

Robin Jenkins, Economist in EPA's [National Center for Environmental Economics](#)

Research Interests: Solid and hazardous waste policy analysis; land contamination, cleanup, and reuse; economic and distributional impacts

Biography: Robin Jenkins has been an economist at the National Center for Environmental Economics at the U.S. EPA since 1997. Robin's areas of expertise include issues surrounding land contamination, hazardous waste, solid waste, and economic impacts of environmental regulation. She has worked on regulatory teams targeting hazardous sites, landfills, oil and gasoline spills, chemical facility accident prevention, coal combustion ash, and more. Currently, Robin is director of a forum of agency-wide economists, and leads a team focused on the economics of land contamination and cleanup. An on-going project involves writing guidance on issues relevant to estimating the economic impacts of EPA policies. Prior to joining the Agency, Robin was an associate professor in the economics department at St. Mary's College of Maryland (1990-1997) and served as a Gilbert White Fellow at Resources for the Future (1997). Robin received a BA in social science from St. Mary's College of Maryland (1981) and a PhD (1991) in economics from the University of Maryland-College Park.
