CONSENT AGREEMENT

I. NATURE OF ACTION

1. This is an administrative penalty assessment proceeding brought under Section 309(g)(2)(A) of the Clean Water Act, 33 U.S.C. § 1319(g)(2) (A) , (CWA or the Act) and Sections 22.13(b) and 22.18 of the Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation/Termination or Suspension of Permits (Consolidated Rules), as codified at Title 40 of the Code of Federal Regulations (C.F.R.), Part 22.
2. This Consent Agreement and the attached Final Order shall collectively be referred to as the CAFO.
3. Having found that settlement is consistent with the provisions and objectives of the Act and applicable regulations, the Parties have agreed to settle this action pursuant to 40 C.F.R. § 22.18 and consent to the entry of this CAFO without adjudication of any issues of law or fact herein.

II. PARTIES

4. Complainant is the Chief of the Water Enforcement Branch of the United States Environmental Protection Agency (EPA), Region 4, who has been delegated the authority on behalf of the Administrator of the EPA to enter into this CAFO pursuant to 40 C.F.R. Part 22 and Section 309(g)(2)(A) of the CWA.
5. Respondent is Metro Utility Department (Respondent), a municipality existing under the laws of the State of Tennessee doing business in the State of Tennessee. This proceeding pertains to Respondent's facility located at Lynchburg, Moore County, Tennessee (Facility).

III. GOVERNING LAW

6. To accomplish the objective of the CWA, defined in Section 101(a) of the CWA, 33 U.S.C. § 1251(a), to restore and maintain the chemical, physical and biological integrity of the nation's waters, Section 301(a) of the CWA, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person into waters of the United States except as in compliance with a National Pollutant Discharge Elimination System (NPDES) permit issued pursuant to Section 402 of the CWA, 33 U.S.C. § 1342.
7. Section 402 of the CWA, 33 U.S.C. § 1342, establishes an NPDES Permit Program authorizing the EPA or authorized states to administer the NPDES Permit Program, including the issuance of NPDES permits allowing for the discharge of pollutants, including stormwater, into navigable waters subject to specific terms and conditions. The EPA has granted the State of Tennessee, through the Tennessee Department of Environment and Conservation (TDEC), approval to issue NPDES permits pursuant to Section 402(b) of the CWA.
8. Section 502(12) of the CWA, 33 U.S.C. § 1362(12), defines a "discharge of pollutants" as "any addition of any pollutant to navigable waters from any point source . . ."
9. Section 502(14) of the CWA, 33 U.S.C. § 1362(14), defines "point source" as "any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit [or] discrete fissure . . . from which pollutants are or may be discharged."
10. Section 502(7) of the CWA, 33 U.S.C. § 1362(7), defines "navigable waters" as "the waters of the United States, including the territorial seas."
11. Pursuant to Section 309(g)(1) of the CWA, 33 U.S.C. § 1319(g)(1), and 40 C.F.R. § 22.38(b), the Complainant represents that the State of Tennessee was provided a prior opportunity to consult with the Complainant regarding this matter.
12. Pursuant to Section 309(g)(4)(A) of the CWA, 33 U.S.C. § 1319(g)(4)(A), and 40 C.F.R. § 22.45, Complainant will provide public notice of and reasonable opportunity to comment on the proposed issuance of this CAFO prior to issuance of the Final Order.

IV. FINDINGS OF FACTS

13. On April 15, 2015, Respondent submitted a Notice of Intent (NOI) to TDEC for coverage under the NPDES general permit for treated filter backwash and/or sedimentation basin washwater from its water treatment plant.
14. On October 6, 2015, Respondent submitted a revised Notice of Intent to TDEC for coverage under the NPDES general permit for treated filter backwash and/or sedimentation basin washwater from its water treatment plant. The NOI was revised to correct typographical errors, change the frequency of filter backwash, and add a description of the on-site wastewater treatment process.

15. On October 9, 2015, TDEC issued NPDES No. TN0061191 (Permit) to the Respondent which provides Notice of Coverage under General Permit TNG640000 for Discharges of Filter Backwash and Sedimentation Basin Washwater from Water Treatment Plants (WTP) into navigable waters subject to specific terms and conditions. Under this Permit, the WTP is permitted to discharge “pollutants” from a “point source” into Mulberry Creek, from Good Branch, which is a “navigable water” as defined at Section 502(7) of the CWA, 33 U.S.C. § 1362(7). The Permit became effective on October 9, 2015 and expires on August 19, 2020.
16. The Permit includes a requirement, Condition 6.1, which requires instantaneous flow measurement readings.
17. The Permit includes a requirement, Condition 7.2.2, which requires the Respondent to follow the sampling methods and procedures set forth in 40 CFR Part 136.
18. The Permit includes a requirement, Condition 7.3, which requires the Respondent to keep appropriate records for sampling under the NPDES Permit.
19. The Permit includes a requirement, Condition 5.1, which requires the Respondent to comply with effluent limitations and monitoring requirements including total residual chlorine and pH. Permit Condition 5.1 also requires monthly instantaneous monitoring and reporting of flow.
20. The EPA conducted a Compliance Evaluation Inspection (CEI) of the facility on November 19, 2019 and mailed a copy of its inspection report to the Respondent on December 17, 2019. The purpose of the inspection was to assess the Respondent’s compliance with its Permit and the CWA.
21. The EPA issued a Notice of Potential Violation (NOPV) to the Respondent on April 6, 2020.
22. On April 22, 2020, Respondent met with EPA to discuss the potential violations cited in the NOPV and Respondent did not dispute the findings. On May 12, 2020, Respondent submitted to the EPA a letter documenting the actions taken to address each of the violations.

V. ALLEGED VIOLATIONS

23. At all times relevant to this action, Respondent is a “person” within the meaning of Section 502(5) of the CWA, 33 U.S.C. § 1362(5).
24. At all times relevant to this action, the Respondent owned and/or operated the Facility.
25. Based on the CEI and review of additional information, the Respondent has violated Section 301 of the CWA, 33 U.S.C. § 1311, due to Respondent’s failure to comply with the Permit and the CWA implementing regulations. Specifically, the EPA alleges the following violations:
 - (a) At the time of the CEI, the Respondent was not measuring the flow from the NPDES permitted outfall, which is required by Permit Condition 6.1 to be measured as an instantaneous measurement once per month. In the Respondent’s Discharge Monitoring Reports, concerning flow, the Respondent was reporting the volume of backwash water

used, which is not equivalent to the outfall flow because it doesn't include the other three (3) sources of water that are also being discharged to the Basin. Since no flow measurement was being taken at the outfall, this also does not meet the requirement that the flow measurement be taken as an instantaneous reading at the NPDES outfall. This is a violation of Permit Conditions 5.1: Effluent Limitations and Permit Condition 6.1: Sample Types. Both Permit Conditions require instantaneous flow measurement readings be taken at the outfall.

- (b) At the time of the CEI, the Respondent was not following the sampling methods and procedures set forth in 40 CFR Part 136. Specifically, the total residual chlorine and pH samples are required to be analyzed within 15 minutes of being collected. In this case, the sample was being collected during the workday and left to sit until the workday ended, at which time it was taken to the lab to be analyzed. In addition, the total suspended solids and settleable solids samples were not being refrigerated at less than or equal to 6 degrees Celsius during storage. The Respondent's failure to follow the sampling procedures set forth in 40 CFR Part 136 is a violation of Permit Condition 7.2.2: Test Procedures.
- (c) At the time of the CEI, the Respondent was not keeping complete records for sampling. Specifically, the time of the sample was not being recorded, and a chain of custody for the sample was not being maintained. This is a violation of Permit Condition 7.3: Recording of Results.
- (d) The Respondent violated the effluent limitations set forth in Permit Condition 5.1, as self-reported by the Respondent in its monthly Discharge Monitoring Reports. Specifically, the respondent reported one (1) violation of the pH permit limitation and 37 violations of the total residual chlorine (TRC) permit limitations over the past five (5) years.
