Category	TRI-MEweb Page	Description of Improvement
Form Preparation	Various pages	CAS numbers are displayed before chemical names. Chemical names with more than 100 characters have "…" displayed after the first 100 characters. These are all PFAS chemicals.
Form Preparation	Add Form	172 new PFAS chemicals are included on the TRI chemical list for RY 2020 reporting
Form Preparation	Add Form	Users will see updated CAS numbers for Phosphorous and D-Trans-Allethrin
Form Preparation	Add Form	Users will see an updated "Add Form" module when a new TRI form is created
Form Preparation	Add Form	When users specify a chemical that is a member of a chemical category, a list of individual members of the category will appear
Form Preparation	Section 3	Under "Activities and Uses," users must select "Yes" or "No" for "Manufactured, Processed and Otherwise Used"
Form Preparation	Section 5.1 and 5.2	A new pop-up will remind users to review and use any available NEI data for air emissions calculations
Form Preparation	Section 5	Users will see a redesigned page for "On-site Release and Disposal" for reporting dioxin and dioxin-like compounds releases
Form Preparation	Various pages	Users will see an updated interface wherever Schedule 1 dioxin and dioxin-like compounds data are entered
Form Preparation	Various pages	If users do not have member-specific quantity data for the 17 dioxin and dioxin-like compounds congeners, they can choose to explain why they don't have these values
Form Preparation	Section 6.1	Redesigned landing page for the POTW page
Form Preparation	Section 6.1	Redesigned POTW landing page for reporting dioxin and dioxin-like compounds
Form Preparation	Section 8.9	New warning text will prompt users to calculate "Production or Activity Ratio" if the same chemical was reported in the prior year
Form Preparation	Section 8.10	Users will see a redesigned menu when selecting a category and activity for "Source Reduction Activities"
Form Preparation	Form Home	Users can see their form eReceipt status and download the eReceipt when it's available

Category	TRI-MEweb Page	Description of Improvement
Form Preparation	XML Upload	Users will see a "Verified" stamp after data discrepancies detected in an XML upload have been addressed
From Preparation	XML Upload	In the XML Error Report, users will see the name of the chemical form that had a detected error
Form Validation	Error List	Users will see "Possible Error" alert if a non-federal facility used a non-TRI NAICS code as their primary NAICS code in Section 4.5
Form Validation	Error List	Users will see a "Critical Error" alert if they do not select "Yes" or "No" for Section 3 questions
Form Validation	Error List	Users will encounter a "Possible Error" alert if they changed the calculated release value for each POTW in Section 6.1
Form Validation	Error List	Users will see a "Possible Error" alert if they select "NA" for "Production/Activity Ratio" for a chemical reported in Section 8.9 in the prior reporting year
Form Validation	Error list	The error list will indicate where in the Form R each error is located
Form Validation	Review Forms	Users will have the ability to edit a form directly from the "Not Checked for Errors" table on the "Review Forms" page using a new "Edit Form" button
Form Validation	Review Forms	Users will also have the ability to delete a form directly from the "Failed Forms" table on the "Review Forms" page using a new "Delete Form" button
General	My TRI	Users will see a new "Notice for Users" banner on the "My TRI" page
