Re: EPA Pretreatment Notification of Categorical Industrial User Requirements, ICIS Number:
CO-PF00101

Dear Mr. Owens:

Based on information gathered during the facility inspection conducted by the U.S. Environmental Protection Agency (EPA) on March 27, 2019 and the information submitted by Jabil, Incorporated (Jabil) in the May 21, 2019 application for the Notification of Discharge Requirements, Jabil is subject to the Metal Finishing Point Source Category Pretreatment Standards at 40 CFR Part 433. Jabil is an industrial user of the Monument Sanitation District's and Tri-Lakes' publicly owned treatment works (POTW), which does not have a Pretreatment Program approved by the EPA. Therefore, the EPA directly oversees compliance of industrial users that discharge to the Monument Sanitation District and the Tri-Lakes POTW. The EPA is partnering with the Monument Sanitation District and the Tri-Lakes POTW to ensure the POTW is protected from potential impacts of pollutants discharged from non-domestic sources.

Enclosed is information regarding Jabil's discharge requirements as a categorical industrial user, subject to the Metal Finishing Point Source Category Pretreatment Standards at 40 CFR Part 433 (Enclosure 1, Notification of Discharge Requirements). This document sets forth specific monitoring and reporting requirements the EPA has established in accordance with 40 CFR Part 403 in addition to applicable Categorical Pretreatment Standards and Pretreatment Requirements. Enclosure 2 is the associated fact sheet, which provides a rationale for the conditions set forth in Enclosure 1.

The Pretreatment regulations at 40 CFR 403.12(j) require Jabil to promptly notify the EPA and POTW in advance of any substantial change in the volume or character of pollutants in its discharge that may affect the regulatory requirements contained in this notification. These substantial changes could include changes to the operations, wastestream generation, and/or wastewater management that may affect the status of Jabil under the Pretreatment regulations or the calculation of alternative limits due to dilution from non-regulated wastestreams.

Nothing contained in this notification package or in any EPA regulations restrict State or local agencies from imposing additional requirements in accordance with applicable laws, including requirements which are more stringent than those imposed by the EPA.

If you have any questions about the enclosed information, please contact Al Garcia at 303-312-6382 or garcia.al@epa.gov.

Sincerely,

Darcy O'Connor, Director
Water Division
