

RESPONSE SUMMARY

RESPONSE TO COMMENTS ON THE FEDERAL DRAFT PERMIT FOR United Initiators, Inc. Elyria, Ohio EPA ID# OHD 046 202 602

No comments were received by the U.S. Environmental Protection Agency on the draft Federal RCRA permit during the public comment period (from January 4 to February 22, 2019).

Therefore, no conditions of the draft permit were changed in the final permit, with the exception of changes necessary to identify that the permit has been finalized and the minor changes noted below:

1. "Draft " in the header were deleted from the draft permit, because such references are not needed in the final Federal permit.
2. On page ii of the title page EPA has updated the information on the State permit to reflect that EPA is coordinating this permit with the issuance of a new permit by the State. EPA anticipates a new State permit will be issued around the time EPA issues the federal permit.
3. On p. 15 of 15, at the end of your permit, the last sentence "In such a case, repair of this equipment shall occur before the end of the next hazardous waste management unit shutdown." was removed since it was already in Section II.A.6.a. of the permit.
4. Spacing, grammar, and Table of contents were corrected.
