. Further, EPA presumes that multiple tanks would be required for storage if this location was used for both feedstock and finished fuel drop-offs.
- Among the intermediate locations identified in Genscape's response, the Warehouse located at the Industrial Boulevard site in Dublin, Georgia, is the closest location to SRAC, requiring 15 minutes³⁴¹ driving time without traffic. Trucks and/or trailers for 12 deliveries (four on November 7, 2013, and eight on November 20, 2013) returned sooner than the minimum roundtrip time required³⁴² to drive from SRAC to the closest intermediate location.
- The November 7, 2013, and November 20, 2013, weigh tickets do not support Genscape's claims that the feedstock supply chain drives the need for secrecy and confidentiality. This claim is refuted by the fact that two of SRAC's three feedstock suppliers appear to be sharing Trailers 800360 and 800145 and Dion and Kevin as drivers. Both drivers, their trucks, and the trailers made feedstock pick-ups from Centennial and Columbia and fuel deliveries to ADI and Trooper.

Genscape initiated the Extended Analysis of Part 3 of the For-Cause Audit to analyze the information it had previously gathered during the For-Cause Audit in an effort to successfully resolve the negative findings in the For-Cause Audit.³⁴³ However, EPA's analysis of the SRAC truck transportation data that Genscape possessed at the time of the Extended Analysis and prior to RIN verification clearly demonstrate that SRAC was physically incapable of performing any of the intermediate location transportation methods it claimed at the time. Moreover, Genscape demands that EPA accept as valid SRAC's use of intermediate locations, though none of these intermediate locations was recorded on the appropriate transportation documents (bills of lading, product transfers) at the time, as required by DOT regulations. To this day, Genscape is unable to identify for EPA the locations of the intermediate sites.³⁴⁴ Though Genscape currently attempts to explain away the results of its Extended Analysis of Part 3 of the For-Cause Audit, it subsequently issued its 2014 PIR Notice to Gen-X because it could not resolve the issues, namely the serious possibility of an illegal fuel-to-feedstock loop.

³⁴¹ Based on Google Maps.

³⁴² EPA's weigh ticket analysis assumes 30 minutes are required to unload fuel from a trailer and 30 minutes are required to load the trailer with feedstock based on weigh ticket weight-in and weight-out times at SRAC for most loads. EPA, Weigh Tickets Memo, *supra* note 314, at 25.

³⁴³ Genscape_Tab02_0000065.

³⁴⁴ Genscape May 2018 Response, at 12.

- iii. Genscape failed to account for the pump sensor data, despite relying on it to justify RIN verification.

In its April 2017 Response, Genscape claimed to have “conducted multiple site visits, engaged in remote monitor and data collection, reviewed and analyzed producer-provided documentation, [and] compared monitoring data to producer provided data” to fulfill the QAP A requirements.³⁴⁵ Specifically, Genscape stated that it “conducted real-time monitoring and routine auditing without any concerns through October and November 2013... the remote monitoring analysis sheets for October and November do not include any entries suggesting evidence of fraud or anything else that would lead Genscape to decide not to verify RINs... the observations made through review of this imaging was consistent with and corroborated by pump sensor data... for those months.”³⁴⁶ However, the pump sensor data³⁴⁷ provided in Genscape’s submission contain only zero values for the entire day on November 7, 2013 and November 20, 2013, the only two days for which Genscape provided complete trailer data – suggesting a lack of pump flow for both incoming feedstock and outgoing fuel. On both days, weigh tickets show substantial feedstock receipts to SRAC and fuel deliveries from SRAC, with no corresponding pump sensor data. EMTS data also show fuel production and RIN generation on these days. As such, Genscape failed to perform all aspects of the physical monitoring, such as review of pump sensor data, as it claimed in its April 2017 Response.³⁴⁸

When EPA questioned Genscape’s review of pump sensor data during a February 2018 in-person meeting, Genscape told EPA that these pump sensors were not always operational. Subsequently in its May 2018 Response, Genscape argued that the pump sensors were installed as only secondary monitors to create redundancies, and that camera and video images of truck movement were sufficient in confirming the loading and unloading events.³⁴⁹ These arguments directly contradict Genscape’s previous claim in the April 2017 Response that the imaging was “corroborated by pump sensor data.”³⁵⁰ In sum, the claim Genscape makes in its April 2017 Response is completely unsupported as to physical monitoring and pump sensor data review on the only dates for which it provided complete information (November 7, 2013, and November 13, 2013).

3. Genscape’s correspondence with EPA during Part 3 of the For-Cause Audit.

Additionally, during its investigation in Part 3 of the For-Cause Audit, Genscape admitted in an email to EPA dated March 13, 2014, that the “upstream and downstream supply chain complexity creates the risk of processed fuel reentering the supply chain, especially where fuel is

³⁴⁵ Genscape_0008.

³⁴⁶ Genscape_0009.

³⁴⁷ See generally Genscape_Tab 06-QAP Audit.

³⁴⁸ Final QAP Section (1)(i)(A)(d) requires verifying that feedstocks are renewable biomass by determining daily quantities of, among other things, feedstock usage and renewable fuel production. Section (1)(i)(G)(a) requires verifying that feedstock is not renewable fuel for which RINs were previously generated by determining, among other things, daily quantities of renewable fuel and co-product production. Section (3)(i)(D) requires verification of fuel-related components by comparing daily renewable fuel production data to fuel deliveries from the Facility.

³⁴⁹ Genscape May 2018 Response, at 18. See also Genscape_Tab02_0000206.

³⁵⁰ Genscape_00009.

chemically similar to the original feedstock.” Genscape also admitted it had “reached the commercially reasonable limits for the For-Cause Audit process under the QAP program” and Genscape could not “eliminate the possibility that renewable fuel has entered the feedstock supply chain.”³⁵¹ It is important to note that Genscape was not under any obligation, regulatory or contractual, to verify SRAC’s RINs and could have terminated its business relationship with the company on the basis of this suspected misconduct.³⁵²

G. Genscape issued its 2014 PIR Notice.

On April 10, 2014, Genscape issued a notice to Gen-X and EPA that all of the RINs that Gen-X’s subsidiary facility, SRAC, in Dublin, Georgia, generated between November 1, 2013, and December 3, 2013, were PIRs. Genscape stated in this notification that “[i]t has collected information that may suggest that at least a significant portion of the feedstock used by SRAC to produce ‘G-Force’ fuel additive between November 1, 2013, and December 3, 2013, was actually finished fuel delivered back to the SRAC facility as feedstock, thereby forming a fuel-to-feedstock’ cycle.”³⁵³ Its PIR finding triggered a requirement that Gen-X either had to meet certain RIN retirement obligations or explain why these RINs were valid.³⁵⁴ Gen-X chose the latter, and submitted a letter on June 6, 2014, described below, responding to the 2014 PIR Notice.

H. Genscape’s April 24, 2014, notification to Gen-X of how it would resume QAP verification services.

On April 24, 2014, Genscape sent a letter to Gen-X announcing that it was “...pleased to present a plan to resume QAP-A RIN assurance...” at SRAC (April 2014 Letter).³⁵⁵ Genscape listed several steps that SRAC would need to take for Genscape to verify its RINs, including that SRAC (1) implement a fuel dye marker system to ensure finished fuel was not used as a feedstock; (2) improve RIN integrity quality control practices; (3) submit an affidavit from Scott Johnson attesting to investigation into and compliance with renewable fuel requirements; (4) issue a press release and/or article of how Genscape and Gen-X have “...conquer[ed] RIN risk due to supply chain opacity for the industry;” (5) provide a response to the 2014 PIR Notice; and (6) “[b]uild a cash escrow to cover the maximum liability that Genscape could incur between January 1, 2013, and April 30, 2014, on behalf of any SRAC or any other Gen-X Energy Group facility.”³⁵⁶

³⁵¹ Email from Susan Olson of Genscape to Mary Manners, Mike Prince, John Weihrauch, Brent Williams, March 13, 2014.

³⁵² On March 11, 2014, Mary Manners, EPA OTAQ Compliance Division Deputy Director, and other EPA personnel spoke on the phone with Susan Olson, Genscape VP Products, Ag & Biofuels, regarding Genscape’s findings and concerns regarding Gen-X and SRAC up to that point. EPA personnel advised Genscape of the regulations and advised that if Genscape had doubts about RIN validity, then Genscape should not verify the RINs.

³⁵³ Genscape_Tab02_0000001.

³⁵⁴ 40 C.F.R. §80.1474, *see also* 78 FR at 12216.

³⁵⁵ Genscape_Tab23_000000101.

³⁵⁶ Genscape_Tab23_000000101-02.

Of particular note is the fact that Genscape required Gen-X to build an escrow account to cover its potential RIN replacement liability (within the two percent cap) from January 1, 2013, to April 2014, not just for the November to December 2013 period that its PIR Notice covered. Genscape also required that the escrow account cover invalid RINs at not only Gen-X's facility in Dublin, Georgia (SRAC), but also its facility in Moses, Washington (Gen-X). As described in Section III.C., under the Interim QAP Program, Genscape would be responsible for replacing any invalid RINs that it verified if the producer of those RINs did not replace them. Based on the escrow account that Genscape required Gen-X put in place, it seems that Genscape recognized its potential regulatory obligations to replace RINs that Gen-X and SRAC had generated for this entire period and that Genscape had verified under the QAP program. Thus, Genscape required that Gen-X set aside RINs to cover Genscape's potential minimum regulatory obligation to replace two percent of the QAP-A verified RINs. Unfortunately for Genscape, Gen-X set aside Gen-X RINs that were ultimately determined to be invalid. Genscape asked EPA if it could use the invalid SRAC RINs to replace the invalid RINs at issue there.³⁵⁷ EPA said no, that action is not permissible under the regulations, and no environmental benefits would be achieved by doing so (as invalid RINs do not represent the production of qualifying renewable fuel).³⁵⁸

I. SRAC's questionable implementation of the red dye fuel marker system Genscape required in its April 2014 Letter.

In its April 2014 Letter, Genscape presented "a plan" to Scott Johnson with specified "new processes and procedures that Genscape requires from SRAC before restarting the QAP A designation for RINs."³⁵⁹ Part of this plan was "implement[ing] a fuel marker system to differentiate fuel sold from feedstock received," including a requirement that SRAC ensure any third-parties who perform the fuel dyeing "offer cooperation with the Genscape representative or sub-contractor performing random testing."³⁶⁰ Genscape apparently considered the fuel marking requirement part of its QAP because the "SRAC Marker Testing Outline" (Outline) included a section called "QAP SOPs [standard operating procedures]," which contained ongoing monitoring requirements, a For-Cause Audit notification provision, and "[v]endor [c]onfirmations[,] including background checks."³⁶¹ In another section of this Outline, Genscape committed to conducting "[a]dditional [m]onitoring" by installing cameras "to cover feedstock sampling...[and]... monitor dye and feedstock sampling storage...."³⁶² The "SRAC Marker Testing Outline" also required Genscape to collect 36 samples of finished fuel each year.³⁶³

³⁶⁰ *Id.*

³⁶¹ *Id.* See also Genscape_Tab05_0001388.

³⁶² Genscape_Tab 05_0001388.

³⁶³ See Genscape_Tab05_0001388. Genscape's "Marker Testing Outline_SRAC_5-7-2014/docx" last saved May 15, 2014, which states that Genscape was responsible for pulling 36 samples of finished fuel (G-force) and 36 samples of feedstock each year. See also Genscape_Tab 06-QAP Audit(QAP-A SRAC\Site Visits\2014 Q2\SRAC_Red Dye Testing_Feedstock Information.

In a June 6, 2014, letter to Robert Barton, Managing Director of Agriculture & Biofuels at Genscape (June 2014 Letter), Scott Johnson stated that “SRAC will now be ‘marking’ the renewable fuel loads with Red Dye...in order to differentiate the finished product from a feedstock.”³⁶⁴ In Robert Barton’s September 5, 2014 response to Scott Johnson, he affirmed the QAP-A RIN status of the RINs Genscape previously identified as PIRs.³⁶⁵ He also identified the “fuel marker system to differentiate fuel sold from feedstock received...” as a “key measure being undertaken by Gen-X and SRAC...”³⁶⁶ Attached to Robert Barton’s response letter were two documents that pertained to the red dye fuel marker system, including “Standard Operating Procedure #4,” which required that “All products from the facility *shall* be dyed. Refer to QA (Quality Assurance) Operating Procedure #2 G-Force Dying (*sic*) (emphasis in the original).”^{367, 368}

1. Genscape failed to enforce the red dye fuel marker system SOPs.

Genscape required that the red dye fuel marker system be implemented according to the “Quality Assurance Operating Procedure #2 G-Force Dying (*sic*),” which included prescriptive procedures that Gen-X and SRAC were required to follow. This document states that the dye would be added via a metering skid.³⁶⁹ If the metering skid/dye unit malfunctions, the operator would measure, weigh, and add the dye manually at a rate of 10 cc dye per 40 gallons of fuel.³⁷⁰ The operator would add the dye before the truck, railcar, or vessel is loaded and would ensure the dye is mixed uniformly within the load.³⁷¹ The operator would also collect and retain a sample for verification.³⁷² Photographs from Genscape’s June 17, 2014, and July 15, 2014, site visits showed a drum of red dye in an indoor area.³⁷³ However, the drum was not connected to a metering system.³⁷⁴ Genscape did not submit to EPA documentation indicating that SRAC used a dye metering system as required by its “SRAC’s Quality Assurance Operating Procedure #2 G-Force Dying (*sic*).”

Genscape’s documentation indicates that SRAC started the dye process in June 2014 and stopped it in July 2014. Genscape submitted documentation of an email exchange between Creed Gann and another Genscape employee, Josh Brierly. Gann told Brierly, “I need you to send me everything you have on SRAC and Gen-X,” and Brierly wrote in his response that SRAC “had quit putting dye in the feedstock right after your [Gann’s] last visit (this is also on JIRA).”³⁷⁵

³⁷¹ *Id.*

³⁷² *Id.*

³⁷³ Genscape_Tab02_0000200, Genscape_Tab05_0001936-38.

³⁷⁴ Genscape_Tab02_0000200.

³⁷⁵ Genscape_Tab05_0001875. Genscape submitted evidence that Creed Gann’s last visit to SRAC was in July 2014, and that Josh Brierly visited in August 2014. Genscape_Tab 05_0002399, which was created by Creed Gann on 7/15/14, and modified by Josh Brierly on 8/7/14. Note that this document is slightly in conflict with

Genscape also states in its June 2016 Submittal that it “actively monitored and assisted SRAC with the implementation of this initiative for *several weeks* prior to making the final decision to verify.” (emphasis added).³⁷⁶ Thus, Genscape’s internal communications indicate that the red dye fuel marker system was fraught with issues requiring Genscape’s assistance and was in place for just over one month at best, which does not meet the red dye fuel marker system requirements above.³⁷⁷ This was an event that should have triggered a For-Cause Audit; however, Genscape continued to verify RINs until April 2015. Genscape has failed to submit any documentation to EPA that indicates it conducted a For-Cause Audit after SRAC stopped the “enhanced integrity program” red dye testing, roughly one month after it began.³⁷⁸

2. Genscape failed to complete the additional monitoring requirements: camera installations.

Genscape has not submitted documentation that would enable EPA to determine whether such cameras were in fact installed and effective. None of the remote monitoring images from Cameras 222, 261, 279, 280, 512, 513, 514, 515, and 516 show the addition of red dye via a metering pump, manual operator, or other procedure. In Genscape’s May 2018 Response, Genscape provided photographs obtained from a camera installed in SRAC’s sample storage room as evidence for continued implementation of the red dye fuel marker system.³⁷⁹ However, these photographs only show that samples of something were stored at the SRAC facility. These images fail to demonstrate that SRAC was physically adding red dye to its finished fuel, as Scott Johnson committed to do in his June 2014 letter to Robert Barton.

3. Genscape claims the “SRAC Marker Testing Outline” was only for discussion and protocol development.

In its May 2018 Response, Genscape argues that the “SRAC Marker Testing Outline” dated May 7, 2014, was only an outline document used by Genscape personnel for discussion with SRAC during the initial stages of the dyeing protocol development, and “did not reflect any requirements to be imposed upon Genscape.”³⁸⁰ Rather, Genscape performed the necessary monitoring and spot check sampling to “be confident that SRAC was in fact implementing the protocols.”³⁸¹ Genscape also stated that it was “onsite at the SRAC facility at least 8 times between May 27, 2014, and October 14, 2014,” and that as part of each spot check site visit, Genscape personnel sampled and tested “samples that had been pulled by the facility previously

Genscape_Tab 06-QAP Audit\QAP-A--Site Visits\2014 Q3\SRAC_Spot Test Pics\SRAC Sample Spot Testing 8.8.14\SRAC-Product Sample Tracking, which indicates Creed Gann did a site visit with Josh Brierly on 8/6/2014.

³⁷⁶ Genscape_Tab02_0000130 (emphasis added), *see also* Genscape_Tab05_0001410.

³⁷⁷ Outbound spreadsheets for July, August and September 2014 show some fuel sold to GRC Fuel may have contained dye. EPA could not determine whether Genscape actually verified the dye addition or relied only on information provided by SRAC that dye was added to these shipments. File properties show “Lori W” and “Jaime Adams” as authors of these spreadsheets. It is EPA’s understanding that Jaime Adams was a Gen-X employee. *See* Genscape_Tab 06-QAP Audit\QAP-A SRAC\Transaction\2014 Q3, “July Outbound Binder.xlsx”, “August 8-31 Outbound SRAC.xlsx”, “September 1-15 Outbound SRAC.xlsx” and “SRACSeptember2014 OUTBOUND.xlsx”. *See also* Scott Johnson Plea Agreement at 1.

³⁷⁸ *See* Genscape_Tab05_0001875 and Genscape_Tab05_0001388.

³⁸⁰ Genscape May 2018 Response, at 16-17.

³⁸¹ *Id.* at 17.

and maintained in the sampling room.”³⁸² EPA found no evidence that Genscape performed independent sampling of finished fuel being delivered to third parties during these visits. The mere fact that SRAC collected and stored dyed samples on-site does not support Genscape’s claim that red dye was being added to entire shipments of finished fuel delivered to customers.

In contrast, in its April 2017 Response, Genscape makes a highly questionable contention to EPA that the “implementation of these procedures [were] without concern or incident” and that this red dye fuel marker system supported verifying Gen-X and SRAC’s invalid RINs.³⁸³ In actuality, based on documents submitted with Genscape’s April 2017 Response, the implementation of the red dye fuel marker system was fraught with serious problems, and it was, at best, in place for approximately one month’s time *after* the majority of Gen-X’s and SRAC’s RINs were generated.

4. Significance of Genscape’s claims and reliance on the red dye fuel marker system.

Genscape appears to rely on the implementation of the fuel marker system to justify, at least in part, its decision to verify the previously identified SRAC PIRs. However, the dye marker system cannot justify the decision to verify the PIRs for several reasons. First, Genscape’s decision to require SRAC to implement a red dye fuel marker system to ensure that finished fuel was not looped back around as feedstock demonstrates that Genscape had found significant evidence of a fuel-to-feedstock cycle. Implementing a new dye marker system as of May 2014 logically cannot be the basis for concluding that RINs generated under circumstances giving rise to the need for further assurance, but before implementation of the program to provide such assurance, were valid, and the vast majority of SRAC’s RINs were generated prior to the implementation of this system.³⁸⁴ Moreover, even as to RINs generated after implementation of the dye marker system, SRAC’s failure to fully and properly implement the red dye fuel marker system indicates that the dye marker system had little, if any, of the intended benefit in assuring the validity of RINs.

J. May 2014 inspection by Genscape’s Manager of Field Operations documented numerous negative findings at SRAC’s facility.

Genscape’s Manager of Field Operations, Creed Gann,³⁸⁵ performed an inspection at SRAC on May 7 and 8, 2014, during which he examined the efficacy of the fuel marker system.³⁸⁶ Mr.

³⁸² *Id.*

³⁸³ Genscape_0023.

³⁸⁴ EPA disagrees with Genscape’s assertion that EPA’s approval of Genscape’s QAP, following Genscape’s RIN verification letter to Scott Johnson, indicated EPA’s acceptance of the RIN verification; EPA’s approval of Genscape’s QAP was separate and discrete from Genscape’s decision to verify SRAC’s RINs. *See* Genscape_0031.

³⁸⁵ Creed Gann was one of the auditors who conducted the Field Inquiry and Part I of the For-Cause Audit.

³⁸⁶ Field inquiry, Part I was from 11/11/2013 to 11/13/2013, field inquiry, Part II was from 11/19/2013 to 11/21/2013, field inquiry, Part III was from 12/2/2013 to 12/5/2013 (Justin Stenger, Genscape Ag & Biofuels Field Technician, also went on the SRAC production facility and Centennial Transload observations portion of the field inquiry, Part III from 12/2/2013 to 12/5/2013), and the For-Cause Audit Part 1 – Fuel Buyers was from 1/28/2014 to 1/30/2014 as noted in the Genscape, Letter to Gen-X President and CEO, Scott Johnson and Mary Manners, U.S. EPA Compliance Division. Genscape_Tab02_0000009, 12, 14, 29.

Gann recorded his observations in the document titled “SRAC Red Dye Testing Notes.”³⁸⁷ In the “Red Dye Testing Analysis” section of his notes, Mr. Gann recorded that, on May 7, 2014, he “[c]ould not visually tell difference...Can see dye, but hard for the naked eye (VERY SPECTICAL (*sic*) ABOUT VISUAL CONFIRMATION).”³⁸⁸ For the May 8, 2014, test, Mr. Gann recorded similar observations: “-Could not visually tell difference -Product recirculated for 36 minutes, pulled sample, was not conclusive -Sample pulled at 1 hour and 4 minutes, was not conclusive -Can see dye, but hard for the naked eye (VERY SPECTICAL (*sic*) ABOUT VISUAL CONFIRMATION) – Sent email with pics to Susan [presumably Olson of Genscape] and Jim [presumably Venhoff of Genscape].” The only time Mr. Gann used words in all capital letters in his entire four-page write-up was to emphasize his skepticism about being able to tell if the fuel was dyed.³⁸⁹ Furthermore, in the section of his notes titled “Red Dye Testing Conclusion for week of 5/5/2014,” Mr. Gann wrote: “SRAC and Genscape agreed current red dye method was not an exceptable (*sic*) marker; did not pass ‘eye test.’”³⁹⁰ Genscape then stated in its April 2017 Response that the red dye system went into effect a few weeks after this site visit, in June 2014.³⁹¹

Mr. Gann also recorded here the questions he asked the SRAC facility manager, Greg Vierra, and the answers provided during the May 2014 audit. This exchange is under the “Questions” section of Mr. Gann’s notes and documents additional problematic findings, including:

Why are they currently receiving feedstock through gas pumps near tanks at front and back of facility?...Received multiple answers for this question at different time; answers were not consistent and *I believe they are up to something that they don’t want to make transparent* (emphasis added).³⁹² Do you have any background information on the poultry fat you purchased for feedstock? Do you know if the feedstock was pre-esterified? Greg [Vierra of SRAC] didn’t know anything about it. *Played dumb*. Said he would ask around (emphasis added).³⁹³ Sent him email (SRAC Operations in Depth for March 28th) asking about the multiple loads for 800145 on the 3/28. At first he [Greg Vierra] started to give me a bogus reason about topping off tankers and using multiple feedstocks. He then said they would put together a *detailed email explaining the situation* (emphasis added).³⁹⁴

EPA has not identified such a “detailed email explaining the situation” in Genscape’s submissions. Mr. Gann documented further distrust of Mr. Vierra’s responses regarding

³⁸⁷ This document was last updated on May 15, 2014.

³⁸⁸ Genscape_Tab05_0001410.

³⁸⁹ *Id.*

³⁹⁰ *Id.*

³⁹¹ Genscape_0023. Also, there is a note on one of the samples Creed Gann took on July 15, 2014, that it was “hard to tell,” which presumably is the same difficulty he had confirming the dye when he was at SRAC in May 2014, as documented in his “SRAC Red Dye Testing Notes” at Genscape_Tab05_0001410.

³⁹² Genscape_Tab05_0001409.

³⁹³ *Id.*

³⁹⁴ *Id.*

operational issues at SRAC's facility. In the "SOP/Documentation Notes" section of his write-up, Mr. Gann observed that:

- Their SOPs/Documentation process is in bad shape
- Not complete or up-to-date
- They don't follow procedures
- Procedures don't correlate with the process
- Their staff doesn't have enough bandwidth to follow procedures (this was stated by their staff on multiple occasions)
- Management likes to talk, not implement; Jim [presumably an SRAC employee] basically stated that if their employees can't follow a process they will find new ones on multiple occasions.
- They are trying to rush through the process
- Basically the facility is in disarray* (emphasis added)³⁹⁵

Mr. Gann identified and recorded problems with feedstock sampling, distrust of SRAC personnel's responses regarding feedstock related questions, timing issues regarding trailer 800145, the unacceptability of the red dye fuel marker system, among numerous other findings supporting his final statement that the "[SRAC] facility is in disarray."³⁹⁶ Despite Mr. Gann's decisive write-up, Genscape still made the decision to verify the RINs generated at SRAC and Gen-X.

When EPA asked how Genscape's decision makers considered Mr. Gann's observations from his May 2014 SRAC site visits, Genscape responded that "[Creed Gann's] document referenced by EPA was not intended for distribution to Genscape's leadership, and no information has been identified to date that would suggest that it was in fact shared with management."³⁹⁷ Thus, Genscape simultaneously represents that its auditors were performing extensive oversight of the SRAC facility and that its managers were uninformed of the results of that oversight. Genscape further dismisses Mr. Gann's recorded observations as merely an informal write-up that was not connected to an audit.³⁹⁸ Regardless of whether these observations were made within the context of an audit, it is unacceptable for Genscape to make a decision on RIN verification, after issuing a PIR notice and corresponding with SRAC management about the auditor-identified issues, without consulting the auditors who were performing "extensive oversight at the SRAC facility[,]"³⁹⁹ as Genscape described of Mr. Gann. This is yet another example of how Genscape failed to base its RIN verification decision on the documentation and evidence before it at the time of that decision.

Instead, Genscape has repeatedly relied on Scott Johnson's May 27, 2014, affidavit that SRAC was in compliance with the RFS.⁴⁰⁰ Genscape argues that it was reasonable to rely on Johnson's

³⁹⁵ Genscape_Tab05_0001411 (emphasis added).

³⁹⁷ Genscape May 2018 Response, at 11.

³⁹⁸ *Id.*

³⁹⁹ *Id.*

⁴⁰⁰ See, e.g., Genscape_Tab02_0000130, Genscape_0022.

affidavit, in part “because affidavits are heavily relied upon as a method of demonstrating compliance with the RFS regulations throughout 40 CFR 80 Subpart M.”⁴⁰¹ All renewable fuel producers attest to the validity of their renewable fuel when generating RINs. However, the fundamental purpose of the QAP program is to provide an outside auditor’s confirmation of the renewable fuel producers’ claims. Furthermore, it is specifically unreasonable for Genscape to rely on this statement of Scott Johnson when less than two weeks earlier Genscape’s own auditor, Creed Gann, had documented his distrust of the plant manager’s statements and his finding that the SRAC was in “disarray” and its personnel were “up to something that they don’t want to make transparent.”⁴⁰²

K. Gen-X’s June 2014 Letter Response to Genscape’s 2014 PIR Notice.

In Gen-X’s June 2014 Letter, it tries to explain away Genscape’s findings in its PIR Notice regarding anomalous SRAC transportation patterns and delivery timing. Genscape’s 2014 PIR Notice identified that the backhaul loop delivery method was impossible based upon its findings.⁴⁰³ In its response, Gen-X raised other shipping methods used in the industry, such as drop and hook and transloading, as an explanation for Genscape’s observation of the anomalous truck patterns and timing. EPA has already responded to Genscape’s related arguments earlier in this final action.⁴⁰⁴

Gen-X provided various explanations for the changing and temporary infrastructure at fuel delivery locations, including that it had been to many of the sites, and did not see any issues. It also assured Genscape that “[a] fraudulent operation would have no need for such equipment and scant motivation to invest in it.”⁴⁰⁵ It tried to explain away Genscape’s concerns with the feedstock suppliers by pointing out that feedstock suppliers need to preserve their sources of feedstock to avoid being bypassed. EPA has similarly already responded to Genscape’s related arguments earlier in this final action.⁴⁰⁶

Gen-X also stated that: “SRAC requested that the three feedstock suppliers, Grease Depot Centennial Transload, and Columbia Industrial Products review their records and verify whether they purchased feedstock or finished products from either Trooper Recycling (Trooper) or Advanced Development, Inc. (ADI).” Gen-X provided an email dated May 29, 2014, from feedstock supplier Centennial stating, “we have never purchased anything from Trooper Recycling.”⁴⁰⁷ Another document that Gen-X pointed to was an email from ADI.⁴⁰⁸

Genscape chose to rely on these documents. However, the statement that Gen-X provided from Centennial does not address if Centennial purchased feedstock or finished fuel from ADI, only

⁴⁰⁷ Genscape_Tab02_0000124-25.

⁴⁰⁸ *Id.*

Trooper.⁴⁰⁹ Also, the document that Gen-X provided from ADI is questionable in that it contains what appear to be some components of an email, but it does not contain:

- a date or time stamp on it, as traditional emails do;
- a “from” line, but rather a “reply-to” line;
- a “to” recipient’s email address, only “Scott Johnson” listed; and
- any demonstration of the authenticity of the sender as a knowledgeable and authorized representative of ADI because there is no email signature, corporate email address, or corporate logo, only this email address: advancedprintl@yahoo.com.⁴¹⁰

Also, this apparent email is not actually from a feedstock supplier, but from a fuel purchaser, and is therefore irrelevant to the issue of a feedstock supplier purchasing feedstock or finished product.

Additionally, in its June 2014 Letter, Gen-X references three purchase contracts and affidavits from Grease Depot, Centennial, and Columbia which Genscape claims “alone supported verification” of the RINs at issue.⁴¹¹ These affidavits provide that “NO-RINS HAVE BEEN GENERATED, SEPARATED, OR ASSIGNED TO THE PRODUCTS WE HAVE SOLD FOR THE YEAR ____ THAT MAY BE USED FOR THE PRODUCTION OF A RENEWABLE FUEL AND RINS GENERATION.”⁴¹² Genscape argues that it was reasonable and appropriate to rely on the affidavits “because affidavits are relied upon as a method of demonstrating compliance with the RFS regulations throughout 40 CFR 80 Subpart M.”⁴¹³ Indeed, all RIN generators attest to the validity of their RINs when they are generated.

The fundamental purpose of the QAP program is to provide checks outside of the RIN generators’ claims, and an affidavit is not evidence of RIN validity, nor is it sufficiently persuasive, particularly in the incomplete form here, to dismiss Genscape’s own auditors’ observations and documentation. The year category was whited out in all three affidavits so Genscape would not have known from these documents what year the feedstock providers’ attestations applied to.⁴¹⁴ Thus, the veracity and importance of these affidavits is questionable, if not meaningless, given the fact that the key relevant dates are whited out. Moreover, the purchase contracts and attached affidavits were notarized in 2013 and available for Genscape’s review during the 2013 onboarding process and retrospective audit.⁴¹⁵ If Genscape believed these documents to be both valid and sufficient to clear up any questions about validity of the RINs or a fuel-to-feedstock cycle, the additional steps Genscape took, including the Field Inquiry and For-Cause Audit, would arguably not have been necessary. It is clear that Genscape’s own investigators identified fuel-to-feedstock cycle information *after* these affidavits were signed.

Therefore, Genscape's current reliance on these documents as resolving any concerns about potential RIN invalidity is inconsistent with its real time actions and statements.

L. Genscape's September 2014 Letter to Gen-X verifying the RINs and justifying the action.

In its September 2014 Letter, Genscape makes dubious assertions about what it was able to verify after issuing the 2014 PIR Notice. Genscape asserts in this letter that "the information now before Genscape (including the explanations provided by SRAC)⁴¹⁶ indicates that:

- The buyers of fuel produced by SRAC had previously been confirmed through Genscape's QAP activities at the Dublin, Georgia facility;
- The feedstock supply chain upon which SRAC relies is highly fragmented [*sic*], competitive, and dependent upon the generation of thin margins—conditions which in turn drive secrecy and confidentiality concerns likely to have inhibited Genscape's initial audit efforts;
- Data obtained from at least one of SRAC's feedstock suppliers, (i.e. Grease Depot) reveals no basis for prior or ongoing concerns;
- The use of "drop and hook" and "transloading" methods of transportation within the industry, together with the observations of SRAC's own management of the operations of its fuel buyers during the timeframe in question, satisfactorily explains aspects of the transportation processes observed downstream of SRAC that presented concerns to auditors; and
- Statements and affidavits submitted in support of SRAC's June 6, 2014 response to the PIR notice refute several of the specific concerns raised by Genscape, including the potential that feedstock suppliers might have purchased "feedstock" from purchasers of finished fuel from SRAC, as well as the appearance of potentially improper relationships among a fuel buyer and a feedstock supplier."⁴¹⁷

These statements are in direct conflict with Genscape's documented findings and statements, as described above in this section. Genscape was unable to verify SRAC's fuel purchasers during Part 1 of the For-Cause Audit, and, therefore, initiated Parts 2 and 3 of the For-Cause Audit.⁴¹⁸ Genscape's assertions regarding the confidentiality of the feedstock suppliers are similarly

⁴¹⁶ The explanations Genscape references here are in the June 6, 2014 Letter from Gen-X to Genscape, in response to the PIR Notice letter. *See generally* Genscape_Tab02_0000136-40.

⁴¹⁷ Genscape_Tab02_0000097-98.

⁴¹⁸ See *supra*, Section IV.F.

meritless, as Genscape had confidentiality agreements with SRAC,⁴¹⁹ Centennial,⁴²⁰ and Grease Depot,⁴²¹ among other reasons as described in Section IV.E. Also, in Section IV.E., EPA discusses Genscape's requirement to verify all three SRAC feedstock suppliers and that verification of one supplier was insufficient for RIN verification. Genscape's reliance on the "drop and hook" and "transloading" delivery methods is similarly meritless, as explained in Section IV.F., where EPA's analysis indicates that trailers were returning to SRAC faster than physically possible, regardless of delivery method.⁴²² Additionally, as explained in Section IV.K., the documents Gen-X submitted on behalf of SRAC in its June 2014 Letter were insufficient for RIN verification and at least one of the documents relied upon was of questionable veracity.⁴²³

Genscape also states in this letter that it "gives *significant* weight to SRAC's cooperation throughout this protracted audit process, and, more importantly, to the enhanced supply chain and fuel buyer oversight measures now being implemented by Gen-X and SRAC." (emphasis added).⁴²⁴ Here, Genscape admits that it relied "significant[ly]" on unverified statements of SRAC and Gen-X's management instead of the observations and findings its auditors documented.⁴²⁵ Additionally, the measures Genscape references are the affidavit from Scott Johnson "attesting to integrity in supply chain activities," the implementation of the red dye fuel marker system, "[d]eveloping enhanced internal quality control and employee procedures to prevent and detect feedstock fraud," and "additional information about and access to SRAC's feedstock supplier and fuel customer locations..."⁴²⁶ As was previously stated, EPA requires and expects all renewable fuel producers to attest to the validity of the renewable fuel and RINs they produce. The purpose of the QAP program was to provide independent verification to avoid reliance on the self-interested attestations of renewable fuel producers. Additionally, as described in Section IV.J., Genscape's auditors had made problematic observations at the SRAC facility shortly before Scott Johnson issued this affidavit. Also, during the May 2014 site visits, Creed Gann of Genscape made observations to the effect of SRAC failing to adequately implement the red dye fuel marker system.⁴²⁷ Yet, despite these findings and ongoing concerns, Genscape chose to give more weight to Scott Johnson's word than the documented observations and concerns of its own staff.

⁴²⁷ See *supra*, Sections IV.I and J.

M. Scott Johnson’s November 2015 guilty plea for fraudulently generating at least 72 million RINs.

Scott Johnson, the President of Gen-X and a corporate officer of SRAC, entered a guilty plea on November 24, 2015, for fraudulently generating at least 72 million RINs from approximately October of 2012 to approximately April of 2015, based on renewable fuel that was never produced or fuel that was re-processed as feedstock.⁴²⁸ Specifically, Scott Johnson admitted “that the conspirators used a circular scheme whereby ‘feedstock’ was reprocessed multiple times and RINs were fraudulently generated each time the ‘feedstock’ was reprocessed. To carry out the scheme, GEN-X procured ‘feedstock’ for renewable fuel from other conspirators who bought GEN-X’s renewable fuel ‘product’ and sold that ‘product’ back to GEN-X as a ‘feedstock.’ Thus, rather than generating new renewable fuel with each batch of feedstock, the same product was simply being re-circulated through the GEN-X facilities.”⁴²⁹ This scheme is referred to as a fuel-to-feedstock cycle.

The evidence shows that Genscape failed to verify the QAP element described at 40 C.F.R. § 80.1469(a)(1)(i)(G) which requires that “[f]eedstock is not renewable fuel for which RINs were previously generated.” This very element of Genscape’s QAP was intended to prevent the fuel-to-feedstock cycle fraud to which Scott Johnson pled guilty. Genscape’s own findings regarding such a scheme prompted it to conduct a Field Inquiry and For-Cause Audit of SRAC. During those investigations, Genscape uncovered voluminous amounts of compelling evidence showing that finished fuel was being delivered back to the SRAC facility as feedstock, thereby forming a “fuel-to-feedstock” cycle.⁴³⁰ The evidence led Genscape to notify Gen-X that it was categorizing the RINs generated for fuel produced between November 1, 2013 and December 3, 2013, as potentially invalid RINs (PIRs).⁴³¹ However, despite uncovering the fraudulent scheme to which Scott Johnson later pled guilty, on September 5, 2014, Genscape notified Scott Johnson, the President of Gen-X, and a corporate officer of its subsidiary SRAC, of its decision to uphold the QAP-A status for the RINs previously identified as PIRs, and that it intended to verify these RINs as A-RINs under the final QAP rule, which would become effective on September 16, 2014.⁴³² On September 16, 2014, EPA approved Genscape’s QAP A (hereinafter QAP A or Final QAP) and notified Genscape that any A-RINs Genscape informally verified during the interim period were eligible for formal verification if Genscape determined that the RINs were valid.⁴³³ On September 29, 2014, Genscape verified all of Gen-X’s RINs, including those generated at its subsidiary facility SRAC, the majority of which were A-RINs, under the RFS QAP final rule.⁴³⁴

⁴²⁸ See, *United States v. Gary Jury*, No. 1:16-CR-5 (N.D. Indiana, Sept. 19, 2016), *United States v. Fred Witmer*, No. 1:16-CR-5 (N.D. Indiana, Sept. 19, 2016).

⁴²⁹ See, *United States v. Scott Carl Johnson*, No. 4:15-CR-6042-SMJ, at 5 (E.D. Wash. Nov. 24, 2015)

⁴³⁰ Genscape_Tab02_0000001: “Genscape has collected information that may suggest that at least a significant portion of the feedstock used by SRAC to produce the ‘G-Force’ fuel additive between November 1, 2013, and December 3, 2013, was actually finished fuel delivered back to the SRAC facility as feedstock, thereby forming a ‘fuel-to-feedstock’ cycle.”

⁴³⁴ See Genscape_Tab29_0000036; see also, email from Jim Venhoff to Brent Williams, cc to Robert Barton, Susan Olson, on September 29, 2014; see also, Genscape_Tab02_0000098.

Just over one year later, Scott Johnson (and many of his co-conspirators since then) pled guilty for these and related offenses.⁴³⁵

Section IV above details the information that supports EPA's decision to revoke Genscape's registration, QAP A, and to require RIN replacement. Genscape was presented with overwhelming evidence of a fuel-to-feedstock fraud at the time that it investigated Gen-X and SRAC, including Genscape's findings in the Field Inquiry, For-Cause Audits, the PIR Notice, and subsequent inspections of remedial procedures it implemented. Genscape documented the findings but failed repeatedly to comply with the RFS regulations and its approved QAP described in detail above. These specific failures ultimately led to Genscape's verification of Gen-X and SRAC RINs that were fraudulently generated.

V. Other Arguments Advanced by Genscape.

A. Genscape's claim that its decision to verify the RINs was reasonable is neither a valid defense to violations of regulatory requirements nor does it satisfy any professional standard of care given the information Genscape itself uncovered.

Throughout its April 2017 Response, Genscape alleges the "reasonable[ness]" of its decision to verify Gen-X's and SRAC's RINs as justification for its actions.⁴³⁶ Genscape also asserts that EPA is holding it to a professional standard of care that equates to a standard of infallibility.⁴³⁷ The reasonableness of Genscape's decision to verify the Gen-X and SRAC RINs is not a valid defense for Genscape's failure to comply with its regulatory requirements. The CAA imposes a strict liability scheme for civil violations of the Act itself and the regulations promulgated

⁴³⁵ *United States v. Scott Carl Johnson*, No. 4:15-CR-6042-SMJ, at 1 (E.D. Wash. Nov. 24, 2015); *United States v. Donald Holmes*, No. 4:15-CR-06044-SMJ, at 1 (E.D. Wash. Dec. 16, 2015); *United States v. Thomas Davanzo*, No. 2:15-CR-141-FtM-99MRM, at 1 (M.D. Florida Jun. 2, 2016); *United States v. Robert Fedyna*, No. 2:15-CR-141-FtM-99MRM, at 1 (M.D. Florida Jun. 2, 2016); *United States v. Andre Bernard*, No. 2:17-CR-61-SPC-MRM, at 1 (M.D. Florida Jun. 12, 2017); *United States v. Nancy Bush-Estes*, No. 4:15-CR-6047-SMJ, at 1 (E.D. Wash. Dec. 16, 2015); *United States v. Richard Estes*, No. 4:15-CR-6048-SMJ, at 1 (E.D. Wash. Dec. 16, 2015). Note: Genscape, in its April 2017 Response, argues that EPA's use of Scott Johnson's plea agreement is arbitrary because EPA is simultaneously stating that it was inappropriate for Genscape to have relied on an affidavit from Scott Johnson. However, this ignores the difference between facts admitted in a guilty plea to a court, leading to a criminal sentence, and an affidavit purporting to establish the affiant has not engaged in any wrongdoing. Moreover, EPA is looking at the facts on the ground laid out in Genscape's own documentation, as described in Section IV above, and Scott Johnson's guilty plea stating that those facts are correct, to hold Genscape accountable for its part in allowing the fuel-to-feedstock cycle to continue. Considering the facts that were before Genscape at the time, Genscape acted arbitrarily when it relied on Scott Johnson's affidavit, regarding his company's RFS compliance, rather than its own documentation indicating a fuel-to-feedstock cycle. This documentation included written notes from Genscape's Field Operations Manager describing the Manager's distrust of the SRAC plant manager and staff, and concluding that the facility was in disarray. The site visit that resulted in these observations took place shortly before Scott Johnson transmitted his affidavit to Genscape. It was unreasonable in these circumstances for Genscape to rely upon Scott Johnson's words to resolve doubts concerning SRAC's activities.

⁴³⁶ Genscape_0001-2, 4, 9, 11, 16, 18, 20, 24, 27-28, 30-32.

⁴³⁷ Genscape_0027.

thereunder by EPA.⁴³⁸ As such, the reasonableness of Genscape's actions is not a basis for determining whether Genscape complied with its regulatory requirements.

The only context in which it may be relevant to assess the reasonableness of Genscape's decisions is when deciding whether to require full RIN replacement based on auditor negligence.⁴³⁹ However, EPA's actions described in Section III are fully justified regardless of whether EPA can show auditor negligence. For example, EPA finds that Genscape's failure to fully and properly implement the QAP alone justifies requiring a full RIN replacement, in light of the facts and circumstances described in Section IV. Separately, EPA finds that the facts presented in Section IV support a finding of negligence, which also supports EPA's decisions to require RIN replacement, and take the other actions described in Section III.

Considering the reasonableness of Genscape's decision to verify the RINs for the limited question of whether there was auditor negligence, Genscape's arguments regarding the professional standard of care it was required to follow fail because its decision to verify the Gen-X and SRAC RINs was unreasonable no matter the standard of care given the evidence it collected and documented. Genscape never actually establishes for EPA what professional standard of care is applicable in this situation. Instead, Genscape asserts multiple standards (the objective, reasonable person standard,⁴⁴⁰ a standard of commercial reasonableness,⁴⁴¹ and the standard of professional reasonableness) without explaining how Genscape met any of those standards in this matter.⁴⁴²

Jurisdictions are split on the level of care professionals are obligated to take given their status as experts in an area.⁴⁴³ States have generally adopted one of three approaches:⁴⁴⁴ (1) there is one single standard of care, that of a reasonable prudent person in the same or similar circumstances, and the professional status of the actor is considered a part of the circumstances;⁴⁴⁵ (2) the professional assumes an obligation to take greater care when s/he holds her/himself out to the public as a professional or expert;⁴⁴⁶ and (3) the standard of the reasonable, prudent professional in that field in the same or similar circumstances.⁴⁴⁷ All of these standards of care contain similar

⁴⁴⁰ Genscape_0001.

⁴⁴¹ Genscape_0002.

⁴⁴² Genscape_0004.

⁴⁴³ Paul M. Coltoff et al., *Corpus Juris Secundum: Negligence* § 163. Professional standard of care or conduct, June 2017.

⁴⁴⁴ Duty of care is an element of negligence, an area of tort law, governed by common law. The Supreme Court established in *Erie Railroad Company v. Tompkins*, 304 U.S. 64, 78 (1938), that there is no general federal common law. Therefore, federal courts adjudicating controversies governed by common law must apply the law of the state in which the federal court is located.

⁴⁴⁵ See, *Flowers v. Torrance Memorial Hospital Medical Center*, 8 Cal. 4th 992, 35 Cal. Rptr. 2d 685, 884 P.2d 142 (1994).

⁴⁴⁶ *Stanley v. McCarver*, 208 Ariz. 219, 92 P.3d 849, 854 (2004).

⁴⁴⁷ *Delaney v. Baker*, 20 Cal. 4th 23, 82 Cal. Rptr. 2d 610, 971 P.2d 986 (1999).

elements: professional knowledge, experience and expertise which an actor is required to use when acting within its professional role.

Under any of these theories of the professional standard of care, Genscape acted unreasonably and breached its duty of professional care. Under the standard with the lowest burden, the ordinary standard of care, Genscape's specialized knowledge, experience, and skill are taken into account as part of the circumstances. As laid out in Section III, Genscape's verification of the RINs was contrary to its own documentation and observations and was unreasonable. For example, during the first part of Genscape's Field Inquiry, Genscape concluded it was unable to determine a location where fuel was received by one or more third parties, and Genscape was unable to locate the named fuel recipients or the unloading infrastructure, such as personnel or pumping and/or storage facilities, at the fuel receipt point(s) named in documentation or conversations provided by SRAC or named customers.⁴⁴⁸ Under the circumstances described in Section III, a reasonable person, with the expertise Genscape has in the renewable fuels market, would not have verified the RINs. Thus, if Genscape could not be found to have acted reasonably under the standard with the lowest burden of care, then it will certainly fail under the other standards, with higher burdens, for the same reasons.

In its April 2017 Response, Genscape refers to the professional auditing standards of the Public Company Accounting Oversight Board (PCAOB) as a benchmark against which it compares its actions.⁴⁴⁹ According to the PCAOB guidelines, an auditor is required to exercise "due professional care,"⁴⁵⁰ which includes using Professional Judgment and Professional Skepticism when performing the audit and drawing conclusions.⁴⁵¹ Genscape failed to meet these standards as well. In fact, Genscape only selectively quotes subsections of the PCAOB guidelines,⁴⁵² citing portions of sections 1015.07⁴⁵³ and .09,⁴⁵⁴ but ignoring entirely subsection .08, which states:

Gathering and objectively evaluating evidence requires the auditor to consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process.⁴⁵⁵

⁴⁴⁸ Genscape_Tab24_0000001.

⁴⁴⁹ EPA does not assert that the standards published by the PCAOB apply to Genscape, however, Genscape uses the PCAOB standards in its Response Letter, therefore, EPA is addressing that argument.

⁴⁵⁰ Genscape_0028.

⁴⁵¹ Auditing Standards of the Public Company Accounting Oversight Board (PCAOB), AS 1015: Due Professional Care in the Performance of Work (2002), available at <https://pcaobus.org/Standards/Auditing/Pages/AS1015.aspx>, last accessed on April 15, 2019.

⁴⁵² Genscape_0028.

⁴⁵³ AS 1015.07 Due professional care requires the auditor to exercise professional skepticism. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. *The auditor uses the knowledge, skill, and ability called for by the profession of public accounting to diligently perform, in good faith and with integrity, the gathering and objective evaluation of evidence* (emphasis added to illustrate the portion Genscape omitted).

⁴⁵⁴ AS 1015.09 The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. *In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest* (emphasis added to illustrate the portion Genscape omitted).

⁴⁵⁵ AS 1015.08.

Under the PCAOB guidelines, Genscape would have been required to consider the “competency and sufficiency of the evidence” before verifying the RINs. Genscape itself called the findings from its For-Cause Audit “inconclusive,” which weighs against RIN verification.

Another example of Genscape’s selective presentation of the PCAOB guidelines is its explanation of Professional Skepticism, which is considered part of “reasonable care and diligence.” The PCAOB definition of Professional Skepticism requires that the auditor perform the audit with “an attitude that includes a questioning mind and a critical assessment of audit evidence.”⁴⁵⁶ Genscape neglects subsection .09’s second half: “In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest.”⁴⁵⁷ This is precisely what the evidence shows Genscape did in choosing to verify the RINs despite extensive evidence of a fuel-to-feedstock cycle. Genscape repeatedly relied on producer-submitted data and the cooperative demeanor of the Gen-X/SRAC leadership as a basis for verifying the RINs.⁴⁵⁸ Genscape even cited “Scott Johnson’s high level of engagement”⁴⁵⁹ and his apparent cooperation when accepting his affidavit regarding the validity of the RINs.⁴⁶⁰ Genscape also cites the reputable legal counsel retained by Gen-X as a favorable factor it considered when verifying the RINs.⁴⁶¹ This is nonsensical; any criminal can hire reputable legal counsel, but that has no bearing on the credibility of the client. Instead of relying on the reputation of Gen-X’s counsel, Genscape should have given more weight to findings of its own inspector who documented his distrust with the SRAC plant manager and that the facility “was in disarray.”⁴⁶² In this way, Genscape impermissibly relied on the purported honesty of the Gen-X/SRAC management instead of exercising its professional skepticism and judgment in weighing all the evidence available to it. Therefore, Genscape also failed to exercise the appropriate Professional Skepticism as defined by the PCAOB.

Based on the above, to the extent an auditor’s standard of care is relevant to whether Genscape complied with its regulatory requirements as a QAP auditor, Genscape’s decision to verify the RINs fails to satisfy an auditor standard of care. Genscape had identified and uncovered the fuel-to-feedstock cycle, for which Gen-X and SRAC employees pled guilty, before it verified the RINs, but notwithstanding all the evidence, it still chose to verify the RINs.

B. Genscape’s claim it was the victim of fraud is meritless.

Genscape argues in its April 2017 Response that it was the victim of the fraud; therefore, EPA should not lift the cap on RIN replacement. However, Genscape had identified massive amounts of compelling information through its own reports from the Field Inquiry, For-Cause Audit, and other site visits, as well as requiring Gen-X and SRAC to follow enhanced assurance procedures like the implementation of the red dye fuel marker system and the Code of Conduct, described below, relating to the fraud for SRAC and Gen-X employees. Furthermore, Creed Gann,

⁴⁵⁹ *Id.*

⁴⁶⁰ *Id.*

⁴⁶¹ Genscape_0002-0003.

⁴⁶² Genscape_Tab05_0001411.

Genscape's Manager of Field Operations, documented additional findings during his May 2014 visit of SRAC demonstrating his distrust of the SRAC plant managers. All of this evidence, submitted to EPA by Genscape, demonstrates knowledge of a fuel-to-feedstock cycle and are not indicative of Genscape being the victim of such a scheme.

Genscape's argument that it was a victim of the fraud is without merit based on all the information described in Section IV. Additionally, in Genscape's May 2014 "SRAC Marker Testing Outline," there is a section titled "Gen-X/SRAC Code of Conduct," which includes:

- a. What is RIN fraud (SRAC)
- b. Identifying the severity of RIN fraud (SRAC)
- c. Address repercussions of RIN fraud (SRAC)
- d. Employees sign a code of conduct (SRAC)⁴⁶³

Genscape apparently found it necessary to put a "Gen-X/SRAC Code of Conduct" in place in May 2014 that required SRAC to identify and address RIN fraud at its facilities. Genscape was therefore aware of the fraudulent fuel-to-feedstock loop that was occurring (or at a minimum could be occurring) at these facilities and even tried to alleviate such a scheme. Clearly, Genscape's novel argument of being a victim of that same fraud is inconsistent with its prior action of requiring that "Code of Conduct" be put in place.

Genscape's claim of victimhood is also in direct conflict with its decision to ensure the integrity of the RIN generation system going forward by implementing measures including the red dye fuel marker system.⁴⁶⁴ Genscape identified the fuel-to-feedstock cycle in its own Field Inquiry and For-Cause Audit and required SRAC to implement a red dye fuel marker system to ensure the integrity of the RIN generation system going forward. Now, years later, Genscape asks EPA to ignore all those findings and release Genscape of its regulatory obligations as the QAP auditor given Genscape's claim of also being a victim in this fraudulent scheme.

As the information in Section IV abundantly demonstrates, Genscape's argument that it was a victim of the fraud rings hollow when there is compelling contemporaneous evidence, documented by Genscape's own auditors, of a fuel-to-feedstock cycle.

C. Genscape's claims that EPA has not provided adequate process are baseless.

Genscape claims that EPA has not provided the company with appropriate process since EPA's January 2017 Notice.⁴⁶⁵ Genscape asserts that it is due a "full administrative hearing" before EPA can revoke its registration, revoke its QAP A, or require it to replace the RINs at issue in this case.⁴⁶⁶ Genscape's statements regarding the process it is owed are broad, spread across three documents, and not clearly discernable. Genscape seems to base its argument on two

claims: (1) the procedures EPA has provided Genscape during this matter amount to a violation of the procedures provided for in the Agency's regulations and the Clean Air Act; and, in the alternative, (2) the procedures afforded under EPA's regulations violate the Due Process Clause of the Constitution. As shown below, EPA's process was appropriate under the Agency's regulations, the Clean Air Act, and the Constitution, and so neither claim is accurate.

1. Genscape's statutory and regulatory claims are unsupported.

Genscape claims that it will experience "financial losses" stemming directly from the EPA actions described in Section III. Genscape further claims that these "financial losses" it faces "amount to a civil penalty," and that it should be afforded an administrative hearing under 40 C.F.R. § 22.1(a)(2) before EPA may take those actions.⁴⁶⁷ Genscape fundamentally misconstrues the nature of the provision it cites.

Section 22.1(a)(2) indicates which actions under the CAA are subject to the procedural requirements in 40 C.F.R. Part 22, Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits. Section 22.1(a)(2) indicates that EPA actions in which an "administrative civil penalty" will be assessed are subject to the procedural requirements of Part 22, which includes an administrative hearing.⁴⁶⁸ The RFS program (and the RINs that are part of that program) is one part of the EPA regulations governing fuels and fuel additives and is authorized by 42 U.S.C. § 7545(o). Section 7545(d)(1) provides authority for civil penalties for fuel and fuel additive violations.⁴⁶⁹ The term "civil penalty" within 42 U.S.C. § 7545(d)(1) and 40 C.F.R. § 22.1(a)(2) is not a broad term referring to any financial impact or requirement in EPA's regulations. A "civil penalty" is compelled only for a "violation" and only through an "enforcement action."⁴⁷⁰

The actions EPA is taking as described in Section III are not to assess a "civil penalty" so the requirements of Part 22 do not apply to those actions. EPA is therefore not required to offer an administrative hearing prior to taking these actions. The actions EPA is taking today (revoke Genscape's registration, revoke its QAP A, require full RIN replacement) are those provided in EPA's regulations for when a QAP auditor like Genscape fails to comply with its regulatory requirements. These regulatory provisions enable EPA to take these actions and are wholly separate from those that enable EPA to commence an enforcement action.

EPA is clearly not currently pursuing an enforcement action against Genscape, as contemplated by the statute and the regulations. Genscape has made no valid argument that any "financial

⁴⁶⁷ Letter from Paul C. Freeman, Attorney for Genscape, to Byron Bunker, EPA OTAQ Compliance Division Director, on February 17, 2017, at 9.

⁴⁶⁸ 40 C.F.R. § 22.1(a)(2) ("These Consolidated Rules of Practice govern all administrative adjudicatory proceedings for...[t]he assessment of any administrative civil penalty under sections...211(d)...of the Clean Air Act, as amended (42 U.S.C. 7545(d)).

⁴⁶⁹ 42 U.S.C. § 7545(d)(1) (Any person who violates subsection...*(o)* of this section or the regulations prescribed under subsection...*(o)* of this section...shall be liable to the United States for a civil penalty of not more than the sum of \$25,000 for every day of such violation and the amount of economic benefit or savings resulting from the violation....).

⁴⁷⁰ See 42 U.S.C. § 7524(b), (c); 40 C.F.R. §§ 80.1460-1463.

losses” it may suffer qualify as “civil penalties” beyond a mere conclusory statement.⁴⁷¹ Genscape has made no such argument because Genscape itself clearly understands that these actions do not qualify as an enforcement action seeking a civil penalty. Accordingly, Genscape is not entitled to a hearing under 40 C.F.R. § 22.1(a)(2).

2. Genscape’s constitutional claims are unsupported.

Genscape also claims that “the administrative procedures afforded under the RFS fail to meet the Constitution’s Due Process standards.”⁴⁷² Its Due Process Clause arguments are not entirely clear, but it seems Genscape may be attempting to argue that more process is necessary before the deprivation of its “liberty” or “property” interests through these EPA actions.⁴⁷³ Genscape seems to identify three distinct types of interests: (1) its reputation, both in the abstract and in terms of future financial harm; (2) its registration with EPA as a QAP auditor and its QAP A; and (3) the financial impact from retiring the RINs.⁴⁷⁴ EPA is unconvinced that all the interests alleged above are sufficient to trigger due process protections but will nonetheless address them below.

a. Genscape’s claim of reputational damage due to EPA’s notice lacks merit.

It is not clear what remedies Genscape would seek at any potential hearing in terms of any alleged reputational damage. A prospective plaintiff’s reputation can sometimes count as a liberty interest that might require a “name-clearing” hearing after it is damaged.⁴⁷⁵ This is usually analyzed as a substantive rather than a procedural due process question. Here, Genscape is generally alleging procedural due process violations. However, since Genscape’s arguments do not mark clear doctrinal lines of analysis, EPA will consider it within both doctrines.

Reputation is not an interest protected by the Due Process clause on its own; reputational damage must be paired with the deprivation of some other tangible right or interest (such as a property right).⁴⁷⁶ These are generally known as “stigma-plus” due process claims.⁴⁷⁷ The vast majority of cases brought under a stigma-plus due process theory are in the employment context.⁴⁷⁸ Thus, any alleged reputational damage to Genscape must be paired with some sort of damage to a more tangible right or interest.

Genscape alleges reputational damage from both the publication of EPA’s January 2017 Notice on the EPA website and EPA’s final action today.⁴⁷⁹ For Genscape to be entitled to a name-clearing hearing for damages from either of these actions, it would have to prove the elements of

⁴⁷⁸ *See Id.*

⁴⁷⁹ Genscape_0002, 38.

a stigma-plus claim. Stigma-plus claims require similar elements to those of a defamation claim (publication of the claim at issue and falsity of that claim) and the deprivation of a tangible right or interest.⁴⁸⁰ To satisfy the elements of a defamation claim, Genscape would have to prove that the reputational damage it allegedly sustained was based on false factual statements by EPA. All of EPA's factual statements are based on either Genscape's own documentation, submitted to EPA with a declaration of the documents' veracity,⁴⁸¹ or on the guilty pleas entered into by the Gen-X and SRAC conspirators. EPA presumes the facts are correct on which it based its January 2017 Notice and today's actions and Genscape has offered nothing to contradict that presumption. Accordingly, Genscape cannot show the elements to a defamation claim and therefore cannot prove the elements of a stigma-plus claim based on reputational damage.

Genscape cites to *Asbestec Const. Services, Inc. v. U.S. E.P.A.* for the principle that certain administrative sanctions can trigger unspecified procedural due process protections.⁴⁸² As an initial matter, the EPA actions at issue here are distinguishable from those in this case as these are regulatory compliance actions and not those taken in an enforcement action. Regardless, the *Asbestec* court held that "the possible adverse effect of [EPA's compliance order] on petitioner's future business prospects is insufficient by itself to give rise to a claim that one has been deprived of a liberty interest."⁴⁸³ In other words, reputational harm either as a liberty interest on its own or in terms of a potential financial impact to a plaintiff's business is not a constitutionally recognized interest that triggers due process protection, let alone the specific procedures Genscape is seeking in this case.

- b. Even if there is a protected interest at stake, EPA has provided more than sufficient process to satisfy the requirements of the Due Process Clause.

Even if the interests Genscape lists would trigger due process protections, the process EPA has provided is more than sufficient under the Supreme Court's *Mathews v. Eldridge* balancing test.⁴⁸⁴ Despite Genscape's claims to the contrary, the mere fact that "due process is required" does not mean that a pre-deprivation hearing is necessary. As the Supreme Court outlined in *Mathews v. Eldridge*, "due process is flexible and calls for such procedural protections as the particular situation demands."⁴⁸⁵ The Court laid out a three-factor balancing test for making such a determination: (1) "the private interest that will be affected by the official action;" (2) "the risk of an erroneous deprivation of such interest through the procedures used, and the probable value, if any, of additional or substitute procedural safeguards;" and (3) "the Government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail."⁴⁸⁶ The process afforded Genscape during this matter satisfies these requirements.

⁴⁸⁶ *Id.* at 335.

The “financial impacts” from EPA’s actions do not require a “pre-deprivation” hearing for Genscape. EPA has already provided Genscape with a great deal of administrative process in this case, including multiple emails, letters, phone calls and in-person meetings. As outlined in Section II.C. above, Genscape has been given many opportunities to present its case to EPA. In addition, Genscape may seek judicial review of EPA’s final actions in the appropriate appellate court under 42 U.S.C. § 7607(b)(1). Multiple courts have held that reasonable administrative processes are sufficient to protect due process.⁴⁸⁷ This is especially true when there will be judicial review of an agency’s final action.⁴⁸⁸

EPA has a strong interest in a more informal process in this case. The government has a strong interest in deterring future non-compliance by taking decisive action. The validity of RINs in the market is an integral aspect of the RFS program, and it is important to send a strong signal to other third-party auditors that they must comply with the regulatory requirements. Moreover, an informal process has more immediate consequences and sends a stronger deterrence message than a formal, closely held process.

Additionally, EPA’s particular administrative process in this case is supported by strong governmental interests. Genscape was the largest QAP provider in the RFS program. EPA chose to make its initial notice public so that the renewable fuel producers who utilized Genscape’s QAP services could choose whether to continue to utilize them as a QAP provider or switch to another QAP provider. If the Agency had not made the notice public, and chose to revoke Genscape’s registration, numerous renewable fuel producers would not have had sufficient time to identify another QAP provider and complete the registration process without temporarily being unable to generate QAP RINs. This could have severely damaged the RIN market and harmed obligated parties as well as RIN producers.

Finally, the EPA has limited resources to handle these cases, and further process would put even more strain on those resources. “[A]n Agency has broad discretion to choose how best to marshal its limited resources and personnel to carry out its delegated responsibilities.”⁴⁸⁹ EPA must balance its limited resources in the face of budget uncertainties and prioritize its time and personnel. Nevertheless, Genscape has already been granted multiple in person meetings, numerous telephone conferences, in addition to continuous email correspondence.

⁴⁸⁷ See *Somerset House, Inc. v. Turnock*, 900 F.2d 1012 (7th Cir. 1990) (holding that Illinois Department of Public Health administrative procedures imposing a conditional license, placing the facility on a list of violators, and withholding promised state funds were sufficient to satisfy due process needs without a pre-deprivation oral hearing); *Taylor v. District Engineer, U. S. Army Corps of Engineers*, 567 F.2d 1332 (5th Cir. 1978) (holding the Army Corps administrative process for approving and rejecting permits was sufficient for due process); *Buttrey v. United States*, 690 F.2d 1170 (5th Cir. 1982) (same).

⁴⁸⁸ See *Gallo Cattle Co. v. USDA*, 159 F.3d 1194 (9th Cir. 1998) (holding that a milk producer was not entitled to a full oral hearing before a monetary assessment was made by USDA, and that post-deprivation judicial review, including the potential of a refund if erroneous, were valid); *Duquesne Light Co. v. Environmental Protection Agency*, 698 F.2d 456 (D.C. Cir. 1983) (finding that monetary penalties under the Clean Air Act did not violate due process if the penalized party has some initial administrative review of the penalty and is given eventual judicial review with the possibility of a refund); see also *Employers Ins. v. Browner*, 848 F. Supp. 1369 (N.D. Ill. 1994); *In re Acushnet River & New Bedford Harbor*, 722 F. Supp. 888 (D. Mass. 1989); *United States v. Seymour Recycling*, 679 F. Supp. 859 (S.D. Ind. 1987).

⁴⁸⁹ *Massachusetts v. EPA*, 549 U.S. 497, 527 (2007).

Genscape has already been provided with ample process during this matter. Any further procedural safeguards would be duplicative, costly, and wasteful of Agency resources, especially since EPA's actions are immediately judicially reviewable. Accordingly, the process provided to Genscape easily passes the bar laid down by the three-part *Mathews* test.

c. Genscape's constitutional challenges raised by Genscape are untimely.

In any case, if Genscape believed that the numerous processes laid down by EPA's regulations in this context were Constitutionally deficient, it had the opportunity to challenge those processes when the regulations were first published in the Federal Register. Under 42 U.S.C. § 7607(b)(1), challenges to EPA regulations that implement 42 U.S.C. § 7545 must be filed in the D.C. Circuit Court of Appeals within 60 days of Federal Register publication of those regulations. Any challenge to those regulations is untimely.

VI. Conclusion

For the reasons described above, and after careful consideration of the information that Genscape provided to EPA regarding this matter, EPA is: (1) revoking Genscape's registration as a QAP auditor; (2) revoking its QAP A; (3) requiring Genscape to replace the remaining 69,168,201 RINs at issue.⁴⁹⁰ Within 60 days of receipt of this determination, Genscape must replace the 69,168,201 invalid A-RINs used for compliance purposes generated by Gen-X and SRAC.⁴⁹¹ The valid RINs must meet the requirements of 40 C.F.R. § 80.1474(d).

EPA is confident that Genscape can bear the cost of full RIN replacement, based on Genscape's representation in its "Genscape RIN Replacement Service Plan for QAP A," part of its QAP A submission for EPA approval. In that document, Genscape stated that it had the financial backing of its parent company, the Daily Mail and General Trust, with \$2.5 billion in annual revenues, in addition to "Genscape's own balance sheet." This additional financial support was listed in case Genscape needed to address the exact situation that it is now in: being liable for RIN replacement based on its failure to meet the RFS regulations and QAP requirements. Genscape made the decision to verify the A-RINs generated by Gen-X and SRAC, despite its own reports and findings, as described in Section IV. Any claim that Genscape is unable to replace the invalid RINs is meritless because Genscape clearly used that financial support information as justification for its registration in the QAP program.

This decision is a final agency action for purposes of 42 U.S.C. § 7607(b)(1). Pursuant to 42 U.S.C. § 7607(b)(1), judicial review of this final agency action may be sought in the United States Court of Appeals for the appropriate circuit. This action is not a rulemaking and is not subject to the various statutory and other provisions applicable to a rulemaking.

Appendix B

Time-line of Gen-X and SRAC RIN Production during the Interim Period with Genscape Major Actions Overlaid

Site Visit Notes: SRAC gave “answers [that] were not consistent”, is “up to something”, and gave “a bogus reason” for their activities

Scott Johnson affidavit to Genscape swearing there is no fuel to feedstock loop

Genscape verifies PIRs QAP Rule effective date

Average monthly RIN production was ~ 282,831 from Aug. 2010 through May 2012. Total RINs produced during that time was ~6,222,281

-----INTERIM PERIOD-----

From Oct. 2012-Apr. 2015, Gen-X and SRAC generated at least 72 million fraudulent RINs On Nov. 30, 2015 Scott Johnson pled guilty to the fraudulent generation of those 72mil RINs

Total RINs produced from May 2015-Nov. 2015 was 453,101. No RINs were produced after Nov. 2015
