Pueblo of Santa Ana

**Registration and a Call for Abstracts coming soon...**

The U.S. EPA's Tribal NPS Program and the Pueblo of Santa Ana invite you to save the date for a training workshop that will cover both technical and programmatic training topics to support tribal NPS management efforts. This three-day workshop will include classroom-based training sessions and field visits to local water quality restoration sites. Attendees will have an opportunity to present on their NPS program experiences, network with other tribal NPS coordinators, and learn from other water quality professionals on a range of NPS topics. Potential agenda topics include:

- Managing CWA Section 319 programs (grants management, NPS program planning, etc.),
- Implementing the watershed approach to identify and manage NPS pollution sources,
- Working with partners and leveraging funding,
- NPS water quality assessment and monitoring,
- NPS-specific sessions on hydromodification, agriculture/soil health, invasive species, etc.,
- NPS threats: climate change, natural hazards, etc.,
- Protecting healthy/unimpaired waters.

**\*Registration priority will be given to tribal NPS staff in EPA Regions 6, 8 and 9.\***
