## 2013 Property Access Plan

Section 3.1.1 of the revised Statement of Work (SOW) for Remedial Action and Operations, Monitoring and Maintenance (Appendix B to the Consent Decree) issued by the United States Environmental Protection Agency (EPA) in December 2010 requires that the Remedial Action Work Plan (RAWP) for Phase 2 dredging and facility operations in each year of Phase 2 must include a Property Access Plan (or updates to a previously approved plan). GE's RAWP for 2012, submitted in April 2012, included (as Appendix E) a Phase 2 Property Access Plan for 2012 (2012 PAP). There are no substantive changes to that plan for the dredging and facility operations to be conducted in 2013, except that GE has obtained access to one additional location.

Accordingly, this Phase 2 Property Access Plan for 2013 incorporates by reference the 2012 PAP, with the exception that: (1) references therein to 2012 should be read to refer to 2013; and (2) Attachment A to the 2012 PAP has been modified by the addition of a section describing access to the new location (see attached page).

**ATTACHMENT A**  
**ACCESS AGREEMENTS**

This section incorporates by reference Attachment A of the 2012 Property Access Plan with the following addition.

**A.9 South Thompson Island Pool Crew Change Location**

The South Thompson Island Pool Crew Change Location located between Route 4 and the NYSCC Champlain Canal just south of the NYSCC Crocker's Reef Guard Gate will be used in 2013 for parking of worker vehicles and to allow workers to safely transfer onto crew boats. GE obtained a Use and Occupancy permit from NYSCC in 2012 for the use of the NYSCC-owned land necessary for the crew change location.
