FYI, EPA's comments on the Clark County, NV Ozone Advance update finally went to our partners today. At this point, we have two updates at various stages of review (Mecklenburg County, NC and State of NC) and at least one new update on its way to us soon (Tulsa, OK).

Hi Mike,

Attached are EPA's comments and ideas for your consideration as you develop your path forward for 2020 under EPA's Ozone Advance program. We are pleased that Clark County continues to participate in the Ozone Advance program. As a marginal area for the 2015 ozone standard, it continues to be important to continue to raise awareness of air pollution and continue to push for the reduction of ozone precursors in Clark County. The attached document provides ideas on ways to further proactively reduce emissions in Clark County. In addition to our comments, we have also attached our most recent Federal Funding and Training Update to assist you further with outreach and funding.

Please contact me at 415-972-3958, or Karina O'Connor at 775-434-8176, if you have any questions, or would like to discuss.

Thank you, and hope all is well with you all! Happy Halloween!

Anita
