

Soak Up the Rain New England Webinar Series:

Goin' Mobile: Mapping your Stormwater Assets

Tuesday, September 24th, 1:30 PM-3:00 PM EST

[Click Here to Register](#)

Stormwater asset mapping can be complicated, resource intensive and costly, but it doesn't have to be. As technology has evolved, Geographic Information Systems (GIS) have become less expensive and easier to use than ever before. Whether you are mapping rain gardens, storm drains, or stop signs, new mobile mapping devices and applications (or "apps") can help. Many New England communities are now successfully and efficiently mapping their stormwater systems and other municipal assets with mobile devices in the field.

This webinar will introduce and demonstrate different mobile apps related to stormwater and green infrastructure. Speakers from different levels of government and industry across New England will provide insights on the strategies employed to successfully map stormwater assets, including partnering with others to share equipment, software and expertise. The webinar will also cover lessons learned and provide recommendations for avoiding common pitfalls while developing and implementing a stormwater management program.

Presenters

- Dave Dickson, CT Nonpoint Education for Municipal Officials (NEMO) Program Co-Director & Mobile Mapping Educator
- Troy Brown, Town Administrator, Litchfield, NH
- Andrew Smeltz, GIS Specialist, Nashua Regional Planning Commission
- Julia Miller, Environmental Planner, Bobrek Engineering & Construction

Who Should Attend:

Municipal decision makers/planners and Department of Public Works (DPW) staff, environmental organizations, practitioners, educators, and interested citizens - anyone who is considering a new project or looking to build on an existing program.

About the Webinar Series

The Soak up the Rain Webinar Series highlights innovative approaches to addressing stormwater in New England, presented by leaders from around the region.

- Hear about stormwater public outreach resources and programs;
- See who's soaking up the rain as we showcase green infrastructure projects and programs;
- Learn about the latest tools and resources from EPA and others for implementing and promoting green infrastructure; and
- Engage with others as we share information about successes, barriers, and lessons learned while implementing green infrastructure in New England communities.
