¹² This checklist has been withdrawn. On October 30, 1995 (60 FR 55202), EPA issued an administrative stay of the regulatory provisions set forth in 40 CFR 279.10(b)(2) applicable to used oil destined for recycling that has been mixed either with characteristic hazardous waste or with waste listed as hazardous because it exhibits a hazardous waste characteristic. However, on January 19, 1996, this administrative stay was vacated by the U.S. Court of Appeals for the District of Columbia. EPA published a final rule on June 28, 1996 (61 FR 33691) that clarified the regulatory status of the mixtures of used oil and hazardous wastes destined for recycling in light of the judicial vacatur. As a result, EPA has decided that Revision Checklist 147 is not necessary.

¹³ This checklist has been withdrawn. On April 9, 1999, the United States Court of Appeals for the District of Columbia, in *Great Lakes Chemical Corporation versus EPA* (Docket No. 98-1312), granted the U.S. Government's motion for a voluntary vacatur of the rules addressed by Revision Checklist 165. Because of this vacatur, EPA has withdrawn this revision checklist. Note that the final rule published August 10, 1998 (63 FR 42580), is also vacated as it only clarified that the typographical errors made in the May 4, 1998 (63 FR 24596) rule were corrected by the June 29, 1998 rule (63 FR 35147).

¹⁴ A court decision has vacated the portion of the May 26, 1998 final rule addressing secondary materials reclaimed by the mineral processing industry. The case was decided April 21, 2000 in the U.S. D.C. Circuit Court of Appeals, *Association of Battery Recyclers, Inc. v. U.S. EPA*.

¹⁵ EPA is amending its regulations to conform with an order issued on April 9, 1999 by the United States Court of Appeals for the D.C. Circuit in *Great Lakes Chemical Corporation v. EPA* [Docket No. 98-1312] that vacated Agency regulations listing certain organobromine wastes as hazardous wastes under RCRA (63 FR 24596; withdrawn Revision Checklist 165). The land disposal restrictions treatment standards of 40 CFR part 268 are also modified by deleting these wastes and their associated treatment standards. The vacated Federal hazardous waste listings and regulatory requirements based on those listings are to be treated as though they were never in effect. State regulations, which may be more stringent than Federal rules, were not necessarily affected by the court's ruling. Due to the vacatur, EPA withdrew Revision Checklist 165. Therefore, this revision checklist is only relevant for States that have already adopted the final rule addressed by withdrawn Revision Checklist 165 and wish to amend their regulations to conform to the vacatur.

¹⁶ The revisions addressed by this final rule only impact the procedures used by EPA for appeals of permit decisions. According to the State authorization requirements in 40 CFR 271.14, EPA does not require State programs to have equivalent procedures for appeals in their programs. Therefore, the revisions made by this rule concerning permit appeal and termination procedures have no impact on authorized State programs. EPA will not authorize States for this rule and therefore, has not issued a checklist to be used by States.

¹⁷ Performance Track was terminated by EPA on May 14, 2009 (74 FR 22741).

¹⁸ This rule was withdrawn by the June 15, 2010 Withdrawal of the Emission Comparable Fuel Exclusion rule (75 FR 33712).
