|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------------------|-----------------------|
| Domain | Metric | Qualitative Determination [i.e., High, Medium, Low, Unacceptable, or Not rated] | Comments | Metric Score | Metric Weighting Factor | Weighted Score |
| Test Substance | 1. Test Substance Identity | High | The test substance was identified by chemical name. | 1 | 2 | 2 |
| | 2. Test Substance Purity | Medium | The test substance source and purity were not reported in this secondary source; the Primary source may have more detail. | 2 | 1 | 2 |
| Test Design | 3. Study Controls | Low | Controls were not reported in this secondary source; however, the Primary source may contain more detail. | 3 | 2 | 6 |
| | 4. Test Substance Stability | High | Limited details were reported in this secondary source; however, the Primary source may contain more detail. | 1 | 1 | 1 |
| Test Conditions | 5. Test Method Suitability | High | The test method was suitable for the test substance. | 1 | 1 | 1 |
| | 6. Testing Conditions | Medium | Limited details were reported in this secondary source; however, Primary source may contain more detail. Omissions were not likely to have had a substantial impact on the study results. | 2 | 2 | 4 |
| | 7. Testing Consistency | High | No inconsistencies were reported or identified. | 1 | 1 | 1 |

| | | | | | | |
|---------------------------------------|------------------------------------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----|----|
| | 8. System Type and Design | Medium | Limited system design details were reported. | 2 | 1 | 2 |
| Test Organisms | 9. Test Organism Degradation | Low | Not reported. This was a secondary source; the Primary source may contain more detail. | 3 | 2 | 6 |
| | 10. Test Organism Partitioning | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Outcome Assessment | 11. Outcome Assessment Methodology | High | The outcome assessment was appropriate for this study. | 1 | 1 | 1 |
| | 12. Sampling Methods | High | The sampling was reported and suitable for the study. | 1 | 1 | 1 |
| Confounding/ Variable Control | 13. Confounding Variables | Medium | Limited details were reported in the secondary source; the Primary source may contain more detail. Transformation products were not measured, and evaporation was not specified; however, these omissions were not likely to have had an impact on the results. | 2 | 1 | 2 |
| | 14. Outcomes Unrelated to Exposure | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Data Presentation and Analysis | 15. Data Reporting | Medium | There were omissions in the results details; however, these were not likely to have had a substantial impact on the study results. This is a secondary source; the Primary source may contain more detail. | 2 | 2 | 4 |

| | | | | | | |
|----------------------|--------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------|------|---------------------------------|--------|
| | 16. Statistical Methods and Kinetic Calculations | Not rated | Not reported. This was a secondary source; the Primary source may have more detail. | NR | NR | NR |
| Other | 17. Verification or Plausibility of Results | Not rated | Not applicable for this secondary source; the Primary source may have more detail. | NR | NR | NR |
| | 18. QSAR Models | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| | | | Sum of scores: | 22 | 18 | 33 |
| High | Medium | Low | Overall Score = Sum of Weighted Scores/Sum of Metric Weighting Factors: | 1.83 | Overall Score (Rounded): | 1.8 |
| ≥ 1 and < 1.7 | ≥ 1.7 and < 2.3 | ≥ 2.3 and ≤ 3 | | | Overall Quality Level: | Medium |

| | | | | | | |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------------------|-----------------------|
| Study Reference: | Matsui, S; Murakami, T; Sasaki, T; Hirose, Y; Iguma, Y. (1975). Activated sludge degradability of organic substances in the wastewater of the Kashima petroleum and petrochemical industrial complex in Japan. Prog Water Technol 7: 645-659. HERO ID: 18852 | | | | | |
| Domain | Metric | Qualitative Determination [i.e., High, Medium, Low, Unacceptable, or Not rated] | Comments | Metric Score | Metric Weighting Factor | Weighted Score |
| Test Substance | 1. Test Substance Identity | High | The test substance was identified by chemical name. | 1 | 2 | 2 |
| | 2. Test Substance Purity | Medium | The source and purity of the test substance were not reported; however, the test substance was identified by analytical means. | 2 | 1 | 2 |
| Test Design | 3. Study Controls | Medium | The use of controls was not reported but likely did not impact the study results. | 2 | 2 | 4 |
| | 4. Test Substance Stability | Medium | Test substance stability was not included but does not limit the interpretation of the results. | 2 | 1 | 2 |
| Test Conditions | 5. Test Method Suitability | High | The method is suitable for test material. | 1 | 1 | 1 |
| | 6. Testing Conditions | High | Conditions were adequately monitored and reported. | 1 | 2 | 2 |
| | 7. Testing Consistency | High | Every substrate was tested under the same conditions. | 1 | 1 | 1 |
| | 8. System Type and Design | High | Testing conditions were monitored, reported, and appropriate for the method. | 1 | 1 | 1 |
| Test Organisms | 9. Test Organism Degradation | High | The inoculum source was reported. | 1 | 2 | 2 |

| | | | | | | |
|---------------------------------------|--------------------------------------------------|-------------|---------------------------------------------------------------------------------------------------------------------------|------|---------------------------------|------|
| | 10. Test Organism Partitioning | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Outcome Assessment | 11. Outcome Assessment Methodology | High | The method reported is suitable for biodegradation assessment. | 1 | 1 | 1 |
| | 12. Sampling Methods | High | The timing and frequency of the sampling methods were clearly reported and adequate for the outcomes of interest. | 1 | 1 | 1 |
| Confounding/ Variable Control | 13. Confounding Variables | High | Absorption and volatilization were discussed. | 1 | 1 | 1 |
| | 14. Outcomes Unrelated to Exposure | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Data Presentation and Analysis | 15. Data Reporting | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 2 | 2 |
| | 16. Statistical Methods and Kinetic Calculations | Medium | No information regarding statistics and kinetics were provided; however, results from multiple times points was reported. | 2 | 1 | 2 |
| Other | 17. Verification or Plausibility of Results | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |
| | 18. QSAR Models | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| | | | Sum of scores: | 19 | 20 | 25 |
| High | Medium | Low | Overall Score = Sum of Weighted Scores/Sum of Metric Weighting Factors: | 1.25 | Overall Score (Rounded): | 1.3 |
| ≥1 and <1.7 | ≥1.7 and <2.3 | ≥2.3 and ≤3 | | | Overall Quality Level: | High |

| | | | | | | |

| Study Reference: | Cai, S, hu; Cai, T; Liu, S; Yang, Q; He, J; Chen, L; Hu, J. (2014). Biodegradation of N-methylpyrrolidone by Paracoccus sp. NMD-4 and its degradation pathway. Int Biodeterior Biodegradation 93: 70-77. http://dx.doi.org/10.1016/j.ibiod.2014.04.022 HERO ID: 3576998 | | | | | |
| Domain | Metric | Qualitative Determination [i.e., High, Medium, Low, Unacceptable, or Not rated] | Comments | Metric Score | Metric Weighting Factor | Weighted Score |
| Test Substance | 1. Test Substance Identity | High | The test substance was identified by chemical name. | 1 | 2 | 2 |
| | 2. Test Substance Purity | High | The test substance source was reported. | 1 | 1 | 1 |
| Test Design | 3. Study Controls | Medium | Appropriate controls were included but results were not reported; additional information may be in the Supporting Information. | 2 | 2 | 4 |
| | 4. Test Substance Stability | Medium | Limited details regarding this metric; however, this was not likely to have influenced the results. | 2 | 1 | 2 |
| Test Conditions | 5. Test Method Suitability | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |
| | 6. Testing Conditions | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 2 | 2 |
| | 7. Testing Consistency | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |
| | 8. System Type and Design | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |

| | | | | | | |
|---------------------------------------|--------------------------------------------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----|----|
| Test Organisms | 9. Test Organism Degradation | Medium | Well characterized enrichment pure culture from pesticide factory activated sludge. Relevant for study of potential degradation pathways; however, not representative of natural environmental conditions and rates were not relevant. | 2 | 2 | 4 |
| | 10. Test Organism Partitioning | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Outcome Assessment | 11. Outcome Assessment Methodology | High | Appropriate for identification of potential degradation pathways; however, there may be others. Degradation rates were not relevant to environmental rates. | 1 | 1 | 1 |
| | 12. Sampling Methods | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |
| Confounding/ Variable Control | 13. Confounding Variables | High | No confounding variables were noted. | 1 | 1 | 1 |
| | 14. Outcomes Unrelated to Exposure | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| Data Presentation and Analysis | 15. Data Reporting | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 2 | 2 |
| | 16. Statistical Methods and Kinetic Calculations | High | The analysis of data was clearly described. | 1 | 1 | 1 |

| | | | | | | |
|----------------------|---------------------------------------------|-------------------------|--------------------------------------------------------------------------------------|------|---------------------------------|------|
| Other | 17. Verification or Plausibility of Results | High | This metric met the criteria for high confidence as expected for this type of study. | 1 | 1 | 1 |
| | 18. QSAR Models | Not rated | The metric is not applicable to this study type. | NR | NR | NR |
| | | | Sum of scores: | 18 | 20 | 25 |
| High | Medium | Low | Overall Score = Sum of Weighted Scores/Sum of Metric Weighting Factors: | 1.25 | Overall Score (Rounded): | 1.3 |
| ≥ 1 and < 1.7 | ≥ 1.7 and < 2.3 | ≥ 2.3 and ≤ 3 | | | Overall Quality Level: | High |

| | 18. QSAR Models | High | The models in EPI Suite™ have defined endpoints. Chemical domain and performance statistics for each model are known, and unambiguous algorithms are available in the EPI Suite™ Documentation and/or cited references to establish their scientific validity. Many EPI Suite™ models have correlation coefficients >0.7, cross-validated correlation coefficients >0.5, and standard error values <0.3; however, correlation coefficients (r ² , q ²) for the regressions of some environmental fate models (i.e. BIOWIN) are lower, as expected, compared to regressions which have specific experimental values such as water solubility or log Kow (octanol-water | 1 | 1 | 1 |

¹Study performed in the presence of catalyst or at wavelengths not relevant to environmental conditions. Consistent with our Application of Systematic Review in TSCA Risk Evaluations document, if a metric for a data source receives a score of Unacceptable (score = 4), EPA will determine the study to be unacceptable. In this case, one of the metrics was rated as unacceptable. As such, the study is considered unacceptable and the score is presented solely to increase transparency.
