

# Soak Up the Rain New England Webinar Series:

# EPA's Watershed Management Optimization Support Tool (WMOST) Thursday, February 27<sup>th</sup>, 1:00 PM-2:30 PM EST Click Here to Register

EPA's Watershed Management Optimization Support Tool (WMOST) facilitates integrated and cost-effective water management among communities, utilities, watershed organizations, consultants, and others at the local or small watershed scale. WMOST models the environmental effects and costs of management decisions in a watershed context and helps identify the most cost-effective management practices to meet water quality goals, even at the HUC12 – HUC10 watershed scale. WMOST can help communities explore a wide range of potential solutions in drinking water, wastewater, stormwater (gray and green infrastructure), and land conservation programs.

This webinar will demonstrate the recently updated WMOST Version 3.01 (https://www.epa.gov/ceam/wmost) and cover the pending release of a module to estimate additional benefits and co-benefits associated with implementation of green infrastructure practices. Presentations will provide background on the WMOST tool, demonstrate its capabilities, and illustrate successful implementation of the tool through case studies.

## Presenter

• Naomi Detenbeck, EPA Office of Research and Development (ORD)

#### Who Should Attend:

Municipal decision makers/planners and Department of Public Works (DPW) staff, environmental organizations, practitioners, educators, and interested citizens - anyone who is considering a new project or looking to build on an existing program.

#### **About the Webinar Series**

The Soak up the Rain Webinar Series highlights innovative approaches to addressing stormwater in New England, presented by leaders from around the region.

- Hear about stormwater public outreach resources and programs;
- See who's soaking up the rain as we showcase green infrastructure projects and programs;
- Learn about the latest tools and resources from EPA and others for implementing and promoting green infrastructure; and
- Engage with others as we share information about successes, barriers, and lessons learned while implementing green infrastructure in New England communities.
